spirits depressed, countenance bearing the impress
of suffering, and an utter physical and mental proetration, arising from ignorance of the simplest and
plainest rules of health as connected with the marriage state, the violation of which ontails disease,

Five to eight bottles will cure the worst case of scrofula.

A benefit is always experienced from the first bottle, and
a perfect cure is warranted when the above quantity is a perhect cure is warranted when the acove quantity is taken.
Resider, I peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in every case.—So sure as water will extinguish fire so sure will this cure humor. I never sold a bottle of it, but that sold another; after a trial it always speak for itself. There are two things about this herb that appear to mo surprising; first that it grows in our pastures, in some places quite plentiful, and yet its value has never been known until I discovered it in 1846—second that It should cure all kinds of humor.

In order to give some idea of the sudden rise, and great In order to give some idea of the sudden rise, and great popularity of the discovery. I will state that in April, 1955. I peddled it and sold about six bottles per day—in April, 1956. I sold over one thousand bottles per day—in Kome of the wholessle Druggirts who have been in the business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it. There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for humors—but since its introduction as a general family medicine great and wonderful virtues have been found in it that I never suspected.

PIDGWAY FARM AND AGRICULTURAL COMPANY—A Farm within the reach of every
Man. Pennsylvania Land. Twenty-seven thousand
acres of good land have deen purchased, with the intention of giving a Farm of twenty-dive Acres for each share,
payable by instalments of one dollar a week.

It is located in the county of Elk, where a junction will
soon be formed by four railroads, immediately connecting
it, with its great agricultural and coal recourses, with Erie,
Dunkirk, Buffalo, Bochester and all the cities on the Lakes.
Also a road leading directly to N. York, one directly from
this property to Philadelphis and informediate places, one
directly from this property to Philadelphis, and one directly
from this property connecting with the Western roads,
forming the grandest concentration of railroads upon any
one spot in Pennsylvania, tending at once to develop its
immense agricultural and coal resources. The soil is not
surpassed in richness by any in the State. It is divided—

It — Into farms or half shares of twolve and a half acres, at the price of \$100 psyable, in instalments of two dollars a month or by the week.

Besides this, there is a valuable saw mill upon the property, and one hundred and fifty lots in the thriving town of \$1. Mary's, which the subscribers get.

This originally formed part of a large tract, a great portion of which was settled by industrious and educated Germans, numbering some twenty-five hundred. They selected the land on account of its agricultural and mineral wealth, which alone is an indisputable oridence of the facts, as they are well known to be superior judges upon these subjects. They went there some twelve years ago, and they now have a thirving and beautiful settlement, which is laid off in regular rotations of fine farms. St. Mary's is the town of the settlement, and is rapidly increasing in population. It has hotels as good as any in the state—fine stores—a college, where the highest branches of education are taught, both literary and musical—saw mills, grist mills, coach manufactories, and wvery thing conceivable to, add wealth and prosperity to the place.—The land of the company surrounds this town, and all the improvements, thereby reaping the benefits, and presenting a splendid opportunity for selfement. Limestone abounds. This is both an evidence of the quality of the soil and a great fertilizer. At St. Mary's it sells at from ten to twelve cents a bashch, burnt.

The timber is of great value, and consists of Cherry, Ash, Chesnut, Pine, Oak and Hemlock, all of primeval growth, of great size, and towering from eighty to a hundred and twenty feet high. That which the stockholders do not want will be sold to the timber merchants, with conditions to cut it in a certain time. This will clear the land, and bring a large revenue into the treasury, which will go to the reduction of the price of the farms.

This explains its agricultural resources. But there is another consideration of equal, if not greater, importanc

the reduction of the price of the farms.

This explains its agricultural resources. But there is another consideration of equal, if not greater, importance, The land is one great bed of coal. Upon this property it is literally inexhaustible. By taking a glauce at the latest map, first at this locality, and then over the State, it will be found to possess the grandest feature of prosperty, improvement, and almost immediate development. It is superior to any other. It is the only place having the great concentration of railroads, by which New York, the Lakes, Philadelphia and Pittsburg are at its doors. There is no coal in New York, and on account of its northernly situation, it possesses the advantages of nearness. This is destined to become the Pottsville of that portion of the State. The prospect in the future for this place exceeds any that Pottsville ever had; and there, land which a few years ago was selling at five and ten dollars an acre, when the railroad opened its mines sold for from two to five hundred dollars an acre. These are facts. Those who are ignorant, ict them make inquiry. Improvement is still progressing. So arrive at the truth. Judge the future by the past, and then what will this land be? It is proper that reason should give the answer.

