A Valuable Discovery.—EDWIN & JAMES M. A CLARKE'S Newly Patented Combined Grinding and Bolting or Merchant Flouring Mill. This valuable discovery is in constant operation at the Barrel Factory, on Duke street, a few steps from the railroad in this city, where hundreds are calling daily to witness its astonishing operations. The entire Mill, with its machinery complete, occupying a space but 21 feet long by 4 feet wide; and, within this small compass, converts the grain into extra and samperfine flour, fine flour, middlings, shipstuffs and bran; making at the same time the finest quality of flour, and as good a yield as can be obtained from mills costing from five to twenty thousand dollars. Any power is applicable to propel it, from a four horse power up to any other desired, it will grind, and that too on a 30 inch diameter burstone, two barrels of flour per hour with the utmost ease. This mill must, ere long supersede all other mills. It is emphatically adapted to the wants of community at large; can be placed in a room with other machinery, and the small space it occupies not be missed; can be hauled by a dray at a single load fromtone location to another; and only think of it, for the small sum of Five Hundred Dollars, every location throughout the United States can be furnished with a complete Merchant Mill, capable of making at least 2 barrels per hour; saving ast will from five to twenty thousand dollars worth of capital in the erection of a flouring mill, and at the same time this mill is adapted to all the small and large powers which are now running idle or in use.

Clarke, are now prepared to sell County and State rights and mills, and can be seen either at the above named place, where the mill is in constant operation, or at Clarke's Shoe Store, at the Railroad, on North Queen street, Lancaster city, Pa. We advise those who are so circumstanced to go into a speculation, to call and see this ingenious invention. Its success throughout the United States is certainly indismatable.

NEW IMPROVED FLOURING MILL.—I witnessed on Monday the 22d inst., at the Barrel Factory, in Lancaster, thepractical operation of Messra Edwin & James M. Clarkes advertised that they would on that day convert ten bushels of wheat into flour in one hour. There was quite a large crowd of millers and other gentiemen present—many thinking this rather a large story—the burrs being but 30 inches in diameter. Ten bushels being put into the hopper, at the request of the Messra Clarke, I timed the grinding of it, and in forty-one minutes by the watch, it was all through, and according to my judgment, it did its work well. I would also suggest that it is a simple character.

N compliance with the Act of Assembly of February, 1880, the undersigned submit the following Report of the Prison, for the year ending on the 31st day of December 1883, there were in confinement for the state of the Frison in 1884, for these the following were discharged during the year, viz:

The whole number committed to the Prison during the past year.

The whole number committed to the Prison during the year 1854, excepting the 80 sentenced, was 440; of which 192 were for drankenness, 29 for vagrancy, as per Table No. 1. In addition to which, there were sentenced during the same period, 80, and remaining in Prison on the 31st of December 1853, 61, making the above total in Prison in 1854, 681; as per Table No. 2.—

Table No. 3 shows how the 496 duscharged prisoners were disposed of, 7 being pardoned by the Governor, 3 sent to the House of Retuge, 4 to the Lancaster County Hospital, and one to the Insane Asylum at Harrisburg. Table No. 4, will show the various charges upon which the 80 convicts were sentenced. There was one convicted for seduction, 37 for larcency, against 21 the previous year, and 2 for trunshing fugor to intemperate persons after notice, a new offence created by the Act of 8th of May, 1854. Table No. 8, how often they have been convicted; two having been convicted the fifth time.—Table No. 10, shows the occupation of the convicts prior to their conviction; 44 in the 80 were without trades.—Table No. 10, shows the number that can read and write: 24 of the 80 could not read and 32 who could not write. Table No. 11, shows how many are married; 45 of the 80 being of medical cases treated compared with the preceding year; there were 50 more received in 1854 than in 1853, and 24 more remaining in Prison at the close of the former than at the close of the latter year. Table No. 14, shows the habits of the convicte; 39 of the 80 being of intemperate habits, 34 moderate drinkers and 7 of unknown habits, both temper to convicts are intemperate habits, and but 9 of the 23 colored convicts are intemperate habits, and

The Tables also show that the proportion of colored to white is 24 to 67. Among the convicts here is one white and one colored female. Notwithstanding the prevalence of an epidemic in the Hospital of the County, and at other places in the county, and the general unhealthiness of the past year, the health of the prisoners has been nearly as good as it was the preceding year. The number of cases treated was 111, that of the previous year 34; the former being in the ratio of 100 cases treated to every 523 prisoners, and the latter of 100 to every 547, being slightly unfavorable to the year 1851. Three prisoners died during the year; one of Pulmonary Consumption; one of Dropsy of the Pericardium, and one of injuries indicted during an attack of mania a polu. For details on this subject see Table No. 13, containing Physician's Report. There were no cases of invanity developed in the Prison during the year.

subject see Table No. 13, containing Physician's Report. There were no cases of insanity developed in the Prison during the year.

There were no manited during the past year, 29 persons for vagrancy, and 21 for disorderly conduct, and 192 for drunkenness; a decrease in vagrancy of 4, and an increase in disorderly conduct of 12, and in drunkenness of 12. The experience of another, year has amply confirmed the opinion which the Inspectors expressed in their last Annual Report, of the beneficial operation of the 5th section of the Act of March 21st, 1853, relating to vagrant, drunken and disorderly persons, in a moral as well as in a pecuniary point of view.

