Burghter Republicans to Kansas, for the cowardly actin murdering Jenkins, and will, in all probability, reaire no more "aid and comfort"-in the shape of funds-om his advisers in the Northern States; as a further nos of his cowardly moceedings will crush the party long before the campaign of 1860 shall have opened. The former countenance of this had man and his banditti, Black Republicans, has been the cause of the loss of any valuable lives, and an enormous expense to Govern-tent in removing the troops there to quiet a threatened ivil war, instigated and kept alive by Black Republican aspirants. We did not think that money and the promise of place, no matter to what amount, could induce Lane and his band of assassing to undertake such a work, but we have been mistaken, and somebody's pockets have beet bleeding" to keep up the Kansas excitement. We are now inclined to think that Lane has been thrown overard, and some other General will take the field, but at what price we are not prepared to say.

OLD GUARD. Yours, LETTERS ON CONSUMPTION.

SERIES CONTINUED BY DR. N. R. WOLFE.

LETTER XI.

To the Editor of the Missouri Democrat : SIE: The labor of conducting this series of letters has ppalling frequency and fatality of diseases of the chest a the United States, and I consider that I am fulfilling a public duty in contributing my mits towards making their symptoms and treatment familiar to the mass of the people, so that, early apprized of danger, they may address

homselves in time for relief. Dr. Sewell's last letter contained an explanation of the mode in which tubercles are deposited in the air-cells and ner air-tubes, namely : That any impediment to the free irculation of blood in air-cells by preventing the due conion of venous blood to arterial, is the immediate cause uch changes in the structure of a vital organ cannot occur without the system at large sympathizing, and sarious others become deranged often to such a degree, as the draw off the physician's attention from the real point of anger. Under the head of latent consumption, it has a stated that the complaint may proceed to the utmost isorganization of the lungs without cough or expectoraion being present. In such cases the prominent symptoms are derangements of some of the abdominal organs Dyspepsia is the most common, and in ignorance of the

true state of things, the efforts of, the physician are too often directed to removing the effect instead of the cause of deranged health. Many cases are treated for liver dis ase when large cavities in the lungs actually exist, and hectic and night sweats are excessive. It is only three weeks ago, since we were called to a patient, who stated that he had been treated, up to the time of our visit, for liver disease. The appearance of the patient, his emacia tion, his cough, excessive expectoration and sweating, indicated too surely phthisis as the enemy. On removing is clothing, we ware horrified to see the unhealed sores of tartar emetic ointment, and scarifications of cupping still recent over the region of the liver, showing that a frightful and inexcusuble mistake had been made as to the cabin ; the Secretary of State splitting wood, know his true state, we were obliged to tell him the molaucholy truth, that he was in the last stage of consump-tion, and that his life could not be prolonged beyond a few weeks. Diarrhoes often masks consumption; this is found among adults, but is still more common among hildren. The investing membrane of the lungs, called the pleura, is often the seat of chronic inflammation, and sater or matter is infused into the cavity, constituting hydrothorox, or empyema. The lung is sometimes perforted, so as to admit air into the plears, when a chronic lamination is set up with the same 'resul! as the preording; this is called pneumothorax. The larvax is often the seat of niceration, and completely masks the dis case in the lungs to a superficial observer. Such are some of the complications of phthisis, and are the result of the od imperfectly aerated in diseased lungs, circulating throughout the body, and by its impurity provoking dis ase in the different organs : this is often described by the term sympathy. It will not seem superfluous caution to warn the reader of the importance of paying watchful attention, and not to rest content with a superficial or instity formed pinion Few medical men possess any but the most superficial knowledge of the use of the stetho scope, and still fower are competent to give an opinion worth a rush in the earliest stages of consumption. For By this calamity it is said more than \$100,000 an opinion to be of any value, it can be so only after a careful and thorough examination. As usually conducted,

it is but an idle form, and would be a farce, but for the important stake at hazard. I have witnessed the exploration made through a creakng Starched shirt, or muslin collar, several folds of clothing, even through solid, old-fashioned corsets. Then to see the pemposity and parade of learning that this is done with, is enough to provoke a laugh or a tear. There is one unsolation, that these gentlemen could not discriminate any more, if they did examine en cuerpo. The knowledge of the stethoscore requires a study apart, a special devotion to it, and much experience in an hospital. So in formed, the practised stothoscopist distinguishes all the ounds of the lungs, healthy or diseased, as readily as a ner appreciates the condition of the notes of a plane A man who practices as physician, surgeon and acoucheur, and honestly and laboriously tries to master all branches of his profession, can never acquire a tithe of the proficiency in the use of the stethoscope, that he will attain who devotes himself specially to its use

