We could not wish for finer or more seasonable weath On the afternoon of Thursday-St. Patrick's Day-it com nenced raining, as is usual on that day, and in the night snow fell covering the ground, and the following night it roze very hard, but not severe enough to kill the spronting buds. The rivers continue in good stage, and boats arrive and depart with good cargoes. Receipts of Produce are liberal, but no material change has taken place in the

Pike's Peak emigrants are beginning to arrive from all quarters, and our city will be the great outfitting point. The lowing items in regard to the Pike's Peak emigrants, we

find in the various country papers :

Four wagons and sixteen men passed through Rockford,
Illinois, on Thursday last, bound for Pike's Peak. A party of fifty lately started from Janesville, Wiscons or the gold mines, with a train of ten wagons. The Rockford (III.) Register, of Saturday last, publishes list of fifty-eight citizens of that place who are making oreparations to start to the new Western gold fields—these n addition to several who had already started.

The St. Joseph Journal of the 14th, says: The following named companies will be off for the mine to-day. These are the first thoroughly organized companies that have started this spring:

Butterworth's Company.—E. Butterworth and wife, Co is, Nye, and Kingston. This company has seven horse ne yoke of oxen, two cows and three wagons. Barker's Company—L. Barker, Capt. M. Barker, L. Sau ders, E. Burton, A. Peckham, C. Adams, L. Miller. Th company has two yoke of cattle, one cow and one wagon. The above companies are from Branch county, Mich.

Sturgess Company—J. Sturgess, Captain; L. Sturgess, O. Sturgess, D. Sparks, A. Porter, W. Needham, J. Girtan, fames Bradford, G. Parker, Wm. Akeos. This company has twelve yoke of cattle, five horses and five wagons. Pigeon Company—A. Hiesman, Captain, D. Hiesman, T. R. Wilcow, Jono. Dickson, James McKiver. This compan, as 3 yoke of cattle, two cows and one wagon. The last two companies are from St. Joseph county, Mich. They are now encamped in the lower part of town; and came in by the Hannibal and St. Joseph Raifroad.

In this city several parties are fitting out, and will start by the 1st of April, and leave the Missouri frontiers about he middle of the month-which we think quite early to

last. A man named James Hamilton married an interest ing and beautiful young girl some time since, very much against the wishes of her relatives and friends, and lately lamilton imagined that his wife wanted to leave him, and frequently endeavored to get up a quarrel, and on Wednesday renewed the quarrel, asking his wife if she desired to leave him; to which she replied that if he did not behave better towards her, she most certainly would, upon which remark, he drew a pistol and snapped a cap at her; finding hat it would not go off, he drew from his porket a second pistol, which was aimed at her breast, but luckily for her, threw up her arm and received the hall in her elbow, glancing from which into her body, causing a painful, but not dangerous wound. She ran, and he after her with a third istal determined on taking her life, but was prevented by riends interfering, when he pointed the pistol to his own reast, drawing the trigger, and receiving the ball himself staggering fell to the floor, and expired a few hours after Mrs. Hamilton is represented as a peac-able and prudent woman, and not given him the cause for his murderous attack upon her and self destruction of his own life. Her wounds are not considered dangerous, but it is believed The usual number of marderous attacks, robberies, etc. ave occurred during the week. Our Courts, and part larly the Recorder's Court, always find a full docket of all kinds of violation of the laws and peace of the city.

