Philadelphia alone. The practice of Dr. Hunter has long been, and still is, literally unbounded, but at the earnest solicitation of nu-mercus persons, he has been induced to extend the sphere of his professional usefulness to the community at large, through the medium of his "Medical Manual and Hand Book for the Afflicted." It is a volume that has received the unqualified recom-mendation of the first physicians in the laud, while many clergymen, fathers, mothers, philantropists and humanita-trans, have most freely extended the clerculation fa all quar-ters where its powerful teachings would be likely to be instrumental in the morel purification and physical heal-ing of multitudes otour people, among the young, volatile and indiscreet, otherwise the pride and flower of the nation. The author argues particularly, most strongly against every species of self deflement, and warns pursons and guardians, in searching terms, to guard the young of both soxes from the terrible consequences concomitant of their ignorance of physiological laws and extual impurities and irregularities, whether oxibilited by precelous sevelopment or arising from the vicious and corrupting examples of their school mates or otherw.se.
