EXPLANATION. EXPLANATION. The term AMBROTYPE, by which these Pictures are designated; is derived from the Greek word Ambrode, sig-infying indestructibility, permanency, &c. The Picture is taken upon plate glass, to which another plate of corres-ponding size is secured with an indestructible cement, by by which the picture will retain its original brilliancy for ages; it will not corrode by acids, nor be injured by water or climate. It is bold in its effect, beautiful in tone, surpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against imitations made on single picture of glass, with the Slack variab in immediate contact with the Picture.— buch are not permanent, as the varnish must crack and destroy the Picture. AMBROTYPE STERESCOPES MUST BE SEEN, to he appreciated—the relief being fully as perfect as lila.
