THE constant, unsolicited applications for Life Insurance, furnish the most abundant and gratifying proof, that the public mind is deeply impressed with the vast importance of this subject.—The great object however of Insurance should be SAFETY, otherwise the whole motive of Insurance may be disappointed. Too much care cannof be practised in the selection of an Office, with which to effect the contract. The choice should be regulated, not by present and constant large inducements as this is certainly incompatible with ruture rentre. The premiums on life are calculated for the Fuurre; if present and perspective benefits, therefore, are given, the result ultimately must terminate in litigation, disappointment and run.—The objects aimed at by this Company are stability and perpetuity. The rates of premium have been carefully prepared with reference to fluctuations. The Cash System of payments has also been adopted—unpaid premium notes constitute no part of the sasets of this company—and every contingency being fortified with an ample capital, SECURITY stamps the whole system; this feature, paramount to all other considerations, commends this company to public favor.

A STROLOGY.—The celebrated Dr. C. W. ROBACK, who, during his experience of over a quarter of a century, during which time he has given advice, and employed the wonderful powers which he only is the possessor of in this country, having been born with this wonderful, most powerful science. Who can doubt that we are not under the influence of can adopt that we are not under the influence of destiny, and governed by the reciprocal influence of the celestial, terrestrial, and the astronomical systems, whose mutual relation to each other once disturb, and will it not destroy the unison of action? Do you doubt predestination then why not every man gain the celebrity of General Taylor, Daniel Webster, or a Henry Clayland yet there are some who are foolish enough to doubt that a man may be who are noting in church to doubt that a main may be born with the power to see into future events. Such should not condemn till they have called to see the seventh son of the seventh son, whose advantages from travelling have given him more experience than all the other astrologers, male or female, in the United Sates.

It is such that bring discredit on a pro-fession that has been acknowledged to be a science of the highest order, from time immemorial; and it is the only profession that has holy authority to sus-tain it. The high respect which General Taylor and the following gentlemen had for Astrology, is shown by his letter for his nativity, of the 10th of February, 1846, to the subscriber, in which he pre-dicted all his victories, and named the places of the late war with Mexico; he also predicted that he would be elected President of the United States, and also foretold that he would not live but a short
