The Crops of the West—Louisville Riots—Gov.

**Reeder's Removal—Public Sentiment—The Late Elections—Pacific Railroad—O. & M. R.

**K.—Cholera on the Plains, &c., &c.

Sr. Louis, August 13, 1855.

We are in receipt of intelligence of the harvest from all quarters of the West and South, and all concur in the general opinion that the crops of the West and Southern States will produce a much greater yield than in any previous year. Indeed, there will be a superabundance of grain of every kind. The wheat is of a most superior quality, as is also the other grain, but fears are entertained that the recent heavy and continuous rains, have done much damage to the grain already cut—in some sections much of it has aiready began to sprout. There is no estimating the corn crop as in former years, but the question is now many millions of bushels will the great West produce? Our advices in relation to corn are such as to leave in doubt but that there will be a great surplus raised in the West, and that the price will fail to a very low standard. Corn is now setting in our market at 65a87 per bushel, and on the Upper Missussippi river—in lows and Northern Illinois—it is offered at from 30 to 40e, and the supposition is, that when the new crop is gathered, 15 and 20g there will find a dull market.

Outs; also, are in great abundance, as well as barley and rye—but the two latter articles are quite scarce in our market at proposition is, that when the new crop is gathered, 15 and 20g there will find a dull market. The potato crop promises well-mew are bought in this market at 400 per bushel for the latter. The potato crop promises well-mew are bought in this market at 400 per bushel. There is any quantity of may in all sections of the West. Peacnes, and that generally, is pleaty.

The externation will legation will be divided. One hundred would be legated that the price of the past will remeated by a respectable majority. In the Mobile Democratic candidate for Governor, would be legated by a respectable majority. In the Benocrate

The exhorbitant high prices of the past winter and spring are at an end, and the poorer classes can congraturate themselves that the famine season is over, and plenty once more stares them in the face. Speculators, nowever, are still in the market endeavoring to keep up the prices, but the large receipts of grain, &c., roll in upon them from all quarters, and they must specify give way or be swamped in the avalanche that is last approaching.

Frour is now selling selling here at \$6,75a\$7; wheat 90c to \$1,20; pork \$1s per bul.; oats 36a3oc—a very great decline since my last date—in other articles no material change.

Mons. Goddard, the celebrated Aeronaut, who was reported to have died recently in New Orleans, has turned up again, and made an ascension from this city on catunday atternoon last, in company with his lady and two gentlemen of this city. It was a magnineent sight to see the four ascending into the air. Several thousand persons were on the ground. Mr. Ell ort, of Baltimore, is announced for an ascension on Wednesday next, when he intends to 'go up' on horseback.

We have very late intelligence from the Plains.—The cholera broke out to a tearful extent among the settlers at Fort Kiley. All who did not die, of which there were a great number, left panie-stricken. The post was entirely abandoned—except by one man, a Mr. J. O. Swayer, of this city, who kept his place, and took charge of all the public property, and declared that he would stay until relieved by a commissioned other or death. The sick were left to die and the dead to bury themselves. Mr. S. did his best to induce the settlers to remain and assist him in attending to the sick and burying the dead—ho offered them \$10 a grave if they would dig them, but all to no purpose—ne was left alone in the city of the dead. How many died is not as yet known. all to no purpose—he was lett alone in the city of the dead. How many died is not as yet known.— Major Ogden, U. S. A., is among the victims. It is reported that as many as forty had died in one day. Many St. Louisians were stationed there, and, as might be supposed, their friends and relatives here are much alarmed about their safety. Too much are much alarmed about their safety. Too much praise cannot be bestowed upon Mr. Swayer for the heroism displayed by him, with death staring him in the face, and should ne escape the pestilence, it ought to be acknowledged in some proper way by the Government

