The Picture is taken upon plate glass, to which another plate of corresponding size is secured with an indestructible cement, by by which the picture will retain its original brilliancy for ages, it will not corrode by acids, nor be inquired by water or climate. It is bold in its effect, beautiful in tone, surpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against imitations made on single plates of glass, with the black varnish in immediate contact with the Picture.—Such are not permanent, as the varnish must crack and destroy the Picture. These symptoms, if allowed to go on—which this medicine invariably removes—soon follows LOSS OF POWER, FATUITY, AND EPILEPTIC FITS—in one of which the putient may expire. Who can say that these excesses are not frequently followed by those direful diseases—INSAN—ITY AND CONSUMPTION! The records of the INSANE ASY LUMS, and the melancholy deaths by CONSUMPTION, bear ample witness to the truth of these assertions. In Lunatic Asylums the most melancholy exhibition appears. The countenance is actually sodden and quite destitute—neither Mirth or Grief over visits it. Should a sound of the voice occur it is rarely articulate.

Reader, I peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in every casa.—So sure as water will extinguish fire, so sure will inits ouro humor. I never sold a bottle of it, but that sold another; after a trial it slways speaks for itself. There are two things about this bert that appear surprising; first, that it grows iff our pastures, in some places quite plentiful, and yet its value has never been known until discovered it in 1846—second, that it should cure all kinds of humor. In order to give some idea of the sudden rise, and great popularity of the discovery, I will state that in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day—in April, 1863, I peddled it and sold about six bottles per day of it.

Some of the wholesale Druggists who have been in the business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it. There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for humore—but since its introduction as a general family medicine, great and wonderful virtues have been found in it that I never suspected.

DEAFNESS, TOTAL OR PARTIAL, ENTIRELY
R E M O V E D

DR. H. ENWOD, SR., begs leave to call the attention o
those suffering under a partial or total loss of the sense of
hearing to the following facts: Hy treats discusses of the mid
die and internal ear with medicated douches, such as is
practised in the Infirmarles of Borlin, Lepisic, Brussels,
Hamburg and Petersburg, and lately by the most distinguished London aurists, with the most wonderful-success;
indeed, it is the only method that has been universally
successful. Hamburg and Petersburg, and Intely by the most distinguished London aurists, with the most wonderful-encess; indeed, it is the only method that has been universally successful.

The best proof of the efficacy of this treatment will be a reference to nearly vine hundred names, residents of the United States, Canada. New Brunswick and Nova Scotia, who have been reatried to satus hearing, and not a single solitary case, to our knowledge, did we fill to effect eithor a partial or total restoration of the hearing, when our advice and instructions were faithfully and punctually adhered to. Many who could not hear the report of a pistol at arm's length, can now hear a watch beat at the distance of four feet. In cases of mucus accumulation in the Eustachian Tube and Tympania, inflammation of the mucus membrane, nervous affections, diseases of the membrana tympani, called the "Drum," or when the disease can be traced to the effects of fevers, or colds, the use of quintine or mecurial medicines, gatherings in the case in chidinod, &c., this treatment stands pre-eminent. When the auditory canal is dry and scally, with little or no scarcition, when the deafness is accompanied with noise in the ear, like failing of water, chirping of finests, runging of bells, rusking of leaves, continued pulsations, a discharge of matter; or when stooping, a sensation is folt as if a a rule of blood to the head had taken place; when the heating is less acute in dull, cloudy weather, or when a cold las been taken, this method of treating the disease is infallible. In deaf and dumb cases my experience warrants me in saying that if the hearing was good at any time, much can be accomplished. In the deaf and dumb schools at Lepsic out of a class of fourteen, I succeeded in restoring four to soute hearing.

Dr. E. bege explicitly to state that in those cases he untakes, he guarantees a successful result—complete restoration of the sense, or such a marked improvement as will be perfectly satisfactory, if his remedies are faithfully applied and di
