There are many purhaps, who have so trifled with their constitutions, that they think themselves beyond the reach of medicine. Let not even these despair. The Elixer deals with disease as it exists, without reference to cases, and will not only remove the reference to cases, and will not only remove the disorder itself, but rebuild the broken constitution. The derangements of the system, leading to nervous diseases, and the forms of nervous diseases, and the forms of nervous diseases, taself are so numerous that it would require a column to enumerate the maladies for which this preparation is a specific. A few, however may e enumerated, viz: nenralgia, tic dol heedache, incipient paralysis, hystoria, paipilation of the heart, spinal affections, muscular debility, tremors flatuletice, a pricking sensation in the flesh numbness, torpidity of the liver, mental depression, weakness of the will, indisposition to move, faintness after exercises, broken sleep and terrifying dreams, inability to remain in one place or position, weakness of the procreative organs, sexual incompetency, melancholy, monothana, fluor albus, sinking of the stomach, female irrefularities, a chronic tendency to miscarriage, ciation, and all complaints growing out of a free indulgence of the passions and all barrenness that does not proceed from organic causes beyond the

reach of medicine...
Whenever the organs to be acted upon are tree rom mallormation or strictural diseases, it is averred that Morse's invigorating Effair will replace
weakness with strength, incapacity with efficiency,
irregularity with uniform and natural activity, and
this not only without hazard of reaction, but with a happy effect on the general organization. Beer in mind that all maladies, wherever they begin, finish with the nervous system, and that the paralization of the nerves of motion and sensation is physical death. Bear in mind also, that for every kind of hervous disease the Elixer Cordial is the only reli-

able preparation known

CURE OF NERVOUS DISEASES.—No language convey an adequate idea di the immediate and almost miraculous change which it occusions in the disedsed, debintated and shattered nervous system, whether broken down by excess, weak by nature, or impaired by sickness, the unstrung an relaxed organization is at once braced, re-vivified relaxed organization is at once the relative transfer and built up. The mental and physical symbtoms of nervous disease vanish altogether under its influence. Nor is the effect temporary; on the contrary, the relief is permanent, for the corduit properties of the medicine reach the constitution itself, and restore to its nominal condition. Well may the preparation be called the medicinal wonder of the nineteenth century. It is, as the first scientific man in the world would have admitted, that mirra-

A GREAT MEDICINE FOR FEMALES.—The unparallelled effects of this great restorative in all complaints incident to Females, mark a new era in the annals of medicine. Thousands of stimu-lants have been invented—thousands of invigorants concocted—all purporting to be specified in the various diseases and derangements to which the delicate formation of woman render her liable.-The result has heretofore been uniform. nostrums have indeed imparted a momentary vi-vacity to the norvous system, a transient and delu-sive vigor to the muscles; but this flash of rel et has been succeeded by a depression and prostation greater than before, and the end has too often been utterly to paralyze the recuperative power, by the nerves, and the vital organization, and finally to destroy the unhappy patient.
