NEW PROCESS IN DENTISTRY. CHEOPASTIC CHOCKSS of mounting ARTIFICIAL TEETH, ently patented by Dr. BLANDY, formerly dessor in the Baltimore College of Dental Surgery, is cer Provisor in the Baltimere Collac- of Bestal Surgary, is certainly one of the greatest discoveries of the present account declined to work a great change in Mechanical Dentistry.

The undersigned being the first in the State to introduce this process froe practice, and which has been attended with great success, feels no hesitation in recommendine it as superior to any other method of mounting Artificial Teeth hasylofter known—the casting of the plates having great advantage over the common custom of "swaging." The same accuracy in fitting, perfect cleanliness, and durability commo be obtained by any other process.

DATENT AMBROTYPES.—The subscribers having purchased the exclusive right of Lancaster city, are enabled to offer to the public a new style of Pictures, far exceeding, in beauty and durability any ever before made. These pictures are not reversed, as dazuerreo types are and may be seen in anylight. C.UMM INGS. only, over Sprecher & Brock Sow Store, North Queen st., Lancaster.

EXPLANATION.

The Picture is taken upon plate glass, to which another plate of corresponding size is secured with an indestructible cement, by which the picture will retain its original brilliancy for ages; it will not corrode by ards, nor be injured by water or climate. It is bodd in its effect, beautiful in tone, surpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against imitations made on single plates of glass, with the Slack varnish in immediate contact with the Picture.—buch are not permanent, as the varnish must crack and destroy the Picture.

**DEEVES' PATENT LEVER PEN."—
The subscribers would respectfully call the attention of their friends and the public generally, to this new Pen, which is constructed upon an entirely new principle. It has been the aim of the loventor to combine the stiff point of the pencil with the elasticity of the goose quilt, and the annexed certificates, by parties who have used the Pen, will show that he has succeeded.

Amount the advantages attained by this over all other Pens, are Among the advantages attained by this over all other Pens, are left. The nibs being stiff they act as a support to the hand, enabling the writer to use it with the same rapidity that he would a lead pencil.

2d. The manner in which the nibs are operated upon for the purpose of producing light and shade, is of such a nature that it is impossible for the nibs to lap over each other, or sick in the puper, thereby causing spattering and blotting as the ordinary elastic nibbed Pens are liable to do. We give but a few of the many certificates which we have in our hands, and respectfully invite the public to call and examine for themselves.

I consider "REEVE" PARENT LEVER PEN" the very best I have ever used. I can, in a given time, write one-third more with it than with any Pen I have ever used.

I have for some time past been using one of "REEVES" PATENT LEVER PENS." and consider it much better than any Metalic Pen I have ever used. It possesses more elasticity, and will produce a stroke of almost any thick ness, with greater regularity and without danger of strain cess, with greater regularity. elasticity, and wan posses, with greater regularity and without usages ing or getting out of order, than any Gold Pen I ever saw JOHN B. LIVINGSTON. Lancaster, May 14, 1858.

Having used one of "REEVES PATENT LEVER PENS" I am free to say it is far superior to anything in the Pen line I have ever used. With the same Pen the heaviest dash and the finest hair-stroke can be made at the will of the Pensman, and being constructed of such heavy material, the nib thereby being more firmly secured, it will wear longer and better than any other Pen now in use. Of Pens it is the Ultimatum.

TANCY FURS-FOR LADIES AND

JOHN FAREIRA & CO., No. 818 (new no.) MARKET STREET, ABOVE ELGHTH, PERLADELRHA—Importers, Manufacturers and Dealers in FARCY FURS, for Ladies and Children; also, Gent's Furs, Fur Collars and Gloves. The number of years that we have been engaged in the Furbusiness, and the general character of our Furs, both for quality and price is so generally known throughout the country, that we think it is not necessary for us to say anything more than that we have now opened our assortment of FURS, for the Fall and Winter Sales, of the larcest and most beautiful assortment that we have ever offered before to the public. Our Furs have all been Imported during the present season, when money was scarce and Furs much lower than at the present time, and have been manufactured by the most competent workmen; we are therefore determined to self them at such prices as will continue to give us the reputation we have borne for years, that is to self a good article for a very small profit.

Storekeepers, will do well to give us a call, as they will find the largest assortment by far to select from in the city, and at manufacturers prices.

A. JARRETT, OF THE N.W. EARNESS, TOTAL OR PARTIAL, ENTIRELY

DEMYNESS, TOTAL OR PARTIAL, ENTIRELY

DR. H. ENWOOD, Sn., bogs leave to call the attention of those suffering under a partial or total loss of the sense of hearing to the following facts: He treats diseases of the mid die and internal ear with medicated douches, such as is practised in the Infirmaries of Berlin, Lepisic, Brussols, Hamburg and Petersburg, and lately by the most distinguished London aurists, with the most wonderful success; indeed, it is the only method that has been universally successful,

The best proof of the efficacy of this treatment will be a reference to nearly nine hundred names, residents of the United States, Canada, New Brunswick and Nova Scotia, who have been restored to acute hearing, and not a single solitary case, to our knowledge, did we fail to effect either a partial or total restoration of the hearing, when our advice and instructions were faithfully and punctually adhered to. Many who could not hear the report of a pistol at arm's length, can now hear a watch beat at the distance of four feet. In cases of mucus accumulation in the Eustachian Tube and Tympanum, inflammation of the meutary membrane, nervous affections, diseases of the membrana tympani, called the "Drum," or whon the disease can be traced to the effects of fevers, or colds, the use of quinine or mecurial medicines, gatherings in the ears in chidhood, &c., this treatment stands pre ominent. When the anditory canal is dry and scaly, with little or no secretion, when the deafness is accompanied with noise in the ear, like failing of water, chirping of insects, ringing of belis. rusting of leaves, continued pulsations, a discharge of matter; or when stooping, a sensation is felt as if a a rush of blood to the lead had taken place; when the hearing is less acute in duil, bloudy weather, or when a cold has been takes, the method of treati