Another disgraceful Know-Nothing riot occurred at Louisville, Ky., on the day of the election, he which some twenty in thirty lives were lost, and several blocks of buildings burned to the ground, and many others for a down and riddled. It is a difficult matter to arrive at the fact of how the riot commenced, but it is evident that the Know-Nothings took possession of the polls at an early hour, and actually refused to allow many that right guaranteed them by the Constitution, of the electric franchise, because they saw it to cast their bancos in opposition to the dark lantern bullies who compose the Anti-Republican order of Know-Nothings. This, no doubt, was done for the sole purpose of creating a disturbance, whereby they would be enabled to elect their candidates by preventing their opponents from voting. For well these rumans knew that a man of either foreign or American birth would not submit to such conduct, and when a disturbance broke out their victory would be won at the polls. These men spit upon the Constitution of their country and seek the blood of their fellow men, because they imagine themselves the founders of the American Republic, but who are no more nor less than the vilest outcasts and debased rumans and murderers this country ever has been disgraced with. Who, but the most depraved and debased can connect themselves with this midnight order, and sanction and approve such outrages and disgraced with. Who, but the most depraved and debased can connect themselves with this midnight order, and sanction and approve such outrages and disgraced with. Who, but the most depraved and debased can connect themselves with this midnight order, and sanction and approve such outrages and disgraced with. Who, but the most depraved and new properties from the country since the notorious Ned Buntline ranned into lite and existence this mode of war upon the adopted citizens and the rights of the peop less go u to heaven and supplicate for mercy. The God of Nature shricks with horror from the scenes of their wholesale butchery; the heavens weep for suffering mankind, and the Sun retures to shed its radiant light upon the awful scenes and murderous wurst they make upon their fellow men. But in the dark and gloomy night, when penceable citizens are elumbering in their guiltless sleep, this band of butchers are prowling about seeking out whom they may devour, and like dastardly cowards plunge their bowie knives into the breast of the innocent and innofensive. The midnight hour is theirs. The darker the night the better for them their deeds are black and their acts ten-fold blacker and more damnable. They no doubt imagine they are acting the part of brave and heroic men when they steal up behind a poor unarmed Irishman or German and stab him to the heart before he is aware of the crime he has committed. In all the diabelical murders and human butcheries that we ever heard or read of, the Know-Nothing mode of crushing the adopted citizens is the most cowardly and dastardly. It is not only unworthy of an American spirit, and of a band of men professing to be Americans at heart, but unworthy the vilest reptile that creeps upon the face of the earth. Cowardly in their attack and cowardly in their enumission of all the murders they have committed in the last eighteen months. Where is there a Know-Nothing that has stood up like a true American and faced death as a hero would? Man to man upon the field is the American spirit, and he who would seek any other advantage is unworthy the name of an American.—But a thousand of these ruffians pursue a half dozen unarmed foreigners into some house, when their cowardly spirit leuds them the torch of the midnight incendiary, fire the building and shoot down in cold blood the poor wretches as they endeavor to escape the angry flames, only to meet—death in nonther form by a hundred Know Nothing bowie knives instantaneously plunged into his heart. This is the American spirit inculc ess go u to heaven and supplicate for mercy. Nod of Nature shricks with horror from the so

menticated into the know Nothing camps, in such manner of carrying on an American war upon our adopted citizens. Out upon such cowardly demagogues—run them beyond the borders of civilization by the blood hounds of the land, they are too despisable and contemptable; too mean and cowardly to be pursued by men with human hearts. pisable and cowardly to be pursued by men with human hearts.

The election at Louisville was but a mere farce—the Anti-Know Nothing party became disgusted and remained at their homes—giving the election and the credit of the riot to the editor of the Louisville Journal and his band of "Brothera." Every man who presented himself at the polls was obliged to give the K. N. signal or fall back without voting, and if he persisted he was borne away by the bullies and in persisted he was borne away by the bullies stationed around the polls. So it was nearly throughout the whole State, and the result of the election shows this fact. The K N's. as a matter of course have carried the State, but it is thought two or three Democratic Congressmen have been elected. The election in Kentuckywas not a fair test, and the general opinion is that had a fair and impartial election takenplace the Democrats would have swept the State. For sale by H. A. York on Wednesday, with news from Europe two days later. A report was gaining ground that General Simpson, commander of the English army at Sebastopol, was about to re-sign on account of ill health, and be succeeded by Lord Hardinge, but another report says that Pelissier has arranged the forces for an sault upon the Russian works: Caurobert to command the right column, Simpson the left and Pelissier the reserve. General Count Za-moyski, a distinguished Pole, has arrived in London by special invitation of the British owernment, to consult, it is supposed, on the Polish question. The French works at Sebastopol are so close to the abattis of the Malakoff that a man may throw a stone into it. There seems to be a doubt about the death of General Todleben, the Russian engineer, and some accounts state that he is recovering from his wounds. An earthquake occurred at Lyons on the afternoon of July 26th, which was also

