IOWA CORRESPONDENCE.

DEBEQUE, Jan. 1st, 1856. MESSRS. EDITORS :-Since my last I have been traveling some in our State, taking observations re-specting the quality of the soil, its improvements, and character of the inhabitants, and I can say but little more than will tend to verify the states little more than will tend to verify the statement you have often noticed, viz: that the soil is of the most fertile formation, gently undulating, and has every advantage of timber and water to make the most desirable abodes for honest, industrious and en-terprisipg citizens. And this, I am most happy to observe, is the oharacter of the poople I notice in my travel of more than a hundred miles west of this City. The climate in these northern districts is but little celder, and much more uniform, than in the southern part of the State; consequently much healthier and more desirable foo homes. The tovernment lands of this District are nov nésizly disposed of, nothing remaining but a few scattered "forties," "eightics," or "fractional pieces," being "refuse lands." A slight conception for the demand of Iowa lands may be infered from the following facts: On the stips, (47 and 16) brought into market, in this dis-trict, from the Des Munnes, at the re-formation the lowa land districts, and at the of clowing for the side of the stime two thof of Silibury twp. On the 21th lit, George Bucher of Marietta, Lancaster of why the Sine Toth of Silibury twp. you have often noticed, viz: that the soil is of the

the lowa land districts, and at 4° clock A. M., there were about twenty persons standing, with shivering limbs, and almost frozen feet, upon the snowy pave-ment, at the door of the Land Office, notwithstand-ing they were well aware the office would not open becore 9 o'clock. A haf hour prior to the opening, the aggregate number was about five hundred. This number, of course, could not be satisfied in one day, hence there was great excitement and endeavors to be first in the office, and had it not been for certain arbitrary rules of the Register. Here might bays hear

His rules were of such a char-construction of the register, there might have been serious consequences. His rules were of such a char-tions, and receive their duplicates at some future time. There was about 200,000 acres applied for that day, and this evidently shows that the lands are either of superior quality, and just such as people withs to oultwate, or must have peculiar advantages for speculation—but my opinion is the former de-stription beiorngs to it. On the 24th uitt., settlers in quest of land, and "land snarks" made their resort to Decorrah district at the opening of the office which had been closed here for several weeks re-

As an act of justice to the author and publisher, Direct-ors and Teachers are respectfully requested to examine the "Common School Registee" before adopting any other. The reign of Rhilip the Second, embrading the last half of the sixteenth century, is one of the most important as well as interesting portions of our modern history. It is necessary to glance only at some of the principal exents.-The War of the Netherlands-the model, so to say, of our own glorious war of the Reign of St. John; the brilliant carser of Don John of Austria, the Berlo of Lepan-to; the Quixotic adventures of Don Schaffin of Portugal; the conquest of that by the Duke of Alba; Philip's union with Mary of England, and his wars with Elizabeth, with the stary of the Schafd, and his wars with Elizabeth, with the story of the lavincible Armada; the Inquisition, with its reain of wees the rebellion of the Moriscos, and the cruel manner in which it was arenged-these form some of the prominent topics in the foreground of the picture; which presents a crowd of subordinato details of great interest in regard to the character and court of Philip and the institu-tious of Spain--then in the painy days of her prosperity. The materials for this vast theme wore to be glathered from every part of Europe; and the author has for many years beon collecting them from the archives of different tapitals.