Local items are entirely forgotten in the heat of political excitement, which now pervades the minds of all our citiens-for Reform is needed in the city and county, and which the Democratic party will be called on to makeexcitement is running high.
On Monday evening last, the Democratic City Convention

convened in the Common Pleas Court Room. One hundred Delegates of the 4th Ward, was made chairman of the Conrention, it not being dreamed that Col. Bogy would be a candidate for Mayor in the Convention. Mr. Hiram Shaw candidate, and if nominated would most positively decline -that his private business was in such a situation as to require all his time and attention, but, would hearfily support the nominee whoever he might be After the organi ration, and when ready for the suggestion of candidates, the name of Gen. Frost, accompanied with a letter pledging himself to the Convention and the Democratic party, was submitted; next was that of Col Bogy-who wished to withdraw his name, but his friends would not listen to it.— Before the balloting commenced, Col. Bogy left the Convention. On the 1st ballot, out of 99 votes cast, Col. Bogy received 70 and Gen. Frost 29, when the nominaction was made unanimous amid tremendous applause. A Committee was appointed to wait upon Col. Bogy, and apprise him of ination. In a few minutes after he made his appearance on the stand, and in a brief, but eloquent speech, eccepted the honor confered upon him, although contrary to his desire and expectation—he had been selected as th standard bearer of the great Democratic party of St. Louis. He would speak to the people in every Ward in the city, going to and returning from Mexico.

A band of fifty two Seminoles, belonging tained not the slightest doubt—it should be no fault of to Wild Cat's people, who have been in Mexico

of great talent, energy and enterprise, and if elected will make the best Executive officer this city has ever had. He is a man of wealth and a large property holder—he is identified with the city, and will have an eye single to its future

prosperity and greatness.

A full and a good Democratic ticket was nominated, which has struck terror into the camp of the opposition.—
A grand mass Ratification Meeting comes off to-night, when the Democrats will turn out in their strength.

The Know Nothing Convention convened on Tuesday afternoon and nominated a "straight-out" Know Nothing ticket. The understanding was between the K. N's and Black Republicans, that this Convention was to nominate a man for Mayor that both parties could unite upon to beat the Democratic party; none, however, but the leaders centre. The Houston Tap and Brazoria were initiated or trusted with the secret. A Mr. Homes got up in the Convention, and proposed that the Convention adjourn to meet with the Black Republicans and at by those not in the secret, but explained himself by stating that to his own personal knowledge hundreds of the "Americaus" were going over to the National Democracy; and that it was the foolishness of folly to run three.

The Galveston News of the 15th learns tickets. A committee was appointed to consider the propriety of a fusion ticket—that committee not being in the secret, reported back to the Convention that they were the opposition to join them on the ticket they that day nominated. This report created great confusion amount the "knowing ones," and they went to work and nominaated a straight-out Know Nothing ticket-such a one that the Black Republicans cannot touch without forfeiting all principle and utterly destroying their organization in this city. Edward Wyman was nominated, and is consequently the standard bearer of the Know Nothing party. The Black Republicans feel very sore at the action of this supposed friendly Donvention; called Ward meetings and elected delegates on Saturday night, and meet in Convention tomorrow (Tuesday.) Some say they will re-nominate the Know Nothing ticket-which will be very mortifying, in deed, to many of their party, whilst we believe they will settle the ticket with the present office-holders. The Black Republican party will be the lowest in the field, and this $i_{\bf g}$ their last kick; it will be desperate, for they die hard. The only Know Nothing paper in our city—the News—has refused to accept the ticket, and pledges itself to the support of the Black Republican party in the coming campaign.—
This leaves the Know Nothings without a paper. Politics is now in the mouth of everybody, and this will be one of the hottest campaigns ever experienced in this city. We will give our views as to the probable result when the other party enters the field.

The Know Nothings had called a Ratification meeting for Saturday night, but postponed it until Wednesday next -many of them laboring under the delusive idea that the Black Republicans will adopt the present K. N. ticket and unite with them in Mass Meeting. This is all moonshine. We cannot see how the combustible elements can unite and maintain their avowed principles—the one organized to disfranchise adopted citizens, and the other composed of German adopted citizens almost exclusively, except a few office-holders who stick to them for place and power—and heretofor recognized as Anti Know-Nothings. If they do unite they forfeit all respect for themselves and ignore their principles in toto

The Democratic party is thoroughly organized through out the city, and nothing but a union of all the opposition can defeat it. We have every confidence, thus far, of car rving the election on the first Monday in April. A portion of what was once the farm of Gen. Lewis Cass, and which he offered to sell, twenty years ago, for \$7,500

is now in the heart of the city of Detrait, Mich., and is said to be valued at \$3,000,000.

