They are levigated finely, mix readily with Linseed Oil, (without the trouble of grinding,) and flow under the brush as freely as the best Whits Lead. These Paints excel all others in body or covering properties, one pound of which will cover as much surface, as two pounds of White Lead. There are four natural colors, viz: Black or Slate, Huown, Olive and Chocolate.

Philadelphia, May 3, 1852.

J. S. SILVER, Esq.

Dear Sir: We have used your "Plastic Paints" or more than a year, and for Painting Bridges, Depots, &c., &c., we have found it quite equal to any paint we have used. In fact, we how give it a preference over all others we have tried or such purposes. Yours Respectfully,

Dear Sir: You ask me for my opinion of "Silver's Mineral Paints," which you have put on my Machine Shop and Planing Mill. I give you with pleasure my full and hearty recommendation of it as a preventive of Fire communicating from Chimneys, or from adjoining buildings. The Paint which you put on my roofs, has now become as hard as state, and I feel as secure from Fire, in this direction, as is possible. A few weeks after the roofs had been painted, I made an experiment on two or three shingles by placing them in the fariance under the boilers; the result was, that the portion uncovered was entirly consumed, while the painted part was apparently sound, though upon examination the wood was found to be charred; the Paint however was firm and but little blistered, I consider this as severe a test as your Paint can be put to commend it as an invaluable preventive agains
Fire. Respectfully, &c.

Hair.—Among the many preparations for the growth of the Hair, this Golden Gloss takes the lead. Three reasons will be given why it is so universally used and preferred to all others.
