Warlike News by the Arctic. The intelligence from Europe, by the Arctic, is of an unusually interesting and warlike character. more especially that from the Bosphorus, a part of the world which has for some time past been, and indeed is now, the scene of a good deal of diplomatic intrigue on the part of England, Prance and Russia. The Russian Ambassador. Prince Mentschikoff, having presented to the Sublime Port his ultimatum, and that ultimatum being of such a character as to leave Turkey no alternative but a declaration of war; and, as a preliminary to that step, the rumor was that she had solicited the alliance of France and England. That solicitation, the further rumor was, had been met by the British and French embassies at Constantinople in so prompt and decided a manner that it was at first reported a British fleet from Malta was actually on its way to the Bosphorus, and a French squadron had already taken its departure from Toulon for the same destination. From the Times of the 22d however, we learn that Admiral Dondas, in command of the fleet at Malta, found his instructions would not allow him to obey the request for his presence in the Dardanelles without special orders from England. The British fleet therefore, remains a Maire, and the French squadron will probably ren dezvous off the coast of Greece or Smyrna to watch the course of eyents. The French Funds had been seriously affected by the reports from Constantinople; and to show what impression the news had upon the British Ministry, we copy the following

ALARMING STATE OF AFFAIRS IN THE EAST. The peace of Europe is in imminent peril, a ill be inferred from what we are about to state In consequence of dispatches received by the Earl of Clarendon at the Foreign Office yesterday, his Lordship proceeded to Downing street, and immediately dispatched messengers to summon to the Admiralty, at the residence of the First Lord, Sir James Graham, the leading members of the Ad inistration now in town. The conference of the Ministers was held at the Admiralty at four o'clock, and was attended by the Earl of Aberdeen, Lord Lodge, Richmond, by a special messenger.) the Earl of Clarendon, Lord Palmerston, and Sir James Graham. All Downing street and Whitehall were in a bustle, and there can be no doubt that the dis-patches received from the East must bave been of in unusually interesting and important character to have required the attendance of the highest and most experienced members of the Cabinet. It is obvious that something is brewing of more than or dinary import, to bring together in the Easter re-cess the leading statesmen, who had intended to en-joy the vacation in the bosom of their family cir-cles.

from the London Morning Advertiser of the 21st:

It is said that the Agamemnon, 110 guns, has been ordered to proceed at once from Portsmouth, to reinforce our squadron at Malta, whose services to remoree our squauron at Maita, whose services in the East are required; and that the Vengeance, 90 guns, Lord Edward Russell commander, has and been kept in readiness outside Plymouth harbor, has been ordered to the same destination.

Without entering further into the question up-permost in everybody's mind, respecting the affairs in the East, it seems perfectly clear that the atten-tion of the Ministry is actively directed to the pres-ent critical conjuncture of matters, and that a very alarming crisis is at hand, only to be averted by a thorough and cordial understanding betwee the Governments of France and England.

The causes of quarrel between Turkey and her powerful neighbor of the north have of late years been innumerable. In short, the world has imbibed a pretty substantial suspicion that a war with the Ottoman Porte has long been coveted by the Rus-sian Bear as a means of partitioning its territory a la Poland, and helping herself to a much coveted eaport on the Mediterranean. In these schemes there is a good reason to believe the Court of S Peteraburgh has the secret co-operation of Austria.

The London Standard says:

"At present they have seized upon two rather inconsistent pretexts for insult. Austria threatens to draw the sword in support of the barbarians of Montenegro, whom by a foul libel upon Christianity she calls a Christian people; Russia, on the other side, menaces Constantinople with an attack in vindication of the claims of the Greek Church to certain sacred sites in Palestine, against the usurpa-tion of that Romanish Church to which Austria becharacter in Turkey, but such inconsistent pretexts for quarrel must remind every one of the fable of the wolf and lamb. Austria acts in support of the Greek Church in Europe, and all the influence of Austria, in common with the other Romish States is employed against the Greek Church in Austria acts in support of the cases the market of the state of the wolf and lamb. Austria acts in support of the present companies in Great Britain is said to be about \$750,000,000, and the annual income \$25, companies have a support of the present companies in Great Britain is said to be about \$750,000,000. In Scotland alone the liabilities of the cases the market of the state of the sta in both cases the unlucky Sultan is the object of menace. There can be no difficulty in drawing a just inference from such a complicated policy; that inference is, that the wolves are resolved upon de-

