Important to Farmers & Thresh ing Machine Makers.

THE subscriber respectfully informs the public that he has lately completed a TRIPLE POW-

LAR IN LEMNAL GEARED HORSE POWER, which outrivals any other in use. It is made en-tirely of Iron, both Frame and Gearing. The Jour-nals are Cast-Steel—its weight is 600 lbs. On trial it has proved itself capable of performing from 50 to 100 per cent. more work than other Powers with the same labor of the team. It is warranted to hold 8 horses.

I have also completed a combined THRESHER

AND CLEANER, which is capable of Threshing and Cleaning from 300 to 500 bushels of wheat per day, with from 6 to 8 Horses, and an equal number of hands. 4 horses can thresh with it from 100 to 200 bushels per day of wheat, and 400 to 500 of

200 bushels per day of wheat, and 400 to 500 of oats. It is very convenient for those who follow Threshing, and for two or more farmers torown in company; it is more convenient to move than any machine in use. The Machine stands on the wag-on while threshing—the Power is loaded on the same wagon in moving—two horses are sufficient to move it; it will save enough labor in threshing 2000 bushels to pay its extra cost. It will thresh in the field or by a stack as conveniently as in a barn. The cylinder and concave can readily be adjusted so as to thresh with equal facility both tough and dry grain. It is free from the complication and liability to get out of order of other machines of the kind;

on the late Presidential Election, should convince those skeptical persons who talk 'd'failure; that no such word as fail is or has been known by the emi-nent and distinguished Astrologer, C. W. ROBACK, who, during his experiences of over a quarter of a century, during which time he has given advice, and employed the wonderful powers which he only is the possessor of in this country, having been born with this wonderful, most powerful suice. Who can donbt that we are not underle.

from travelling have given, him more experience than all the other astrologers, male or temale; in the United Sates. How can it be possible that the destiny of man should be governed by the mere shuffling of a pack of cardst and yet there are thousands who allow themselves, with open months, to swallow the greasy words of some oil woman, whose true skill consists in filling them with wonders that are more for the digestion of others, who credulous, yet more scientific. It is such that bring discredit on a pro-fossion that has been acknowledged to be a science of the highest order, from time immemorial; and it is the only profession that has holy authority to sus-tin it. The high respect which General Taylor and the following gentiormen had for Astrology is, shown by his letter for his nativity, of the 10th of February, 1846, to the subscriber, in which hepre-dicted all his victories, and named the places of the late war with Moxico; he also predicted that he would be elected President of the United Stater, and also foretoid that he would not live but a short time after his election, which prediction has been filled to the very letter. In addition to his power to foreace future events, he has the power to give such information as will effectually redeem such as are given to the free use of the bottle. He is also capable of curing diseases heretofore considered incurable in this country by the ordinary medicines, and wishes all to give him a call who have been given up by their physicians and wish to be cured. 'He will warrant a cure in all cases, and will make no charge, except for the conjurations he shall make use of in his office. He is often asked what a mativity is : he answers, ac-cording to Geomancy, one of the seven points in the science of Astrology, that it is a Horoscope of the future events of a person's life for whom it is cast; by which means thousands in this country and elsewhere have been prevented from misfortunes that had been hidden in the womb of futurity, by
