Life Insurance. The United States Life Insurance Annuity Trust Company, of Philadelphia. [CASH SYSTEM.]

THE constant, unsolicited applications for Life Insurance, furnish the most abundant and gratifying proof, that the public mind is deeply impressed with the vast importance of this subject.—
The great object however of Insurance should be SAFETY, otherwise the whole motive of Insurance may be disappointed. Too much care cannot be practised in the selection of an Office, with which may be disappointed. Too much care with which to effect the contract. The choice should be regulated, not by present and constant large inducements as this is certainly incompatible with FUTURE BENEFITS. The premiums on life are calculated for the FUTURE; if present and perspective benefits, therefore, are given, the result ultimately must terminate in litigation, disappointment and ruin.—The objects aimed at by this Company are stability and perpetuity. The rates of premium have been carefully prepared with reference to fluctuations. The Cash System of payments has also been adopted—unpaid premium notes constitute no part of the assets of this company—and every contingency being fortified with an ampla capital, SECURITY stamps the whole system; this feature, paramount o all other considerations, commends this company to public favor.