umber of diggers at work, although there was a scarcity of water in some localities, and there had been some observance of the Christmas holidays Twelve thousand emigrants and 152 ships had an rived in Port Philip during the month of December, but though such an accession to the populatio had been naturally attended with some inconvenience, no suffering had occurred. The price of flour had indeed fallen considerably. The following, on the yield of gold, is extracted from the Melbourne

Argus, of the 3d of January:
Estimated grand total of the yield for the year
up to the 30th of December, 1852, 3,998,321 ounces. We may say, in round numbers, 4,000,000 ounces, which, at 70s. per ounce, is £14,000,000 sterling; but its intrinsic value is certainly more, nearly £16,000,000, or \$80,000,000. The world never, perhaps, exhibited so astounding a result as these figures show.

These several gold fields, namely, Mount Alexan

der, Ballarat and the Ovens, are now being advan-tageously worked. The astonishing richness of Mount Alexander is evidenced in the large amounts which it vields, notwithstanding the immense quantities that have already been drawn from it. The whole country thereabouts appears to be more or less áuriferous

There are various minor spots throughout the territory where gold has been found by explorers, and in paying quantities. Some of those cases are kept secret by the discoveries; others are known, but the limited extent of the deposits prevents any numerous party from engaging upon them. But the three fields already mentioned may be considered the grand centres of gold-digging operations

It is remarkable that the California yield of gold or 1852 is estimated at the same amount as that of Australia for the same period, viz: \$8,000,000. From the Circular of Messrs. Hussey, Bond & Hale, of San Francisco, of the 28th, February, we extract the following remarks in relation to the gold "The declared shipments of gold by steamers

and sailing vessels, during the year 185 \$45,800,000 Upon the basis of a calculation given

in particulars in our Circular of July 30, 1852, we should add to this amount for sums taken away by in-dividuals, (not declared,) and for the amounts retained in circulation, 65 per cent.; but we-believe a much rger sum has latterly been retained incthe country than was previously the case, the business and capital of the State having increased. We add, therefore, 75 per cent. to the above

Showing the probable production for the year 1852. \$80,150,000 By a former table, and estimates more definitely stated than this, we gave the probable production up to January 1, 1852, at 140.931.000

Showing an estimated production to 1st January, 1853, at \$221.081.000

HORRIBLE MURDER.—It become our painful duty to record a most atrocious murder committed upon one of our citizens. Last evening, between 8 and 9 o'clock, as Dr. G. W. Baskin was gring to his wo crock, as Dr. G. W. Baskin, was gring to hi dwelling, he was attacked by some persons un known, within a few rods of his door, and stabbed in the neck, cutting the jugular vein. From appear ances, he must have been knocked down with a lub first, and stabbed afterwards. He walked int his office, called for a light, and having obtained one took off his coat, and examined his wound, and al most immediately fell over and died. A peculia shaped howie knife was the instrument used. broke off in the wound, and the balance was foun on the spot. The knife will, doubiless, ultimatel lead to the detection of the murderer. The jury our paper as long as possible, and can wait for no new facts. The utmost excitement exists and the sympathy for the family and friends of the decease s universal and sincere .- Mercer Democrat, 2d.

