The movements are new in construc-tion, and are pronounced by the highest authorities to be fauilizes in principle and quality, and have been proved by the most exacting test to be reliable and unfailing in ac-tion. These watches are manufactured entire from the crude material. in a single establishment, by connected and uniform processes—the manufactory being organized upon the same system that has been adopted in the pro-duction of the unequalled American fre-arms, which ena-bles us to produce a movement at one half the price of any foreign movement of the same quality, and we guarantee the perfect performance, for ten years, of every watch man-ulactured by us. All foreign watches are made by hand, the American watches being the only ones made by machinery upon a uniform system throughout. Nearly all hand-made watches deficities, and are continually getting out of order. In many parts of the country it is impossible to find good watch repairiers, and watch repairing is always uncertain and expensive. **PATENT AMBROTYPES.--The sub-**scribers having purchased the exclusive right of Lan-caster city, are anabled to offer to the public a new style of Pictures, far exceeding, in beauty and durability, any ever before made. These pictures are not reversed, as dazuerrec-types areand may be seen in gany light. They also possess the rare property of being IMPERIBIALE; being hermetically sealed between glass plates, which is secured by Letterre Patent, in the United States, Great Britain and France, and practised in Lauraster city by T. & W. CUMM INGS, only, our Sprecher & Bro's New Store. North Queen et., Lancaster.

Lancuster. EXPLANATION. The term AMBROTYPE, by which these Pictures are designated; is derived from the Greek word Aubrata, su-nifying indestructibility, permanency, &c. The Picture is taken upon plato glass, to which another plate of corres-ponding size is secured with an indestructible cement, by by which the picture will retain its original brilliancy for ages; it will not corrode by acids, nor be injured by water or climate. It is bold in its effect, beautiful in tone, surpasses any thing in the gradations of light and shade, and may be seen in any light. The publics are cautioned against imitations made on single plates of glass, with the black varnish in limmediate contact with the Picture.-Such are not permanent, as the varnish must crack and destroy the Picture. AMBIOTYPE STERESCOPES MUST BE SEEN, to be appreciated—the relief being fully as parfect as like. Citizens and Strangers are invited to call at the Ambro-type Gnilery of the undersigned, and examine specimens before they procure Pictures elsewhere, as they are insured of polite attention. sep 25 tF36 ANCASTER COUNTY EXCHANGE