Yours. OLD GUARD.

PORT DEFOSIT ITEMS.—BODY FOUND.—The body of Patrick O'Keefe, blacksmith by trade, was found a week or ten days ago, at the mouth of Chester river. This is the man who was drowned at Conowingo early in the month of December last. When drowned, he had on his person about \$100, but when found, the money was gone. It is but fair to presume that some human Jackal had discovered the body previous to its landing on the shore of Chester River, and robbed it! It will be remembered that he fell overboard while crossing the Susquehanna, in company with others. He went down in a place where the water is near a hundred feet deep, called Job's hole; this hole is about two miles long by six hundred feet wide, and hence the fruitless efforts to obtain his body.

AMALGAMATION.—There were full one hundred marriages of black men to white women during the year 1858, and seventy-two of these marriages took place in Massachusetts. What a noble people those Yankees are !

FROM WASHINGTON. WASHINGTON, March 24.-A true bill of ndictment against Daniel E. Sickles, for the murder of Philip Barton Key, was returned by the Grand Jury to day. Messrs Stanton, Magruder, Chilton and Ratcliff, appeared as counsel for Mr. Sickles. It is stated that either Mr. Bradley or Mr. Carlisle will assist the prosecution. There is no truth in the report that the Hon. Geo. E. Badger will take part in the case. The prosecution will at first simply prove the act of killing but should the fact of the seduction be urged in palliation, testimony as to the antecedents of Mr. and Mrs. Sickles will probably be introduced, which may open a wide field for the admission of the testimony bearing upon the characters and relations of all the parties.

The day of trial is fixed for the 4th of April. The question of an extra session may be regarded as postponed—not decided. Everything depends upon the ability with which the head of the Post-Office Department shall cope with the difficulties he has to encounter. A company of emigrants for Arizona are being organized here under the auspices of Capt. Foreman, which will start for that ountry from Norfolk on the 1st of June.

Attorney General Black has, this afternoon, lecided against the legality of the recent removal of the Boston Post office. It now emains for the Postmaster General to take action in the premises.

Much concern has recently been manifested by several of the Foreign Ministers regarding the Arizona emigrant movement, and it has been stated that the Administration is opposed to it on the surmise that it is connected General Walker: but the assurance is given that such is not the case, and as a consequence, the opposition which was raised against the expedition has closed, as it is claimed that the Administration cannot be averse to legitimate colonization in the United States. A company of emigrants is now forming in this city.

Lt. General Scott has arrived here. had an interview with the Secretary of War this morning, and will remain several days on business connected with his official position Nicholas Cleary, of California, has been appointed Naval store keeper at Shanghai,

A NICE QUESTION DECIDED.—Under an act of Assembly, says the Pittsburg Chronicle, locomotives are compelled to whistle before coming to the crossings of the public roads If they do not, the company is liable to a penalty. But if the locomotives whistle and alty. there by frighten a team of horses, and serious damage be done-which is not unfrequently the case—who then is to pay? This question was decided in Norristown, last week, in the case of Stephen D. Kerkner vs. The Philadelphia and Norristown Railroad Company This suit was brought to recover damages for injuries done to a horse of plantiff's in consequence of blowing the whistle, thereby frightening the horse, so that he ran back caught his foot in the switch, and sprained his leg, so that he was rendered unfit for use for a long time after. The defence was, that the company was not responsible for the accident. Verdict in favor of defendants.

