SACRAMENTO CITY, February 1, 1801.

BROTHER NAP:—I have just received three letters from you, successively dated May 13th, June 10th, and October 25th; so. you can form some idea of the great public accommodation afforded by the present post office arrangement. Six and eight months usually elapse before a letter is delivered in this country—whether owing to a dereliction of duty on the part of the present official incumbent, or a defective postal arrangement, deponent saith not; but one thing is certain, the management of

duty on the part of the present official incumbent, or a defective postal arrangement, deponent saith not; but one thing is certain, the management of matters here is an outrage upon the community.

I have written frequently to you and cousin Sam, and by your letters learn that you have done the same to me; but have received as yet only a tew letters from either of you. If you have an opportunity to send letters by hand to San Francisco, it is much the best way; the one you sent by Mr. Lazard came directly through, though I have not seen the gentleman who brought it. In my last letter to Sam, I stated what I was at, but in case that letter should not be received I will repeat it for your satisfaction.

that letter should not be received I will repeat it for your satisfaction.

After one year's residence in the mountains, having endured all kinds of privations and sufferings in the snow, with good, bad and indifferent luck so blended together that I could hardly tell whether I was fortunate or not; but a glance at my purse, which presented somewhat of a plethora or dropsical contour, would indicate an affirmative, although when I left the mines, about \$3000 were due me, which I was unable to collect. My practice was extensive and lucrative; a visit and prescription in the mines vary from one to six ounces, (an ounce is \$16.) If I had to go down the mountain, which was four miles, and at an angle of from forty to sixty degrees, it was six ounces. You may think this was high, but it was worth the money to climb back.

The days for making "big licks" in the nines may now be numbered among the things that were. The winter thus far has been very unfavorable for mining, having been but little rain, which has prevented miners from working in the "dry diggens," whither they all fied after the first rain; and commenced throwing up dirt to wash in the rainy seasor. The vinter in the mines now i waiting for

whither they all fied after the first rain; and commenced throwing up dirt to wash in the rainy season. Thousands war in the mines now waiting for rain, unable even to earn their "grub," as they classically term rusty pork and half baked slap-jacks. Remember, California is not what it is represented to be, by interested accounts that go back to the States, true, it is a better country than any of the States, but falls far short of all the accounts I have seen published in the papers of the States. There must and will, ere long, be another financial revulsion—it is inevitable; the yield of the mines will not justify and sustain the present prices.

From a year's observation, having been for 300 miles along the western slope of the Siera Nevada, north from the McCosamne river, I find that the productiveness of the mines is about the same,

productiveness of the mines is about the same productiveness of the mines is about the same, averaging to all who work about \$2 per day. I have seen almost innumerable accounts of "big lumps" having been found, which, in the main is true, and about such and each a person having made his "pile," but not a word said about 150,000 made his "pile," but not a word said about 150,000 miners in the country, many of whom are not making their board. This is the true state of the case, and on which you may rely, as I. have no sinister object to accomplish in deceiving you.

The weather this winter is delightful; it is perfect spring. I am inclined to think now that last winter was an unusual one, even for California, for sometimes it would rain fifteen days unceasingly, and then turn into a settled rain. Thus far, this winter, we have not had more than ten days rain

winter, we have not had more than ten days rain altogether. If this is like the ordinary winters here, it certainly is preferable to anything in the way of winter that I have ever seen. * * * * I have just received another letter from you, dated Nov. 19th, per the politeness of some illegible name. * * * Your enquiries about Mr. John

name. Your enquiries about Mr. John A. Springer have been anticipated. A IDr. Patterson, from Tennessee, told me of his death, and that he was from Columbia, Pa. Accordingly, I wrote to cousin Sam, stating the fact, thinking it might be a satisfaction to his friends to know, that he was well attended during his illness, and had he was well attended during his illness, and had every attention that care and skill could bestow. Dr. P. did not say that Springer knew me, but told me because I was from Pennsylvania, and I have written under the impression that he was a son of Nicholas Springer. He is the only Pennsylvanian I have ever known in this country, if he is the same. I am now keeping the "Burnett House" on the corner of 6th and J streets, in this city; or rather my partner attends to the principal business. I own two-thirds of the establishment, and in consideration of having purchased an extra share, I have

own two-thirds of the establishment, and in consideration of having purchased an extra share, I have the privilege of practising medicine, and also receive a full share of the profits of the house. I will send you a draft in my next letter upon some good house in Philadelphia. I have not heard from our mutual friend Harry since I have been here. When you write to him, tell him for me, to withdraw from the literary areas for considerations. here. When you write to him, tell him for me, to withdraw from the literary arena for considerations both pecuniary and honorable. It is "much more pleasant and honorable to be rich and fameless, than it is to be hungry with a deathless mam. The veriest dolt with wealth, is idolized, and the sapient dullness of an imbecile, endorsed by the retence of dellars is complimented as wit; whilst merit in poverty may "burn the midnight taper" in vain, only to prolong in misery, with a half subsistance, its long, lean, lank, semi-transparent, half starved, shadow-of-a-shade carcass. Let him turn his attention to money making. It is the source of all honor and distinction in this world, as all knowing ones here act up to that principle, and run their chances for the next. Money! what is it not? The source of power, honor, joy and luxurious ease! it will unbar prisons and subvert justice! it will command talents in justifying wrong and sway verdicts—it will gain affections that unassum-ing merit and humble virtue would stand aghast at sway verticus—it will guide would stand aghiest at, and trembling, fear to approach—the heaven—it smiles of beauty, the unbending dignity of proud, imperious, pauper aristocracy, ever relaxes itself into an apparent complacence at the shrine of Plutus; and the staid, unsmiling followers of the Great, Meek and Lowly, who while on earth, was so poor as not to have a place whereon to lay his head, deem it not inconsistent to hoard a "pile" of this corrunt omnipotence of earth, which slienates this corrupt omnipotence of earth, which alienates affections, estranges kindred who should be friendly prostitutes talents, subverts justice, stipulates a has filled the Temples with money changers, the great power of earth—the God of Jew Gentile—the shrine at which all bow and offe orisons. If he can understand and appreciate this universal religion he will do well to throw literature to the dogs, and follow in the wake of those who have preceded him to the goal of true and only recognized distinction.

recognised distinction.

