twenty years convulsed the country and endangered the Union. This act involved great and fundamental principles, and if fairly car ried into effect will settle the question. Should the agitation again revive; should the people of the sister States be again estranged from each other with more than their former bitterness. this will arise from a cause, so far as the inter ests of Kansas are concerned, more trifling and insignificant than has ever stirred the elements of a great people into commotion. To the people of Kansas the only practical difference between admission or rejection, depends simply upon the fact whether they can them selves more speedily change the present Constitution if it does not accord with the will of the majority, or frame a second Constitution be submitted to Congress hereafter. Even if this were a question of mere expediency, and not of right, the small difference of time, one way or the other, is not of the least impor tance, when contrasted with the evils which must necessarily result to the whole country from a revival of the slavery agitation.

In considering this question, it should never be forgotten that in proportion to its insignificance, let the decision be what it may, so far as it may affect the few thousand inhabitants of Kansas, who have from the beginning, resisted the Constitution and the laws, for this very reason the rejection of the Constitution will be so much the more keenly felt by the people of fourteen States of this Union where slavery is recognized under the Constitution of the United

Again, the speedy admission of Kansas Union, would restore peace and into quiet the whole country. Already the affairs of this Territory have engrossed an undue pro-portion of public attention; they have sadly ffected the friendly relations of the people of the States with each other, and alarmed the fears of patriots for the safety of the Union. Kansas once admitted the excitement becomes localized and will soon die away for want of outside aliment; then every difficulty will be settled at the ballot box. Besides-and this is no trifling consideration-I shall then be enabled to withdraw the troops from Kansas and employ them in service where they are much needed. They have been kept there on the earnest importunity of Governor Walker, to maintain the existence of the Territorial winter, and the stock on hand is very light, not enough. Government and secure the execution of the laws. He considered that at least two thousand regular troops under the command of next summer if we do not soon have some cold weather-Gen. Harney were necessary for the purpose. | cold enough to freeze and fill our les houses. to keep down rebellion in Kansas. This which was to have been paid to him for a lecture, but on has involved a very heavy expense to the account of its delivery before some other association in that Government. Kansas once admitted, it is city before the day arrived, the Library Association declinbelieved there will no longer be any occasion there for troops of the United States.

I have thus performed my duty on this important question, under a deep sense of responsibility to God and my country. My Мy public life will terminate within a brief period; and I have no other object of earthly ambition than to leave my country in a neaceful and prosperous condition, and to live in the affec-

ions and respect of my countrymen. The dark and ominous clouds which now appear to be impending over the Union, conscientiously believe may be dissipated with honor to every portion of it, by the admission of Kansas during the present ession of Congress; whereas, if she should be rejected. I greatly fear that these clouds will become darker and more ominous than any which have ever yet threatened the Constitution and the Union

etticoat has found its way over the Alleghenies, across Commit the Mississippi, and into this city. We have been told that one was seen on Fourth street the other day, which created considerable excitement, but as our extreme modesty has always been an impediment to our future greatness and success, we covered our eyes until the "gay deceiver" rounded the nearest corner! We are shocked to learn that every day since its first appearance on Fourth street, that thoroughfars has been crowded daily, by both sexes, for a glimpse at the Red Petticout ! As we will probably learn more of this subject as we grow older and loss modest, we will further apprise you of the career of this stranger in our midst

A bill is now before our City Council which provides that from and after the expiration of the present term of the municipal officers hereafter named, whether appointed or elected, shall receive salaries at follows: The Mayor, \$2,500 per annum; the Comptroller, City Marshal and City Engineer, each \$2,000: The Auditor, Treasurer, Superin-tendent of Water Works, Recorder. Chief Engineer of Fire Department, and President of the Board of Assessors, each \$1,500; City Register, \$1,200, with one half the fees receiv-ed by said officers-the other one half to be paid to the Clerk of the Comptroller's office, Auditor's Clerk and City Conneellor, esch \$1,000: Clerks of the Boards of Aldermen and Delegates, each \$1,000; Sergeant at Arms, \$300; Har-bor Master, a commission of 3 per cent, on all monies by him collected and paid into the Treasury. A bill is now before our City Council which provides him collected and paid into the Treasury.

What will be the fate of this bill is yet to be seen. We are in favor of paying good salaries to good and faithful officers, but it is an undeniable fact that the more a man is paid, the less he expects to do-he who does the least is generally paid the most.

We have heard no talk in the past week, as regards canlittle excitement on the subject. ø

In Barton county, in this State, gold has been discovered. and several gentlemen have leased considerable quantities of land-15 miles from Greenfield-for the purpose of com mencing digging for gold in the spring. Very extensive are found there-excavations near tweive feet ep, and extending about a half a mile in length, and banks of dirt nearly as high as a man's head, with trees about as thick as a man's body growing in the banks. We are told that California miners have examined these old diggings, and say there is every appearance in the world of gold, save the shining gold itself-that quartz rock and black sand is found in abundance. When these old excavations were made, and by whom, is a profound mystery