felt at Valen e, on the Khine. At Lyons some houses were damaged, but no lives lost. The America arrived same day at Halifax from Liverpool, bringing news from Europe four days later than the Lebanon's advices. She brings a report that the bombardment of Sebastopol had been recommenced, and that preparations were making for a general assault. Schamyl, the Circassian chief, is not dead ye but has again descended from the mountain and threatened the Russians. Offers for the French loan amounted to 3,600,000 000 francs. Spain is said to have consented to send a con-tingent force to the Crimea, but the report is doubtful. In China the recent reverses of the

insurgents were but temporary checks. CRIME IN PHILADELPHIA .- The number of commisments to the Philadelphia county pris-on during the year which terminated on the 1st of July last was 11,305. The total discharges during the same period amounted to 11,242. The number remaining in prison or 11,242. The number remaining in prison on the 30th of June was 256. The total number of police officers is 917. The chief offences were assault and battery, abuse, breaches of the peace, intoxication, misdemeanor, largency and vagrancy. Included in the list are fifth murderers! This last item is well calculated

100_DR. CHEESEMAN'S PILLS FOR FEMALES.—The combinations of ingredients in these Pills is the result of a long and extensive practice; they are mild in their operation, and certain of restoring nature to its proper channel. In very instance have the Pills proved successful. The Pills invariably open those obstructions to which females are liable, and bring nature into its proper channel, whereby health is restored, and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless she is regular; and whenever an obstruction takes place, whether from exposure, cold, or any other cause, the general health begins immediately to decline, and the wint of such a remedy has been the cause of so many consumptions among young females. Headache, pains in the diet, palpitations of the heart, loathing of tood, and directly and the property of nature; and whenever that is the case, the pills will invariably remedy all those wills.

The Human Hair.—To minister to a penchant for "anturn waves" and "raven jresses," the brains of inventors have heretofore been called in requisition to little purpose; for although many oils, bains, dyes, and "specifics" have been the result of the incubation, they have not only proved to be valueless, but many of them positively injurious to the hair and scalp—being the inciplent of scald-head and various other painful and dangerous cutaneous disorders.

Upon Prof. O. J. Wood, of St. Louis, fortune has conferred the honor of having discovered a baisamic preparation, which not only promotes the growth and beautifies the liair in a high degree, but restores it when it is gone, or turns it back to its original color after it has become gray lastens it to the scalp, and effectually destroys such cutaneous cruptions as may have been engendered by the use of dyes, essential oils, and other injurious applications.—The many respectable testimonials which are offered in its above from every part of the country in which it has been introduced, leaves no loop for the sceptte to hang a d-abit on. The great demand for this article in the eastgen States, has induced the proprietors to establish a depot for its manufacture and sale in the city of New York. It is is st supplanting all other specifies for the Hair, and already enjors a popularity which no other has ever attain.

Prof. Wood,—Dear Sir:—I take pleasure in bearing vol-utary testimony to the excellence of your Hair Restora-ive. Three months ago my hair was very gray. It is low a dark brown, (the original color) smooth and glossy.

Bostox, March 20, 1894.

Prof. Wood,—Dear Sir:—Having become previously quite gray, I was induced, some six weeks since, to make trial of your Hair Restorative. I have used less than two bottles, but the gray hairs have all disappeared: and all though my hair has not fully attained its original color, yet the process of change is gradually going on, and I have great hopes that, in a short time, my hair will be as dark as formerly. I have also been much gratified at the healthy moisture and vigor of the hair, which, before, was harsh and dry, and it has cassed to come out as formerly.

Respectfully yours.

OLOBE.—MURRAY & STOEK would inform Directors, Teachers and others, that they have been appointed to furnish them in any quantity at the lowest prices.