LIQUOR LAW IS SWEDER. In Sweden, whose LIQUOR LAW IN SWEDER.—In Sweden, whoseer is found drunk is fined for the first offence three
dollars, for the second six, for the third or fourth
imprisonment is added to the fine and deprived of
the right of voting at the elections, or holding office, and also exposure in the church on Sunday.—
If the same individual is found committing the same offence a fifth time, he is imprisoned and condemned to hard labor. If a professor of religion, it is ed to hard labor. It a prolessor of religion, it is still more severe, and he is ent off from the shurch. An ecclesiastic who falls under the offence losses his benefice. It is strictly forbidden to give or sell spirituous liquors to students, servants or appren-tices. Whoever is found drunk in the streets or making a disturbance in a public house, is impris-oned and fined—one half the fine goes to the informer, the other half to the poor. Twice a year these ordinances are read aloud in the churches by the clergy, and every tavern keeper is bound to have a copy hung in the principle room in his house, un-der heavy fines. Under these regulations, scarce-ly a drunkard is to be found.

VESETABLES FOR THE LONDON MARKET .-- Th Voodstables for the Loring Market.—The London correspondent of the National Intelligencer, in a late letter says:—"The extent of the gardens round London, required to supply the two millions and a quarter of eaters there, will be hardly credited. Within a radius of fifteen miles of London, there are two hundred thousand acres of land in the hards of market wardeners all labring for in the hands of market gardeners, all laboring for the London market. Ten thousand loads of tur-nips, 100,000 sacks of peas, 20,000,000 heads of John Russell, (who was summoned from Pembroke celery, 40,000,000 cabbages, 1,000 tons of water Lodge, Richmond, by a special messenger,) the cresses, are said to be sold annually in Covent Garden market alone, to say nothing of the beets, onions, carrots, herbs of all kinds, &c., which are sold in immense quantities.

> STRULLER LAWSUIT.—Of the many novel causes for "going to law," among the most singular is a suit now pending in St. Louis. The parties are Charles Stewart, plaintiff, and John R. Flemming, defendant—and the origin of the suit, as we understand the circumstances, are as follows; Mr. Stewart announced his intention of being married to Mr. Flemming-which the latter treated as a jes To give assurance to the statement, Mr. Stewar To give assurance to the statement, Mr. Stewart offered to give Mr. Flemming a ten dollar vest if the latter would agree to pay the minister's fee.—
> The matter was agreed to, and the vest ordered and delivered to Mr. Flemming. Subsequently Mr. Stewart was married, and he paid the minister who officiated at the ceremony, \$25, which, on being demanded of Mr. Flemming, he refused to pay.— The suit was commenced to recover this an

> To BE HUNG.—Negro George, the property of Mr. James Roper, of this county, was tried at the recent term of our March Court and sentenced to be hung on Friday, the 20th day of May next, for an attempt upon the life of Mr. Howell Brown.— The attack was a most furious and unprovoked as sault, and the life of Mr. Brown was only saved by his own power of resistance. Public opinion cor-dially sustains the verdict of the Court, though it provides for the highest penalty know to our laws. The poor wretch seems to have but little conscious ness of the terrible fate which awaits him. He only about 20 years of age, and would have been entitled to his freedom at 28. The execution we presume of course, will be public, for the force of xample and as a terror to evil doers .- Spirit o

The Life Insurance Companies in England have recently undergone investigation by a Parliamentary Committee, in consequence of alleged abuses, and petitions that the companies might be placed on a more satisfactory footing. The dates are from Melbourne to the 3d of January, when the products of gold from the various diggings, according to the Melbourne Argus, amounted to \$100,000 ounces weekly, with that number of diggers of the state of the products of gold from the various diggings, according to the Melbourne Argus, amounted to \$100,000 ounces weekly, with that dollars, for the purpose of assisting in the erection of a cottage house, severally, to his corps of assistants aforesaid.

BREATHING WELL OF GREAT VALLEY .-- A letter to the Warren, Pa., Mail, dated Columbus, Pa., the 25th ult., gives a variety of scientific specula-tions concerning a celebrated natural curiosity, called "The Breathing well of Great Valley" which alternately exhibits the strange phenomenon of in-haling and exhaling the atmosphere. The writer haling and exhaling the atmosphere. The writer says that observation proves that the period of respiration in this well depends upon the variations in the weight of the atmosphere, which leads him to suppose that the aperture connects with a subterranean cavern at some distance.

