Silver's Plastic Paints, Cheap.
Durable and Protective Weather and Fire Proot. This Paint will stand any climate, without crack or blister hardens by exposure, thus making in time an enamel of stone, protecting wood from decay, and Iron and other metals from rust and correction.

The Paint differs from the so-called Minera Paints of the day, which are principally Ochres and Clays colored, and are entirely worthless. Silver's Plastic Paints are purely Metalic, con-

taining no Alumin or Clay.

They are levigated finely, mix readily with Linseed Oil, (without the trouble of grinding.) and flow under the brush as freely as the test White Lead.

These Paints excel all others in body or covering properties, one pound of which will cover as much surface, as two pounds of White Lead.
There are four natural colors, viz: Black or
Slate, Brown, Olive and Chocolate.
Directions.—This Paint flows readily under the

brush and its covering property is increased by using it mixed as thickly as possible with pure Linsced Oil; as the Paint is the lasting or protecting body and the Oil simply the medium or agent in spreading it.
We annex copies of two letters, one from the
President of the Philadelphia and Reading Railroad
Co., the other from a Gentleman, a well known

Office of the Phila and Reading Railroad Co.

Philad Iphia, May 3, 1852.

J. S. Silver, Eeq.

Dear Sir: We have used your "Plastic Paints" or more than a year, and for Painting Paints" or more than a year, and for Painting Bridges, Depots, &c., &c., we have found it quite equal to any paint we have used. In fact, we now give it a preference over all others we have tried

r such purposes. Yours Respectfully, (Signed,) JOHN TUCKER, President. Augusta, Ga., September 29, 1852. Steam Planing Mills.

Dear Sir: You ask me for my opinion of "Silver's Mineral Paints," which you have put on my Machine Shop and Planing Mill. I give you with pleasure my full and hearty recommendation of it as a preventive of Fire communicating from Chimneys, or from adjoining buildings. The Paint which you put on my roofs, has now become as hard as slate, and I feel as secure from Fire, in this direction, as is possible. A few weeks after the roofs had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers; the result was, that the portion uncov-ered was entirly consumed, while the painted part was apparently sound, though upon examination the wood was found to be charred; the Paint how-ever was firm and but little bistered. I consider

this as severe a test as your Paint can be put to, and under the circumstances I do not hesitate to commend it as an invaluable preventive against Fire.

Respectfully &c. Fire. Respectfully (Signea,) AMBROSE SPENCER FRENCH & RICHARDS.