In the language of the 25th Annual Report of the Inspectors of the Eastern Penitentary, "It's believed that the time has passed when further argument is necessary to support the separate system as now administered in Pennsylvania, for so long as 'evil communications corrupt good mannies,' the associations of evil men places an almost insiperable obstacle to the moral improvement of those who are already corrupted. The separation of convicts removes that obstacle—is favorable to the exercise of serious redection gives vitally o conscience, and disposes the mind to retrieve the unhappy tailures of the past; and we feel assured that these combined influences will be operative in the future life of many, who while occupants of the Prison, may give no decisive evidences of present change."

The accompanying statements marked by the letter of the Aprish and contain much interesting information touching those subjects.

Statement A, shows that the orders issued by the Inspectors on the County Treasurer, from January 2d 1854, to January 1st 1855, both inclusive, amounted 19061 93

By reference to statement 0, it will be seen that the number of prisoners maintained the past year was 27, 341 days, which at 17 cents a day, amounted to \$4,656 69 whereas the number maintained the previous year was whereas the number maintained the previous year was but 20,552, which at 15 cents a day amounted to bu \$3,082 75, being an increase in maintenance the pass year over the preceding one of \$1,523 34. Over the increase of the number of prisoners the Board have in control, while the increase of 2 cents a day to the Keeper was rendered unavoidable by the great enhancement in the prices of all kinds of provisions and other necessarys of life. In view of this augmented expenditure for maintenance, the profitableness of the manufacturing and general economy of the managementare satisfactority established.

and general economy of the management are satisfactorily established.

Statements U. V. W. X. & Y. show the progress made in manufacturing in the Prison during the year. It appears these statements that there were made 11,679 yards of cartet for customers; 14,489 yards do. for sale; 1,981 yards Laucaster County Stripe; 400 yards Laucaster County Check; 7,763 yards bagging; 247½ dozen bags; 120 pairs of boots and shoes; 376,400 segars, and sundry other articles.

Three statements exhibit a very considerable increase in the manufacturing operations of the Prison of the past year over that of the year preceding, with a corresponding increase of the profits accruing therefrom to the Prison.

WHAT EVERY WOMAN SHOULD KNOW.

How often it happens, that the wife lingers from year to year in that pitiable condition as not even for one day to feel the happy and exhilarating influence incident to the enjoyment of health. THE BLOOMING BRIDE, But a few years ago in the flush of health and youth, but a rew years ago in the dubit of neath and journ, and buoyancy of spirits, rapidly, and apparently in-explicably, becomes a feeble, sickly, sallow, debilitated wife, with frame emaciated, nerves unstrung, spirits depressed, countenance bearing the impres of suffering, and an utter physical and mental protration, arising from ignorance of the simplest and plainest rules of health as connected with the murriage state, the violation of which entails disease, ering and misery, not only to the wife, but often

The remedy is by kngwing the causes and avoiding them, and knowing the remedies, and benefiting by them. These are pointed out in THE MARRIED WOMAN'S

PRIVATE MEDICAL COMPANION, BY DR. A. M. MAURICEAU, PROFESSOR OF DISEASES OF WOMEN. One Hundredth Edition, (500,000), 18mo., pp. 250. On Hamaratin Lattion, (2001,000), 15mo., pp. 200.

FIVE HUNDRED THOUSAND COPIES ONE HUNDRED THOUSAND SENT BY MAIL, attesting the high estimation in which it is held as a re-BOOK FOR EVERY FEMALE the author having devoted his exclusive attention to the treatment of complaints peculiar to females, in respect to which he is yearly consulted by thousands both in person and by letter.

Here every woman can discover, by comparing her own

symptoms with those described, the nature, character,

causes of, and the proper remedies for, her complaints. The wife about becoming a mother has often need of instruction and advice of the utmost importance to her future health, in respect to which her sensitiveness forbids consulting a medical gentleman, will find such instruction and advice, and also explain many symptoms which otherwise would occasion anxiety or alarm as all the peculiarities incident to her situation are described. How many are suffering from obstructions or irregularities peculiar to the female system, which undermine the health, the effects of which they are ignorant, and for which their delicacy forbids seeking medical advice. Many suffering from prolapsus uteri (falling of the womb), or from fluor allus (weakness, debility, &c.) Many are in constant agony for many months preceding confinement. Many have difficult if not dangerous deliveries, and slow and uncertain recoveries. Some whose lives are hazarded during such time, will each find in its pages the

means of prevention, amelioration and relief. It is of course impracticable to convey fully the various tended for the married or those contemplating marriage. Reader, are you a husband or a father? a wife or a mother? . Have you the sincere welfare of those you love at heart? Prove your sincerity, and lose no time in learning what causes interfere with their health and happiness not less than your own. It will aveid to you and yours, as it has to thousands, many a day of pain and anxiety, followed by sleepless nights, incapacitating the mind for its ordinary avocation, and exhausting those means for medical attendance, medicines and advertised nostrums which otherwise would provide for declining years, the infirmities of age and the proper education. your children.

In consequence of the universal popularity of the work, as evidenced by its extraordinary sale, various impositions have been attempted, as well on booksellers as on the public, by imitations of title page, spurious editions, and surreptitions infringements of congright, and other devices and deceptions, it has been found necessary, CAUTION THE PUBLIC to buy no book unless the words "Dr. A.