LARGE SALE OF RAILBOAD IRON .- A sale of five thousand tons of railroad iron was made in New York on Thursday week by an agent of one of the York on Inursay week by an agent of one of the largest Welsh manufacturers at £9 per ton, cash, free on board in Wales. This brings the price here to about \$70 per ton. There has been a pause in the market for two or three weeks; but this is a new movement, and indicates that the prices of rails are to be kept up. The railroad iron produc-tion of this country is now about 75,000 tons per annum. The wants of the country this year, it is believed, will be 300,000 tons, and next year 400, 000, if the present prosperity of the country con

MOUNTAIN PASS .- A letter from Col. Miles, of the 3d Infantry, U. S. Army, to the Fort Smith, Ark. SEELETON FOUND .- While some workmen were clearing brush off the route for the railroad, about a mile and a half from Mt. Carmel, Schuylkill co. hey discovered the skeleton of a man, which, from its appearance had been lying there for five or ten years. After digging up the ground on which it lay, there was nothing to be found but pieces of an-old coat intertwined with small roots, a tew brass buttons and a whetstone, which led them to believe

he had been toully dealt with. RELEGADS IN VIRGINIA.—The Richmond Tim gives a statement showing that the total length of railroads authorized in that State is 2,405 miles, of which 1027 miles, including 251 miles of the Bal's timore and Ohio road, and 100 miles of the Central road have been completed. The Times says railroad now authorized to be constructed will b completed within the next five or six years. Vir ginia will then have a system of internal improvement of which any State in the Union might we

be proud. Grace Greenwood writes from Rome to the National Era as follows:- "I met on this night a son of Mrs. Hemans. He resembles somewhat th son of Mrs. Hemans. "Few Dix Androne Resion." "Few die and none resign," is the remarks attributed to Jefferson, in regard to officer-holders, tenacious at once of life and of their slutch upon the public treasury. A well-filled or is loath to leave the crib at which he has fattened so long. And an office-holder upon whom the idea of living without work has grown and grown, until it has become a chronic disease, cares not for change of administration, cares not for principle, is willing to swear to any platform, only treasury spoon and pap-bowl. A cat is said to have nine lives, and some snakes before you can kill them, must be cut up into small pieces, from the fang to the tip-top of the tail; but snakes and cats will die sometimes; a confirmed office-holder—never! He will die a thousand deaths, in the attempt to hold office, and still be alive and hungry. As to resigning, there is no such word in his "FEW DIE AND HONE RESIGN."-" Few die an attempt to hold office, and still be alive and nungry. As to resigning, there is no such word in his

CHERRY PECTORAL

For the rapid Cure of COUCHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

CONSUMPTION.

OF all the numerous medicines extant, (and some of them valuable) for the cure of pulmonary complaints, nothing have ever been tound which could compare in its effects with this preparation. Others cure sometimes, but at all times and in all diseases of the lungs? and throat where medicine can give relief, this will do it. It is pleasant to take, and perfectly safe in accordance with the directions. We do not advertise for the information of those who have tried it but those who have not. Families that have known its value will not be without it, and by its timely use, they are secure from the danserous consequences of Coughs and Colds which neglected, ripen into fatal consumption.

consumption.

The Diploma of the Massachusetts Institute was awarded to this preparation by the Board of Judges in September 1847; also, the Medals of the three great Institutes of Art, in this country; also the Diploma of the Ohio Institute at Cincinnati, has been given to the CHERRY PECTORAL, by their Government in consideration of its extraordinary excellence and unsefulness in curing affections of the Lungs and Throat.

excellence and unsefulness in curing affections of the Lungs and Throat.

Read the following opinion founded on the experience of the eminent Physicians of the Port and City of ST. JOHNS, May 8, 1851.

Dr. J.C. Ayer.—Five years trial of CHERRY PECTORAL in my practice, has proven what I foresaw from its composition, must be true, that it eradicates and cures the colds and coughs to which we, in this section, are peculiarly liable.

I think its equal has not yet been discovered, nor do I know how a better remady can be made for the disfempers of the Throat and Lungs.
