Ombined Reaper and Mower.—Manny'
Patent with Wood's Improvement. I have manufactu
red and soid 165 of these Machines the past season, and
fuel warranted by the testimony of the Farmers that have
used them that it is the best combined Reaping and Mowing Machine now used. In all the trials which have been
with other machines either before committees or the public, they have proved the best Machines in the following
points, viz:

ic, they have proposed to the profits, vist.

The lightest draft.

The lenest cutter.

The ease and facility with which it can be removed from field to field and changed from a Reaper to a Mower.

The construction for strength and durability and its can be removed from the construction for strength and durability and its can be constructed from the construction for strength and durability and its can be constructed from the construction for strength and durability and its can be constructed from the construction of the c Pacity for doing business.

Sufficient proof can be produced that the above points belong to this Machine. It is capable of mowing and spreading from 10 to 15 acres of any kind of grass per day, with one man and a pair of horses, and cut from 15 to 20 with one man and a pair of norses, associated with one man and a pair of norses, associated at their works at Mount Joy, Lancaster county, Pa. Single Mower Siln,00, two sythes with extra sections and extra guards and pinion belong with each Machine.

To the authors of the following unsolicited testimonials, I hereby offer my grateful acknowledgments. WALTER A. WOOD,

Manufacturer and proprietor, October 1, 1855. Hoosick Falls, N. Y. EATON, Madison co.; July 14, 1854. W. A. Wood: Dear Sir.—I cannot express may approbation of your Mower in too strong terms. I never expected
to see a Mowing Machine cut grass as fast, as well, and as
easy, for both team and driver, as yours does. I can cut
one third more grass in a day with one-feam, and do the
work butter than any of my neighbors can with one of the
"only successful Mowers now known."

Respectfully yours.

ETNA. Tompkin. co., August 12, 1864.

Mr. Wood: Dear Sir:—I have been cutting lodged oats on the river flats, where——Mower had been tried and alied but yours worked to a charm. After finishing my naving, I took it sir miles, and run it to the satisfaction of all wh saw it work. I moved from half past ten o'clock, A. M., until twelve o'clock next day, and mowed I7 acres, and done it to the satisfaction of all present.

Yours,

VERONNES, VI. July 18. 1000.

W. A. Wood; Dear Sir:—Enclosed you will find a certificate of beposit to pay for the two Machines, the second one has not yet arrived.

I have farmers here every day to see mine work and in every instance it gives perfect satisfaction. I can sell 100 machines next year. I was offered \$150 00 for the machine you sent me. Truly yours.

Valuable Invention.—A rare chance is now of fered to business men to realize a fortune.

A new feature has been opened up in the manufacture of Flour, which must we think at once revolutionize he old process, and go into use all ower the land. By the furgenuity and skill or Edwin a Jardes M. Clark, they have brought about a complete Merchant Flouring Mill which is adapticable to the wants of the whole world, and which is applicable to every locality. By this invention, the montopoly of milling heretofore carried die by heavy capitalists is completely broken up, and a complete Merchant Flouring Mill which is the property of the property of the property of the property of the house of the hundred dollars. The consequence of which will be hundred and thousands of these Flouring Mills will be put in operation in all parts of the Union; it teling applicable to any power, from a four-horse up to any other idecised. It can be pieced in a room with other machinery, and the small space it occupies not to be missed—being only 21 feet long by 4 feet wide, embracing within this small compass all the machinery, and turning out two barrels of superfine Flour per hour. It is perfectly portable, a horse and dray, at a single load, being tapable of hauling it from one location to another; thus making it truly the mostival unbie discovery of the present age.

It can be seen in full operation at the Barrel Factory, on Duke street, a few steps north of the ltailroad, in the city of Lancaster. Fenn a. Valuable Invention.—A rare chance is now

of Lancaster. Penn a.

Lancaster, Ist month, 25th, 1355.

Having seen in operation Edwin & James M. Clarks newly patented combined drinding and Botting or Mechant Flouring, Mill, on the Ith inst., I and free to state, that I believe it to be a valuable improvement in the oversion of wheat into Flour, for several reasons:

1st. In the operation referred to, the Mill ground and bolted 3 bushels of wheat in 17 minutes, by the witch which I held in my hand, and making Flour of a superity of the milling and cleaning the brau about as well as is usually done by the common mills when doing grist work.

2d. The small space it occupies, and the comparatively small expense requisite to put up a Mill of that kind, after the power to propel it is obtained, strongly recommends it to the attention of those, about to erect a Flouring Mill.

3d. To those engaged in the milling business, I would respectfully say, that the improvement is well worthy their attention, from the fact that the mill referred to is capable of performing double or treble the work usually done in common grist mills, with less or no more power than they now use in their mills—and lastly, on a close inspectibn of the mills and its operation, I was assisted that it was capable of doing more work in the same time than which I saw done at the time referred to.

3 practical Millwright of 30 years' experience.

[ON FIRE PAPER, ETTRA BINDING, \$10.04]

A standard work of established reputation, found classed in the catalogues of the great trade sales in New York, philadelphia, and other cities, and sold by the principal booksellers in the United States. It was first published

booksellers in the builds time
in 1847, since which time
FIVE HUNDRED THOUSAND COPIES have been sold, of which there were upwards of ONE HUNDRED THOUSAND SENT BY MAIL, attesting the high estimation in which it is held as a re BOOK FOR EVERY FEMALE

the author having devoted his exclusive attention to the treatment of complaints peculiar to females, in respect to which he is yearly consulted by thousands both in person and by letter. Here every woman can discover, by comparing her own symptoms with those described, the nature, character, causes of, and the proper remedies for, her complaints.

The wife about becoming a mother has often need of instruction and advice of the utmost importance to her future health, in respect to which her sensitiveness forbids consulting a medical gentleman, will find such instruction and advice, and also explain many symptoms which otherwise would occasion anxiety or ainrm as all the peculiarities incident to her situation are described. How many are suffering from obstructions or irregular itles peculiar to the female system, which undermine the health, the effects of which they are ignorant, and for which their delicacy forbids seeking medical advice. Many suffering from prolapsus uteri (falling of the womb), or from fluor albus (weakness, debility, &c.) Many are in constant agony for many months preceding confinement. Many have difficult if not dangerous deliveries, and slow and uncertain recoveries. Some whose lives are hazarded during such time, will each find in its pages the means of prevention, amelioration and relief.

It is of course impracticable to convey fully the various subjects treated of, as they are of a nature strictly intended for the married or those contemplating marriage. Reader, are you a husband or a father? a wife or a mother? Have you the sincere welfare of those you love at heart? Prove your sincerity, and lose no time in learning what causes interfere with their health and happiness not less than your own. It will avoid to you and yours, as it has to thousands, many a day of pain and anxiety, followed by sleepless nights, incapacitating the mind for its ordinary avocation, and exhausting those means for medical attendance, medicines and advertised nostrums which otherwise would provide for declining years, the infirmittee of age and the proper education of your children.

In consequence of the universal popularity of the work, as syidenced by its extraordinary sale, various impositions have been attempted, as well on booksellers as on the public, by imitations of title range, spurious editions, and surreptitions infringements of copyright, and other derices and deceptions, it has been found necessary, therefore, it