Tell Sam I have not received a single number of that locofoco paper yet. I doubt very much if it has ever been sent. I must close or I will not have room to write my name. You will have to spell this letter, as I have written it in such haste that I cannot decypher more than half the hieroglyphics in it. My respects to all friends, and remain Yours, C. L. WOLFE. N. B. WOLFE.

Hon. James Buchanan.

The regular Democracy of Lancaster at their las county meeting, in a manner not to be misunder stood or misinterpreted, expressed their entire ap probation of the political course of this distinguished Democrat, and their unshaken confidence in his

integrity, ability, and statesmanship.

Mr. Buchanan has been assailed with such un ual virulence by certain cliques throughout the State, that we heartily rejoice, that so overwhelming a rabuke has been given to those, who, under th influence of some strange mania seemed to have but one object—to destroy the man of whom Penn

Without expressing a preference for the Presidency, or desiring at this time to discuss any of the questions connected with it, we must in to our feelings, say that to Mr. Buchanan the country is largely indebted, on account of the ser vices he rendered as one of the Cabinet of the la mented Polk, for the lustre he has shed upon the American name abroad, and his recent eloquen and frequent appeals in behalf of the Union. Ser vices that entitle him to the love and admiration

vices that entitle nim to the love and admination of every American, and services that will render his name illustrious in all coning time.

In private he is as amiable, and pure, as in public he is eminent, his worst enemies must acknowledge this. This humble effort in his defence we felt constrained to make. We have too long bee

THE PIRST COAL SENT PROM THIS COUNTY .- I has been generally supposed, says the Philadelphi "Daily Sun," that the coal first brought from Schuylkill county to this city, was a wagon load, at comparative by great cost, by George Shoemaker, about the year 1820. This is not correct. As early as 1795, or thereabouts, Gen. Nichols, Gen. Arthur St. Clair, John Nicholson, and others formed a company to carry coal from Schuylkill county to Philadelphia, and about that time they freighted an ark with coal and brought it to this city. It was deposited in the Potters' field, now Washingto square, and there it remained for many years square, and there it remained for many years, a heap of "black stones," exciting the curiosities and jeers of the idle and "knowing ones," and a monu-ment of the supposed folly of those who, it was thought, had exposed their ignorance by attempting to apply those "black stones" to any useful pur-

predispositions, &c.

Disease like death is the common destiny of mankind. Till the hour of sickness comes how few ever think of a subject which interest all. Every atom of the material world is constantly undergoing a change—man continually—"the is every thing by time and nothing long." The phenomena of discase presents us with numerous lights and shades, alternating with the numerous agencies by which we are afflicted. Presuming that life is a unity whatever material agent possesses the power of arresting the motions of the body is capable of deranging their action. What is disease in its simplest form but an interruption of the electrical motions of the body by agents not compatible with them. These motions may to a certain extent be either increased or decreased without positively injuring the vital actions of the whole—like the wheels of a time piece, stop one and you influence all—so with disease in all chronic maladies whether affecting one or more organs of the body, we inaffecting one or more organs of the body, we in-variably discover them to be effects rather than cures of ill-health. Change the electrical motions which occasion them, and health consequently follows; for this purpose art furnishes no remedy equal to Dr. Keeler's Sarsaparilla. Its virtue has been tested in all chronic, glandular and constitu-tional diseases. Afflicted: "be wise in time, 'tis

Philadelphia, Nov. 22, 1848. Philadelphia, Nov. 22, 1848.

Dr. Keeler—Dear Sir: I take great pleasure in bearing testimony in behalf of your valuable medicine, Sarsaparilla. I have been using it for a pain in the side of long standing, which was occasioned by a severe attack of Pleurisy and fever several years since in the West. For several months past my health has been failing, and the pain in the side so severe at times as to disable me from attending to my business. I have used many remedies with scarce any benefit until I commenced; using your Sarsaparilla, since which time my health has gradually improved, so much so that at the present time ually improved, so much so that at the present time I enjoy much better health than for years past. I have used the medicine in my family, and consider it infinitely superior to any remedy within my knowledge in chronic affections of the chest and organs of digestion. I am yours very respectfully

Philadelphia, Nov. 14, 1848.

Dr. Keeler—Dear Sir: I feel it my duty to state to you the good effects your Sarsaparilla has produced on a son of mine, who has been for several years afflicted with what physicians have termed Scrofula. He has been somewhat hard of hearing for several years, accompanied with a constant discharge from the ears, and a dull heavy pain across the forehead; his general health quite feeble, appetite precarious, and bowels irregular. The ewere swellings of the neck and at the angle of the jaws, the complexion of an ashy paleness, and all the characteristics of wasting health. At your request, I commenced giving him your Sarsaparilla, and I am rejoiced to state that after using three bot and I am rejoiced to state that after using three bot-tles, there has been a remarkable change for the better. His appetite is now good, the pain across the forehead entirely gone, the swellings have dis-appeared, the color of the skin is now like one en-joying good health, indeed he now says he feels joying good neath; indeed the now says in each well, appetite good, sleeps well, and is really changed, which I attribute solely to your medicine. I feel fully satisfied from what I have witnessed in my own child, that it is a medicine of unsurpassed power in disease of a Scrofula character.
