N EW PROCESS IN DENTISTRY.-NEW PROCESS IN DENTISTRY. CHEOPASTIC PROCESS of mounting ARTIFIC IAL TEETH, recently patented by Dr. BLANDY, formerly Frofessor in the Baltimore College of Dental Surgery, is cer-tainly one of the greatest discoveries of the present age and destined to work a great change in Mechauleal Dentistry. The undersigned being the first in the State to introduce this process into practice, and which has been attended with great success, feels no hesitation in recommending it as su-perior to any other method of mounting Artificial Teeth heretofore known—the casting of the plates having great dvantage over the common custom of "swaging." The same accuracy in fitting, perfect cleanliness, and durability connot be obtained by any other process.  EXPLANATION.

 The term AMBROTYPE, by which these Pictures are designated; is derived from the Greek word Ambrotos, signifying indestructibility, permanency, &c. The Picture is taken upon plate glass, to which another plate of corresponding size is secured with an indestructible cement, by by which the picture will retain its original brilliancy for ages; it will not corrode by acids, nor be injured by water or climate. It is bold in its effect, beautiful in tone, surpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against initiations made on single plates of glass, with the Shack variable in immediate contact with the Picture.— AMBROTYPE STERESCOPES MUST BE SEEN, to be appreciated—the relief being fully as perfect as life.
