THERE ARE NO TEARS IN HEAVEN. BY JOHN T. SWARTZ. I met a child ; his feet were bare ; His weak frame shivered with the cold His youthful brow was knit by care. His flashing eye his sorrow told. Said I, "Poor boy, why weepest thou" "My parents both are dead." he said : "I have not where to lay my head; O, I am lone and friendless now ! Not friendless, child: a friend on high For you his precious blood has given; Cheer up, and bid each tear be dry-"There are no tears in heaven. I saw a man in life's gay noon, Stand weeping o'er his young bride's hier "And must we part," he cried, "so soon!" As down his cheek there rolled a tear. "Heart-stricken one," said I, "weep not; "Weep not!" in accents will he cried. "But yesterday my loved one died, And shall she be so soon forgot? Forgotten! No! still let her love Sustain thy heart, with anguish riven; Strive thou to meet thy bride above,

both shudder. I know not what would. On me the new order bears with intolerable pressure. It rises before me like the ghost of Banquo at my every step in the pathway of duty.

I am a preacher. If I preach upon the

sancity of oaths, it regards itself insulted, and attacks me accordingly. If I preach to Christians to come out from the wicked. it insults me for assaulting know nothings. If I preach that the love of Christ is not bounded by State, it charges me with attacking the article of its creed against foreigners.

I am a teacher. If I teach that unlawful promises are not binding, I shall be charged with justifying the exposure of know nothing secrets. If I set the lesson to my pupils wherein J. B. Say says that every accession of a man to a country is an accession of treasure, I am to be published to the world as indoctrinating my pupils in anti-know nothing polities. As I am ever to be gored by this young mad bull, I had as well take it by the horn at once. Let the order keep its hands off me, the church, and the constitution, and I will never disturb it but when it creeps from its den, under the name of politics, with one arm around a Methodist preacher, and the other round them to me as united by triple oaths inindissoluble bands of wedlock, I shall not stop to inquire whether its name suits its character, or what the delicacies of my calling demand of me; but under my Christian impulses of horror, I will pronounce the union adulterous by the prior espousal of the one, and the utter prostitution of the other. I will warn the first, by the shade of Wesley, to return to hi first love ere his candle-stick be removed out of its place; and I will warn the other. by the shade of Washington, to repent and return to the principles of that great man, ere he make republicanism a stench m the nostrils of all true patriots. And if they heed me not, I will, with God's help, drive them out of the land, though it costs me my life to do it. HOW THEY MAKE GUNPOWDER.

Some twenty years ago, a young man, whom I shall name "Jamie," was pastor of large congregation of the Established Church of Scotland. At school and colege he was distinguished for his love and learning, and as a minister was unrivalled for his eloquence and mental attainments. He had been settled about a year and was upon the eve of being married to a fine oung woman, whom he had loved from childhood, when the heritors and several other English gentlemen, who were then on a visit to the North, attended Kirk to hear the famous preacher. He more than verified his fame; he enraptured his audieven when despair seemed to shroud it in final triumphs were each in turn presented and feeling that defy description. He stood there was one among his hearers who was

not bewildered by its glowing pictures. The gentle-hearted Bella, his betrothed, when the congregation dispersed followed him to the manse. He received her in his study, but while conducting her to a chair, she sank upon the floor and burst into tears. "O Jamie! Jamie!" she exclaimed, as he raised her tenderly in his arms, and scated her on a sofa, "ye hae broken my puir heart!" "How so, my Bella ? explain ?" 'Ye were drunk, raving drunk, Jamie, and wonder the elders did nae tak ye out o' the desperate demagogue, and introduces the pulpit! Ye whined and ranted, and higher than a man's head and topped only sometimes, God forgie me for saying so, I with a bunch of branches. I saw some thought I saw the Evil One standing beside you, laughing and clapping you on the shoulder. My puir brain reeled--I was mad and knew it-I am mad now-I canna live out this day-I feel my blood freeze —O, God, be merciful to me a sinner, and and save, my Jamie!" Her head reclined upon his bosom, she gazed upon him a moent, and expired in his arms.

