Every remedy tried, failed oven to relieve me, till I used your CEERRY PECTORAL—This has not only relieved me, but as I trust, wholly cured me. I care nothing for the reputation of Advocating Patent Medicines, and this is at your service. Testimony of the Professor of Obstetrics in Penu College, Philadelphia.—Dr. Hunter's Medical Manual.—The author of this work, unlike the majority of those who advertise to cure the disease of which it treats is a graduate of one of the best Colleges in the United Stetes. It affords me pleasure to re-commend him to the unfortunate, or to the victim of malpractice, as a successful and experienced practitioner, in whose honor and integrity they may place the greatest confidence.

In the treatment of Seminal weakness, or disarrangement of the function produced by self-abuse, or excess of venery, 1 do not know his superior in the profession. I have been acquainted with the Author some thirty years, and deem it no more than justice to him as well at kindness to the unfortunate victim of early indis-cretion, to recommend him as one in whose procretion, to recommend the asset in whose pro-fessional skill and integrity they may safely confide-themselves. ALFRED Woodward, M. D.

'This is without exception, the most compre-hensive and intelligent work published on the class of diseases of which it treats. Avoiding all technical terms, it addresses itself to the reason of its readers. It is free from all objectionable matter, and no parent, however fastidious, can object to placing it into the hands of his sons. The author has devoted many years to the treatment of the various complaints treated of, and, with too little various complaints treated of and, which impose, he has offered to the world, at the increly nominal price of 25 cents, the fruit of some twenty years' most successful practice."—Herald. The Paint which you put on my roofs, has now become as hard as slate, and I feel as secure from Fire, in this direction, as is possible. A few weeks after the roofs had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers; the result was, that the portion undevered was entirly consumed, while the painted part ever was firm and but little blistered.
