How often it happens, that the wife lingers from year to year in that piinble condition as not even for one day to feel the happy and exhilarating infla-ence invident to the enjoyment of health:

the author baving devoted his exclusive attention to the treatment of complaints peculiar to females, to respect to which lie is yearly consulted by thousands both in person and by letter.

Here every woman can discover, by comparing her own symptoms with those described, the nature, character, causes of, and the proper remedies for, her complaints. The wife about becoming a mother has often need of

instruction and advice of the utmost importance to her future health, in respect to which her sensitiveness for bids consulting a medical gentleman win und such fistruction and also explain many symptoms

which otherwise would occasion anxiety or alarm as all the peculiarities incident to her situation are described. How many are suffering from obstructions or irregular ities peculiar to the female system, which undermine the

health, the effects of which they are ignorant, and for which their delicacy forbids seeking medical advice. Many suffering from prolapsus stori (falling of the womb), or from fluor allows (weakness, debility, &c.) Many are constant agony for many months preceding confine-

ment. Many have difficult if not dangerous deliveries, and slow and uncertain recoveries. Some whose lives are hazerded during such time, will each find in its pages the

means of prevention, amelioration and relief. It is of course impracticable to convey fully the various

subjects treated of, as they are of a nature strictly intended for the married or those contemplating marriage.

Reader, are you a husband or a father? a wife or a mother? Have you the sincere welfare of those you love at heart? i'rove your sincerity, and lose no time in learning what causes interfere with their health and happiness not less than your own. It will avoid to you and yours, as it has to thousands, many a day of pain and anxiety, followed by sleepless nights, incapacitating the

mind for its ordinary avocation, and exhausting those means for medical attendance, medicines and advertised nestrums which otherwise would provide for declining

years, the intirmities of age and the proper education of your children. A