He had preached his last sermon entreaties of a congregation who loved him
—no flattering offers of frace preferment, tendered by the gentry, could induce him

to resume his labors as minister. Five or six years passed, when the writer of this, who was his schoolfellow, accidentally met him in London. Jamie was then one of the principal teachers in a arge educational establishment and was of his character, as well as his varied learning and skill as a successful teacher. He

whiskey before entering the pulpit The norning before he preached the final sernon, he felt rather nervous, for he knew there would be strangers to hear him, and he took nearly two glasses. What he said, or how he conducted himself, no effort of memory could recall—the death of Bella alone had merged into itself the doings of that dreadful day. The compliments which he received sounded in his ears like satire and mockery, and the very name of liquor mpressed him with horror!

He left home and came to London, where he obtained a situation as a teacher; but everything appeared so black to him that he expressed fear he should, in some un-

guarded moment, destroy himself. His friend, ho was a sailor, suggested some active employment, that would call into play his physical faculties, and thus give his mind a spell, and ended by offering to procure him a place before the mast in a ship. "I like your suggestion," he said, "but dislike the sea." "Then turn "Then turn soldier and seek employment in India, where there is always plenty of fighting. "I will," he said, springing from his chair, when my engagement expires I will pur chase an Ensign commission. I wonder the thought never suggested itself to me for my ancestors, as far back as I can trace them, were soldiers. Better, far better, die on the field of battle than fall by one's

ter from my friends has since informed me that he had served in India under Lord Gough, and was promoted for his gallant conduct in three campaigns. He was present at the battles of Alma, Balaklava and Inkerman, and accounts state, was in good health, engaged in the siege of Sebastopol. He was still single; his "heart was dead to love!"-Boston Atlas.

Presence of Mind,—A lady was one evening sitting in her drawing room alone, when the ouly inmate of the house, a brother who had been betraying a tendendency to unsoundness of mind, entered with a carving-knife in his hand, and shutting the door, came up to her and said, "Margaret, an odd idea has occured to me. I wish to paint the head of John the Baptist, and I think yours might make an excellent study for it. So, if you please, I will cut off your head." looked at her brother's eye, and seeing no token of a jest, concluded that he meant to do as he said. There was an open window and a balcony by her side, with a street in front, but a moment satis-fied her that safety did not lie in that way. So, putting on a smiling countenance she said with the greatest apparent cordiality. "That is a strange idea, George; but would it not be a pity to spoil this pretty college to injure me : but these are days of new lace tippet I have got? I will just step to my room to put it off, and be Without with you again in half a minute." waiting to give him time to consider, she stepped lightly across the floor, and passed out. In another moment she was safe in her room, whence she easily gave alarm, and returned when the madman was secur-

This method of procuring the wood, gives a singular appearance in the country, for in many places alongside the roads or by the streams, may be seen old trunks, standing but little

While standing in one of the packing houses, and just as I had given a kick to a hundred pound keg of powder, intended for his excellency Santa Anna, Mr. Dunont called to a man to bring him some powder in a scoop shovel, and therein inspected about a half peck of powder, destined to knock out of this world some enemy of his said excellency. The unconcern with which this was handed me as though it were but so much wheat struck me as remarkable. I would not convey this idea, that carelessness is customary or allowed, nor was the incident above mentioned a careless act, its noticable feature arising, rather from the bent of my own mind. ---FAT MAN.—There is something cordial about a fat man. Everybody likes him, and he likes everybody. Your Ishmaelites are, in truth, a bareboned race: a lank tribe they are, skeleton and bile. Food does a fat man good; it clings to him; it fructifies on him; he swells nobly out; and fills a generous space in life. He is a living, minister of gratitude to the earth, and the fullness thereof; an incarnate testimony against the vanities of care; a radiant manifestation of the wisdom of good humor. A fat man, therefore, almost in virtue of being a fat man, is, per se, a popular man, and commonly he deserves his popularity. In a crowded vehicle, the fattest man will ever be most ready to make room. Indeed he seems to be half sorry for his size, less it be in the way of others; but others would not have him less than he is, for his humanity is usually commensurate with his bulk. A fat man has abundance of rich juices. The hinges of his system are well oiled; the springs of his being are noiseless; and so he goes on his way rejoicing, in full contentment and placidity. A fat man feels his position in the world; knows that he has a marked place in the universe, and that he need take no extra pains to advertise mankind that he is among them; he knows that he is in no danger of being overlooked. It does really take a deal of wrong to make one really hate a fat man; as we should be, christian charity should take into account the force of prejudice which we have to overcome against his thinness. A fat man is nearest to that most perfect of figures, a mathematical sphere; a thin man to that most limited of conceivable dimensions, a simple line. A fat man is a being of harmonious volume, and holds a relation to the material universe in every direction; a thin man is nothing but length; a thin man, in fact, is but the continuation of a point. Lecture of Henry Giles.

