Sr. Louis, Oct. 20, 1856. Monday lest was the opening day of the great Mississiphi Valley Pair held in this city. Early in the morning it raining, and continued throughout the day as a regular holliday, and all business was suspended but tanding the rain in torrents fell, the Pair was well attended. All the Military companies of the city were present. Tuesday was clear and cold, and an immense number of People visited the Pair Grounds. It would be useless in us to attempt to enumerate the different articles on exhibition, but let it suffice, that no such Fair has ever seen held in the West. The Amphitheatre was the most been held in the West. The Amphitheatre was the most prominent attraction; it is 340 feet in diameter, and all under roof; the inner circle is 250 feet in diameter; acound this are ranged, one above another, 16 seats; the circum darper of the lower tier is 700 feet; the highest is over danger—that they have heard this cry of danger—that they have heard this cry of danger. 1020 feet; around the whole is a prometade, 15 feet wide, ger to the Union; but there is no peril. None and the fifth of a mile in length; under this is another in 1820, none in 1833, none in 1850, and the promenade of the same dimensions; there are 80 booths under the promenade; in the inner circle, there is a pageda 45 feet high; the third story is used as a music stand; the pacificator, and announce that thrice he had and ornamented in the highest degree, and a magnificent if it never was in danger? But it was impole, 150 feet high runs through the centre, from the top of exhibition-handsomely put up stalls surround the ground, and much fine stock was exhibited. A neat little cottage for the accommodation of ladies stands in the centre of the Pair ground. Everything, indeed, is most beautiful, and the whole has been gotten up on the most magnificent scale. The amphiltheatre is capable of holding from 12,000 to 15,000 persons, and this building was daily filled to witness the speed of fine horses in the circle. It is not an uncom-mon thing to see 15,000 people in an open field, but to see that number comfortably seated, with their eyes fixed upon South are to be wholly disregarded. that number comfortably seated, with their eyes fixed upon one object—and sending up cheers that literally rend the "Beware, my countrymen, ere it is too late, air—is a very grand and unusual speciacle. Such a scene how you adopt these perilous counsels. It is an easy Friends of the Union, of all parties, our enematter to estimate numbers—25,000, 40,000, 60,000, &c., but mics are combined; they have fused, and under when you come to the actual count, careful estimates are their united efforts the pillars of the Union sometimes cut down one half, and in some instances two are rocking to their base, and we may have thirds. We do not think there were on the grounds at any assembled in November next for the last time one time over 20,000 people (the insjority of whom were ladies) though the estimate has been made at 50,000. We and time over 20,000 people (the inajority of whom were ladies) though the estimate has been made at 50,000. We common Union. The enemies of the Union think during the six days that 125,000 people visited the grounds. The most beautiful sight of all, was the immense that the Application of the Union have united, and why should we be separated?

The Democrats had a grand raily at the Court House on force, the friends of the Union can unite to The Bonicerats had a grand raily at the court flouse on Thursday night, and Mr. Polk (Governor elect.) Hon. J. S. tireen, Ex-tiov. Reynolds of Illinois, and John Hogan of this city addressed the masses. Mr. Hogan is an old line Whig, and was the last Whig candidate run for Mayor in this city. He made a powerful spech, and said he was not alonegin the position he had taken, and the assertion would be proved on the 4th day of November next—he was for Buchanan and Breckinriggs. He said he had been called a renegale, but when he inquired of such who they support. Buchanan and Becckinridge. He said he had been called a renegade, but when he inquired of such who they support first, and then settle, at some future election, ed, he found that they were the renegates—that they described the Whig party and had gone into Know Nothing lodges, and that he had not done. Fillmore, he said was a renegade—he descrited the Whig party, and he, John country, now in the agony of an approaching Hogan, had not; he was no renegade—the Whig party, it convulsion! Come, in the name of the consituation and of the Union, now subjected to imminent peril! Come in memory of the Democracy is all right here.

The Greatest Discovery of the Age.—It seldom occurs, that we notice, under any circumstances, patent medicines, restorative, or anything of the kind, for we have a prejudice against mest of them. But candor compels us to invite attention to the advertisement of Prof. Wood's Hair Restorative. We are too juvenile to require anything of the kind, but some instances of its use have come to our knowledge which almost assure us that it is a sovereign remedy against the hair becoming promaturely gray. It is not a "Hair Dye." but upon its application as directed, the effect is produced on the skin, which brings out the bright mal native colored hair, without stiffness, and gives it a glosyand natural appearance. We have seen persons who have used it, and they are much pleaseds with it.—Missouri Republican.

Trausers' Portable Older Mills.

These superior Cider Mills can still be furnished of improved construction and finish. Their Grinding apparatus is peculiar and gives them an advantage over all other Mills. By the action of two reciprocatine pistons the Apples are forced up against the teeth of a rapidly revolving cylinder and retained there till ground to a fine pulp, which of course yields more juice when subjected to pressure than if the pomace was coarse. The Screw Press has been groatly improved and strengthened since last year, and the whole frame is tightened by strong joint bolts. It is adapted either to hand or horse power, and can be worked by hand to the extent of six to eight barrels in a day.
