Opening of the Trade of Japan. By a late arrival at San Francisco from China the particulars were received of the opening of the trade of Japan. The San Francisco Herald says : The reported opening of the ports of Japan to the commerce of the world is confirmed by the -China Mail, but it seems the Russians have got ahead of PERRY, and stolen his thunder. The Mail

"We have very important intelligence from Ja-pan, to the effect that the country will shortly be opened to the commerce of the world. The visit of Commodore PEREX, in July lest as doubt nodore PERRY, in July last, no doubt has tened the event, which his return would probably have accomplished; but the actual achievement i ie to the Russians, not to the Americans. While Commodore PERBY deemed it the wisest course after delivering the letter of the President of the United States in due form at Uraga, to allow six months to elapse betore requiring an answer, Ad-miral PowTIATINE, without dictating the place where he should hold intercourse with the Japan ese authorities, went as directed to Nangasaki, and succeeded in negotiating, apparently without any sacrifice of national dignity, and with the sort of success which the world was more prepared to expect from the practical republic than from the Russian autocrat

According to the information we have received from an authentic source, some time after the Rus sian Admiral had intimated his presence and ob ects at Nangasaki, two high officers arrived, and entertaining him at a feast on shore, entered upor the objects of the visit in a friendly and even cor dial manuer. In substance they stated very candidly that the Japanese Government, seeing the earnest desire of foreign nations to hold intercourse with them, and their own people being anxious t trade, it had been resolved to open the commerce of Japan to all nations. In this spirit, all the ports of Japan, might at once be considered as accessible to foreign vessels requiring to refit, or take in supplies of wood and water; but, to avoid distur bancè, the crews must not be allowed to land. This, however, is only confirming what foreigners have already enjoyed, without always fairly ac knowledging it. With regard to commercial intercourse, the Ja-

panese officers stated, that after centuries of seclus on, some preparation was necessary, and a year therefore elapse before any treaty or privi-o trade could come into operation. We have lege to trade could come into operation no doubt as to the accuracy of this information, and are fu rther inclined to believe that a similar result might have been effected long ago by Great Britain, it she had been fortunate enough to have entrusted her interests in this part of the globe to

any one who did not look steadily and excit to his own fortunes, and to obtain honors without eserving them." The statement in the above in regard to the

Russians being the first to negotiate with the Japanese powers. we learn, since putting it in type is not correct, but that Commodore Perry was the

person who effected the arrangement first, and that he had been highly successful in his expedition in every respect. Commodore Perry will not return until he has surveyed ports in Japan suitable for

commerce. He is expected in about two months. STATE CENTRAL COMMITTEE .- The Democra