On their arrival they are to put up at the St. Nicholas Hotel, the exclusive use of which has been hired for the occasion, for the sum ities to continue four days. The bride is understood to be the daughter of Judge Concklin, formerly Judge of the Northern district of the State of New York, but more recently appointed Minister to Mexico, and whose successor to the first named post is Judge Hall, formerly Postmaster General.

The marriage ceremonies are to take place at the St. Nicholas, and we understand that two thousand invitations have already been issued. The religious rites are to be most imposing, and the attending festivities are to be on a scale of the most profuse magnificence, and will include balls, ancy dress and masquerade, private concerts, and dinners and suppers the most recherche. Young New York, male and female, are destined to be in a state of tremendous excitement shortly. The happy ouple will find that the number of their riends will multiply with fearful rapidity, intil such time as the wedding festivities are over, when things will relapse into their former state. Such of our fashionable friends as will not receive an invitatiou to the wedding, must endeavor to possess their souls with patience, and keep as cool as the weather will permit. -N. Y. Herald.

How to Cook Potatoes .- Potatoes at this season are very poor eating, unless rightly cooked, and not one in a hundred knows how to do that. Treated as in the fall and winter, they come upon the table watery, solid, and every way disagreeable. Too Anxious BY-HALF .- An amusing affair happened lately between a coal dealer and a purchaser. The latter was very anxious to see that the former did not cheat him; so he (the purchaser) inspected the weighing of the coal himself, and felt perfectly satisfied that he got his full allowance, without any desire on the part of the coal dealer to "shave." However, while the coal was weighing, the driver of the team could not help laughing, aware, at the time, that the purchaser was particular about his full weight of coal. The purchaser, noticing the laughing of the driver, asked him, when he received his coal, what it was all about: so the driver told him: "Why," said he, "when your coal was weighing you were standing on the scales, and was weighed with it." "Is it possible Why, I weigh nearly two hundred pounds!" "Well sir, said the driver, "you are sold." "Yes," was the reply, and I have bought myself, too."

Ayer's PHIs.—A new and sinteres of the cure of all Billions diseases—Costiveness. Indigestion, Jaun dier. Brops, Ikheumatism. Fewers, that, Itamors, Norvusness. Irritability, Indianmations, Headache, Pains in the Head, Sile. Back and Limbs. Female complaints. &c., &c. Indeed, very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harhiless but effectual Cathartic wore more freely used. No person can feel well while a costive habit of body prevails, beddes it soon generates sodious and often fatal diseases, which might have been avioleted, by the timely and judicious used a good purgative. This is atike true of Colda Cererisk symptoms, and Billions deranzements. They all cond to become or produced the deep seated and formidable distempers which load the heiress all over the land. Hence a reliable family physic is of the first importance to the public health, and this pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors and Patients, has shown results surpassing anything biliherto known of any medicine. Cures have occa, affected beyond belled, were they not substantiated by persons of such exalted position and character as it forthold the suspicion of untruth.

Did space permit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more convincing that the certificates of these eminent public moneys shown in their effects upon trial.

these eniment public men is shown in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical sci-que can afford. They are compounded not of the drues themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process, in a siste of purity and combined together in such a manner as to is since the best results.—This system of composition for medicines has been found in the Cherry P. ctoral and Pills, both to groduce a more efficient remedy than their hiterto been obtained by any process. The reason is perfectly obvious. While by the old mode of compositions every metricine is buildened with more or loss of accimulations and representative descriptions of each substance complexed are left builded, the curative virtues and place the first state of more powerful antitude to disease than and the prika surrer, more powerful antitude to disease than and the surrer more powerful antitude to disease than any experimental medicine should.