The Sunbury and Eris Railroad, of which Gov. Bigler is President, and which connects this land with the Lakes are Philadelphia and the Alberbary Yalley Railroad, of

that time the rallroads will be finished. That will be early enough for all practical purposes. The advantage of buying it before their completion is ordent. When that is done property will go up one hundred per cent.—Speculation in coal would at once run it up to such a price as would make it impossible to obtain for agricultural purposes. We now get it without paying the then improved price, and the stockholders will enjoy the rise.

A tract of about two thousand acres will be haid off at once, and ready by next Spring, in order that persons who wish to farm immediately can do so.

Friends and relatives, as well as those having more than one share can have their farms together.

An Improvement department will also be connected with the company. By this means, in order to accommodate those who are unable to give their personal attention to foncing or preparation, or desire to rent their properties out instead of residing there, arrangements can be made to place each farm in complete order, so as to be ready for

out instead of residing there, arrangements can be made to place each farm in complete order, so as to be ready for cultivation. After the farms have been all sold, stock-holders can have manure furnished, houses built and other work done upon credit, they securing the payment to the company within a reasenable time, so that a man in the first place receives a farm at the lowest possible price, and then is afforded every assistance in placing it under cross.

and then is afforded every assistance in placing it under crops.

These embrace the principal features, and an excellent opportunity is now offeren for a man to obtain a home for himself, his wife and children, either at the present or time to come. Many business men, Mechanics, and workingmen upon farms, who save several oblars a month, can, by thus uniting together, become freeholders, whilst they searcely miss the outlay, and at less exponse than the annual cost of tobacco or the next trilling luxuiries. A saving and purchase of this kind eat nothing, and constantly increase in value. In case of sickness or misfortune by which he is thrown out of employment, he has a home to go to, where he can always make a good living.—

A Lecture on Love, or a Private Advice to Married Ladies and Cantlemen.

A Lecture on Love, or a Private Advice to Marrical Ladies and Quathemen.
This is decidedly the most fascinating, interesting and really useful and practical work on Courtship, Matrimony, and the duties and delights of Marrical Life, that has ever seen issued from the American press. The artificial social system, which in so many instances prevents a union of hearts, and sacrifices in conventionalism the happiness and sparts, is throughly analysed and exposed. Every one who contemplates marriage, and wishes for an infallible guide in the selection of a partner for life, should purchase this great text book of connubint felicity.

Patent Ambrotypes.—The subscribers having purchased the exclusive right of Lancaster city, are now enabled to offer to the public a New STILE OF PICTULES. far exceedings, in beauty and durability, anything ever be fore made. These pictures are not reversed, (as diagnerreotypes areand may be seen in anylight. They also possess the rare property of being impersisable, being hermetically sealed between class plates, which is secured by Letters Patent, in the United States, Great Britain and France, and practised in Lancaster city by T. & W. CUMMINGS only, over Sprecher & Bro.'s New Store, North Queen St., Lancaster.

EXPLANATION.

The term AMBROTTPE, by which these Pictures are designated; is derived from the Greek word Ambridas, signifying indestructibility, permanency, &c. The Picture is taken upon plate glass, to which another plate of correstaken upon plate glass, to which another plate of corresponding size is secured with an indestructible cennent, by by which the picture will retain its original brilliancy for ages, it will not correde by acides, nor be injured by water or climate. It is bold in its effect, beautiful in tone, strpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against initiations made on single plates of ylazis, with the Slack varnish in immediate contact with the Picture—butch are not permanent, as the varnish must crack and Slack variable in immediate contact with the Picture.—
buch are not permanent, as the variable nust crack and
destroy the Picture.

AMBROTYPE STERESCOPES MUST BE SEEN,
to be appreciated—the relief being fully as perfect as life.
Citizens and Strangers are invited to call at the Ambrotype Gallery of the undersigued, and examine specimens,
before they procure Pictures elsewhere, as they are
assured of polite attention.
