The Paint which you put on my roofs, has now become as hard as slate, and I feel as secure from Fire, in this direc-

tion, as is possible. A few weeks after the rools had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers; the result was, that the portion uncov-ered was entirly consumed, while the painted part was apparently sound, though upon examinatio the wood was found to be charred; the Paint how ever was firm and but little blistered. I consider this as severe a test as your Paint can be put to, and under the circumstances I do not hesitate to commend it as an invaluable preventive against Fire. Respectfully, &c.