Very respectfully, &c.,

"The alarm as to short crops in the west has in a great measure subsided. The crisis is past, and the worst fears are over. The wheat more in croaking than in reality. Our friends in Michigan says that their State has never pro duced so large a crop of wheat, so good in quality. The hay and oats crop will be very large, and as to the corn crop, a failure in this has never been known in the history of this country; a half crop will be quite as much as we shall want this year. A PICTURE TO BE SEEN TO BE APPRECIATED. -Holding office in Utah is no joke, and not very dignified, if this passage from the correspondence of the Tribune is as true as it is graphic :

" I have seen the Governor of the Territory walking gravely up the road toward his tent, carrying a piece of stove funnel under each arm ; I have seen the Chief Justice cutting the turf for a chimney, and punching the oxen which were drawing logs to build his plastering the walls of their hut with mud. Yesterday I saw one United States Commissioner, stripped to the buff and riding on horseback, piloting a wagon through a ford across the South Platte, which he had dis covered by wading, while the other Commissioner, having accomplished the passage, sat upon a corn sack on the opposite bank, mending his pantaloons. These pictures may con-vince you that the civil offices, at least, in connection with the Utah expedition, are not

Apr 23 ly 16 THE DINK ROCK OOK, COOK, THE STOVE FOR THE FARMER. The undersigned would ask the attention of Farmers and others to his newly patented WOOD AND COAL STOVES, called the 'Dinlarg Room Cook,' which possesses advanta-ges not found in any other. The oven is perhaps larger than that of any other stove, being 16 by 26 inches in tho clear, while its peculiar construction is such as to emit an nuusual degree of heat in a large room with a trifling con-sumption of fuel. For the Dining Room of the Farmer it supplies a want long felt, and for this purpose it was con-structed under the personal supervision of the undersigned. decl tr46 G. D. SPRECHER & BIO.

EVER CHANGING, YET EVER THE SAME .- The Burns, Bruises, Stiff Joints or Galds, Sprain, Pole Evil, and chameleon party are about to undergo a new Swellings upon Horses, it has no equal for Man or Beast transformation. A writer in the Trenton American details some of the facts as follows :

"It is very evident that the 'Opposition' snake is again about to change its skin. This has come to be a yearly operation with the Park, 12, writes, "that the horse was considered worth animal, and ceases longer to excite suprise. A month ago it was all 'Anti-Lecompton;' to-day it is all 'tariff.' With all its shameless treachery to principle, and all its change of tactics, it is the same dirty party of expedienoy, marshalled by the same wretched crew of place hunters.

"After owenty years of uninterrupted prosperity, the country finds itself in the midst of one of those business revulsions which are the inevitable consequences of extended trade and commerce, and which human laws are inade quate to prevent. The enemies of the Demooratic party, ever on the alert for political capital, are now proceeding to press this new element into their service. But will the country trust these restless and unprincipled chemers? Who stood higher in the old Whig party, as the advocates of a protective thriff, than Ashman of Mass., and Vinton of Ohio? And yet, only two years ago, these men, in conjunction with other leading men of the protective policy, organised themselves into a regular lobby association at Washing-ton, with the avowed object of admitting iron (the loudest interest for a high tariff) duty free ! They sent eleculars to all the mammoth inted hiro! Look at the revolutions of the whiskey dull at 2214c. A CRUEL MURDER .- A foul and diabolical myder was recently committed near Jessamin, Ky., under the following circumstances:

It stems that the murdered wife of Arnold had left him for his cruel treatment, and instituted a suit for divorce and alimony against him. He watched her one day as she went with another lady to pick strawberries, and followed her, demanding that the suit should be withdrawn. He then threatened to kill her, and drew a revolver. Horror-stricken, she promised to live with him again. He replied by telling her that she was lying, and immediately fired at her, the ball grazing

her temple. She sprang to him and begged for mercy. He refused. She then appealed to him for time to pray, and was allowed to pray for her husband, her children and herself. Arnold then grasped her with one arm, inexorable to all her supplications for mercy, fired at her three times, each ball taking effect in the head. The face was frightfully dis figured by the wounds and powder from the pistol. Not content with this the fiend pistol. Not content with this the field public in general three scores with a knife, and then piling brush upon it left the score. Meanwhile, the other woman who field told the story, and Arnold was pursued and arrested at his mother's house in the act of writing his will.
