CURE OF HEAVES. By Sta JAMES LYNDONTON, Principal Farrier to his Royal Highness Prince Albert. THE great discovery contained in this little work procured Sir James his Baronetoy. It is really its weight in gold to all who own or use Horses. It prescribes a Certain and Positive Cure for the Heaves, which any person can prepare. The rem-edy is better and cheaper than any advertised Heave Powder, and is perfectly safe, as any can know who tries it. Horse owners know that many a valuable horse losses half his price by this prevalent disease. The remedy prescribed in this work will cure him and increase his market value, besides relieving the poor beast of a horrible complaint, similar to the Asthma in a man. The public can depend on this work: it is no catchpenny humbug. The articles prescribed by Sir James are all cheap and can be had at any store. To prevent imposition monopoly against which they have to contend, but they are determined to encounter it, and relying apon the encouragement of all who are opposed to monopolies and in favor of low rates of fare, they will run this line at the following rates, viz: THREE CENTS PER MILE, no more nor no less, under any circumstances These are the lowest rates at which passengers can be carried over the road under the present rates of toll charged by the State, which are two cents per mile on each passenger, and \$4,92 on each car. The Public approve of it, hecause it is com-mon sense, and because they know from sad ex-perience, that one preparation will not cure the three stages of Consumption: The suffering, disappointed, and discouraged invalid approves of it, because its principles hold out a reasonable hope, and when he uses Nuttall's Striacum, his hopes are realized. If he is in the first stage of Consumption and uses the first bottle, his expectoration, difficult and painful, becomes free and easy, his cough soon gets well, the soreness, tickling in his throat, in-flammation, pain in his breast, side, head, back, joints, and limbs are removed. If he is in the second stage and uses the second bottle, his expectoration, copious and bloody, assumes a healthy appearance, and at length dis-appears, his bowels become regular, his appetite returns, the flush in his cheek disappears, the burning heat in the palms of his hands and soles of his feet, are felt no longer, his cough now ceases, he recovers and is well. If he is in the third stage, and uses the third bottle, his Diarrhœa gradually ceases, his weaks bowels become strong, his cough now ceases, he recovers and is well. If he is in the third stage, and uses the third bottle, his Diarrhœa gradually ceases, his weak bowels become strong, his cough not other bad symptoms disappear, (and if the patient is a female, her monthy periods return,) his feeble digestion becomes strong and vigorous, his stomach recovers its power and tone, and refease new, rich, and

Horse Power, Now being manufactured at the shop of the undersigned in East King Street, Lancaster. This cheap and simply constructed Horse Power excels any others now in use—and more easily operated, and cannot be put out of gear. It is a single conical Wheel Horse Power with four Levers, to be operated by four or eight horses. The bed frame is solid and firmly prevents the gearing from getting out of order, and no danger of breakage. f breakage.

20 12 The master wheel is cone shaped, having the teeth or cogs on the underside, and the lever loops cast solid with the wheel. The levers are firmly set into boxes in the hub of the wheel, and secured by rods extending to each lever, and regulate the easy motion of the master wheel, so that the power of each horse is regularly divided, and the wheel is prevented from jarring by the sudden starting of the horse. The bed frame is composed of two solid plank forming right angles by being halved together at their centres. The bed plate is formed of a solid iron casting, having a cone shape pivot resting upon the centre of the bed frame and firmly bolted through. Baron Liebig in his celebrated work on Animal Chemistry, says: "An antificial Digestive Fluid, analogons to the Gastrie Juice, may be readily prepared from the nuccous membrane of the stomach of the caff, in which various articles of food, as meat and eggs, will be softened, changed, and digested, just in the same manner as they would be in the human stomach."
Dr. Pereira, in his famous treatise on "Food and Diet," published by Fowler & Wells, New York, page 35, states the same great fact, and describes the method of preparation. There are few higher automites than Dr. Pereira.
Dr. Combe, in' his valuable writings on the "Physiology of Digestion," observes that "a diminution of the due quantity of the Gastrie Juice is a prominent and all-prevailing cause of Dyspepsia," and he states that "a distinguished protessor of medicine in London, who was severely afflicted with this complaint, finding everything elses to fail, had recourse to the Gastrie Juice, obtained from the stomach of the stomach of the stomach of animals, which proved completely successful."
Dr. Gruham, anthor of the famous works on "Vegerable Diet," says: "It is a remarkable fact in pliceiology, that the stomach of animals, mace-frated in water, impart to the fluid the property of disolving various articles of food, and of effecting a kind of artificial digestion of them in nowise thost mavellous officers in curing cases of Dehlity."
