Here every woman can discover, by comparing her own symptoms with those described, the nature, character, causes of, and the proper remedies for, her complaints. The wife about becoming a mother has often need of instruction and advice of the utmost importance to her future health, in respect to which her sensitiveness for bids consulting a medical gentleman, will find such in struction and advice, and also explain many symptoms which otherwise would occasion anxiety or slarm as all How many are suffering from obstructions or irregular ities peculiar to the female system, which undermine the

The Greatest Medical Discovery of the Age.

Dr. KENNEDY, of Roxbury has discovered, in one of oucommon pasture weeds, a remedy that cores. EVERY KIND OF HUMOR,

from the worst Scrofula down to a common plumple.

He has tried it in over 1100 cases, and never failed except

possession over two hundred certificates of its virtue, all possession over two numbers continued to the within twenty miles of Boaton.

Reader, I peddled over a thousand bottles of this in the ricinity of Boson. I know the effect of it in every case.—
So sure as water will extinguish fire, so sure will this cure humor. I never sold a bottle of it, but that sold another; after a trial it always speak for itself. There are two things about this herb that appear to me surprising; first that it grows in our pastures, in some places quite plentiful, and yet its value has never been known until I discovered it in 1846—second that it should cure all kinds of humor.

discovered it in 1846—second that it should cure all kinds of humor.

In order to give some idea of the sudden rise, and great popularity of the discovery. I will state that in April, 1853, I peddled it and sold about six bottles per day—in April, 1854, I sold over one thousand bottles per day—in Xpril, 1854, I sold over one thousand bottles per day—of it.

Some of the wholesele Druggirts who have been in the business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it. There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for humors—but since its introduction as a general family medicine great and woutderful virtues have been found in it that I never suspected.

Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O, what a inercy if it prove effectual in all cases of that awful malady—there are but few who have seen more of it than I have.

A few weeks alter the roofs had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers; the result was, that the portion uncov-ered was entirly consumed, while the painted part was apparently sound, though upon examination the wood was found to be charred; the Paint how-ever was firm and but little blistered. Valuable Invention.—A, rare chance is now of fered to business men to realize a fortune.

A new feature has been opened up in the manufacture of Flour, which must we think at once revolutionize the old process, and go into use all over the land. By the ingenuity and skill of Edwin & James M. Clark, they have brought about a complete Merchant Flouring Mill which is applicable to every locality. By this invention, the monopoly of milling herefore carried on by heavy capitalists is completely broken up, and a complete Merchant Flouring Mill should be upon the monopoly of milling herefore carried on any person having a few hundred dollars. The consequence of which will behave the complete Merchant Flouring in the monopolity of milling the form of the Union; it being applicable to any power, from a four-horse up to any other desired. It can be placed in a room with other machinery, and the small space it occupies not to be missed—being only 2 feet wide, embracing within this small compass all the machinery, and turning out two barrels of superfine Flour per hour. It is perfectly portable, a horse and dray, at a single load, being capable of hauling it from one location to another; thus making it truly the most valuable discovery of the present age.

It can be seen in full operation at the Barrel Factory one. one because to another; thus making it truly the most val-uable discovery of the present age.

It can be seen in full operation at the Barrel Factory, on Duke street, a few steps north of the Railroad, in the city of Lancaster, Penn'a.

of Lancaster, Penn'a.

LANCASTER, 1st month, 20th, 1855.

Having seen in operation Edwin & James M. Clark's newly patented combined Grinding and Bolting or Merchant Flouring Mill, on the 17th inst., I am free to state, that I believe it to be a valuable improvement in the conversion of wheat into Flour, for several reasons:

1st. In the operation referred to, the Mill ground and bolted 3 bushels of wheat in 17 minutes, by the watch which I held in my hand, and making Flour of a superior quality, and cleaning the bran about as well as is usually done by the common mills when doing grist work.

2d. The small space it occupies, and the comparatively small expense requisite to put up a Mill of that kind, after the power to propel it is obtained, strongly recommends it to the attention of those about to erect a Flouring Mill.

3d. To those engaged in the milling business, I would respectfully say, that the improvement is well worthy their attention, from the fact that the mill referred to is capable of performing double or troble the work usually done in common grist mills, with less or no more power than they now use in their mills—and lastily, on a close inspection of the mills and its operation, I was; satisfied that it was capable of dolog more work in the same time than which I saw done at the time referred to 30 years's arreference.