That the use of the Globe is of great importance in teaching is so obvious that discussion is unnecessary, and we would only direct attention to the following decision of the State Superintendent on this point; It will be found in the Penn'a School Journal for the present month, under the head of "Monthly Decisions":

"School Apparatus:—Persons of sil ages, and especially children, learn and understand much more perfectly and permanently what they see, than what they acquire in any other way. The more extensively, therefore, black boards, maps, charts, models, globes, &c., are used in a school by a competent teacher, the more attractive and successful will be the school. These appliances are of vast importance to the efficient Teacher and the progress of the pupils—Though there is no royal road to knowledge, there is anotholour load to it; and the more the nature of things is exhibited in the course of teaching, the more rapid and thorough will be the progress of the pupil. It is therefore the earnest advice and injunction of the Department, that Directors make timely and adequate provision for the Schools in this respect. It is manifestly within the general line of their duty, as well as the express terms of the second division of the 23d section of the 13w.

All of these elementary and their combinations are given, with supple directions, arranged in a simple and compact form in the first three books of this series. Particular and specific directions are (for the first time) given to teachers, for uttering each elementary sound in the language. Suggestions are given for avoiding errors and acquiring a correct pro

The last three Readers of the series contain an elaborate but comprehensive treatise on Elecution in which the leading principles of good reading are simplified, and rule-deduced and illustrated by practical examples. In this treatise, the tones of the voice are analyzed, and the clements of expression requisite for the utterance of every sentiment is clearly described and explained. Each one is considered in an insuinted light and illustrated by appropriate exercises. It is next shown that these constituent elements are applied in combinations in every instance of chaste and impassioned requience, or correct and impressive reading. 'It is my firm conviction,' says an accomplished scholar, 'that the treatise on Elecution and principles of reading as illustrated and explained in these readers, will do more to excite the attention to the subject of language and reading, than any thing else that has yet made its appearance. The selections are excellent, and if merit be a recommendation or any criterion of success, those books are destined to be more accessiont, and parted of the Readers and goes with them and is based on their plant, teaching one thing at at time.

Tower's First Lossons in Language; or, Elements of English Grammar.—This little Book is made by elvinners, that they may feel their way understandingly, and become interested in what is considered sometimes dry study. The plan is simple, and the pupil may see the reason for each step and be led to think.

Pspepsia Bitters-No Humbug.—Prepared by Elder J. STAMM, Mount Joy, Lancaster county. Pa.—In the Providence of God I was afflicted with this dreadful disease, (Dyspepsia.) I tried various remedies, but to no effect, until 1 used these Bitters. Having now realized its happy effects for myself—also many others—and knowing that thousands are still suffering with Dyspepsia. I recommend it as a safe, and one of the best remedies for this dreadful disease (Dyspepsia.) Floor J. STAMM.

Elder J. Stamm:—Dear Sir—For more than one year I was afflicted with the ague. I made every effort to be reclieved, but I grew worse, until I used your BITTERS. I am happy to say, that after using several bottles, I was cured of the ague, and have enjoyed good health since.—I had no ague or dyspepsla since August last. I can recommend your BITTERS as a very good medicine, and perhaps one of the best remedies for the Ague and Dyspepsla. inasmuch as it purifies and strengthens the stomach, and gives health and tone to the whole system.

Yours with respect,

Bronchitis Cured.

Mount Joy, May, 1855.

I have been afflicted with sore throat for some time, which was called Bronchitis by physicians. They treated me with regular treatment, but still I found its relife.—
Your BiTFERS was recommended and when I commenced using it I felt my throat getting better: my appetite increased, and my food agreed better with me. I was encuraged to continue with the BITTERS and now can say these BITTERS cured me. I would recommend J. Stamm's BITTERS to the afflicted, for I am confident that my sore throat came from my disordered stomach. My advice is, try it for Bronchitis and Dyspepsia.

Elder J. STAMM:—I doem it an imperative duty to suffering humanity, to recommend the use of your Vegetable Dyspepsia BITTERS to the public as an invaluable remedy for that sorely distressing and extensively prevalent disease which its name addicates. Experience and observation compel me to speak of it in terms of the highest commendation. I was myself permanently cured by using about 6 bottles, though my stomach was so weak that it would retain nothing. I have known some of the most desperate and long standing cases to have been cured by it, and in no instance among the numerous cases that have come within the range of my knowledge, has its use failed to give immediate, and when persevered in, perpanent relief, I feel no hesitancy in pronouncing it an infallible remedy for Dyspepsia.
