SILVER'S MINERAL PAINTS.

THE wonder of the age, nature's own productions. These Paints differ from all others in tions. These paints differ from all others in the market; they are not clays; they require little Oil, flow easily, and cover with a heavier body than white lead. They neither crack nor peel, and dry readily, making an ENAMEL OF STONE.

COLORS.—We have seen different colors, viz: three Browns, two Chocolates, Black and Yellow, and by combination make every variety and shade of color.

BODY.—These Paints are superior in body (or covering property) to any yet discovered, and pound for pound will cover double the surface of white lead, zinc, or other metalic Paints. white lead, zinc, or other mediate raines.

IRON.—To Iron they furnish a perfect protection against rust, for they contain metal, which like lead acts destructively on the iron; in fact this Paint makes iron doubly valuable for building pur-

BRICK WORK.—They give to house walls a much heavier coating than other paints, and if sanding is required, nothing holds so firmly or finishes so well with it.

ishes so well with it.

OLD ROOFS.—Give us a root, ever so old and leaky, and Silver's Mineral Paints will make it cheaply new and more enduring than it ever was. SHIPS using this extraordinary Mineral as we prepare it for them, will' be proof against the action of hot suns, worms and salt water.

CAPITALISTS and BUILDERS are invited to make strict scrutiny into the merits of these Paints. CAPITALISTS and BUILDERS are invited to make strict scrutiny into the merits of these Paints. They will find a very great reduction might be made in the cost of Painting. These Paints are purely mineral; all clays and other impurities are washed out in preparing them for the market.—They cost but half the price of white lead, and the same quantity will cover twice the surface, and last six times as long which in fact reduces the price to one-twelfth. Climate has no effect on this Paint, and is equally valuable in the cold Canadas or our sunty Florida.

DIRECTIONS.—Use Linseed Oil, mix as thick as you can, and use as other paints. These paints need but little dryer, and for priming and second coating in all house work they will be found far cheaper and more durable than lead.