FATAL ACCIDENT.—The boiler of the Loco motive Meteor, attached to the through freight train to Philadelphia, exploded some three hundred yards this side of Elkton, on Satur day morning, tearing it to pieces, and horribly mutilating Lucias M. Hall and Edward Bon ner, engineer and fireman. The report of the explosion was such as to alarm the people of Elkton, as it caused the houses to shake as delegates were in attendance. Col. L. V. Bogy, President though there had been an earthquake. One of the St. Louis & Iron Mountain Railroad, being one of the was blown three quarters of a mile, and the fire box about a mile. The brakesman had been riding on the engine, but had gone back to adjust the signal lamp on the train, a few seemed to be the prominent man spoken of, but before his to adjust the signal lamp on the train, a few name was presented he made it known that he was not a moments before the explosion occurred, thus narrowly escaping with his life and without injury. Mr. Hall belonged in Littleton, Mass., and Mr. Bonner in Chester Pa. both young men and unmarried. We presume their bodies were forwarded to their friends for interment. KEY WEST, March 21.—The U. S. Marshal has arrested Capt. Mathias Lind of the slave brig Tyrant, of Rockland, Me., which brig was previously reported as having been ashore on the Marquesas. The Tyrant sailed from New York in November for Loando, having been cleared in the name of Capt. Lind. Her name has been found on her stern, under several coats of paint. She took in 230 negroes on the coast of Africa, and after having been chased by two cruisers, one of them a British steamer, finally reached Havana, where she got rid of her cargo. She was suspected at Havana, and a man of war boat sent to board her, when she slipped her anchor and managed to escape, but was subsequently run ashore at the above place, where she was found by the wreckers, who brought both the vessel and the crew to this port. The crew, nine in number, together with the captain, were subsequently arrested here, but afterwards discharged with the exception of the captain.

PENNSYLVANIA MINING REGION.—A corres pondent of the Philadelphia Ledger writing from Minersville, under date of the 22d, says: Your correspondent has been around a considerable portion of this mining region, and finds a large amount of loss has been sustained by coal operators, in consequence of having their mines flooded out by the recent heavy rains. This falls very heavy not only on operators, but operatives; it must certainly tend to enhance the value or price of coal ma As a general thing the coal miners are very needy, from the long continuous bad times. The present active demand for large coal for the iron furnaces, and the short supply at present, consequent on the stoppage of the large white ash collieries, will cause a material advance for the large sizes of coal. The more experienced, and less needy operators, are backward about contracting for any large amount of lump coal, and there is evidently a desire on the part of iron men to contract for future delivery; many of them are now sojourning here for the purpose of making contracts. All the iron men, whose works are at all near the canal, are desirous to receive coal by that means, rather than by the Reading Railroad, as from ten to twenty cents per ton is said to be saved-quite an item in

a large business.

The region suffering most from water is along the Broad Mountain, commencing at the large operation known as the Montekey Colliery, extending along by Greenberry valley. Then most of the places about the Mine Hill Gap, and over by the Pine Forest, at Tamaqua; it is said many of the larger places are suffering materially. Quite a demand is created for pumps, something of

a God send to the idle machine shops. GEN. CASS.—This veteran statesman was taken suddenly ill, on Saturday last, but was better at the latest accounts.

THE SLEEPING CARS.—Our local cotempo rary of the Johnstown Tribune, describing the Pennsylvania railroad, says they are models of beauty and comfort. The outside of the cars are finished in a workmanlike manner, and the internal arrangements are dressed up in a style of elegance seldom to be seen. The apartments in each car are entirely separate from each other, being divided by a partition and provided with a door which can be shut and locked by the occupants of the apartments thereby rendering them secure from any intrusion or annoyance from other passengers or persons walking through the cars, and bling them to obtain that rest which those who ride in other passenger cars so much desire but cannot find. Since these cars have been placed upon the road, we have been ed that the number applying for apart ments therein, at either end of the road would be sufficient to fill two cars of the same kind with each train.

JEFFERSON AND CUBA

PHILADELPHIA, March 12.
The New York Times' despatch says, "A highly interesting letter, from Commodore Charles Stewart, was to day handed to President Buchanan, disclosing an item of secret history never before divulged. President Jefferson's gun boat navy, which was the subject of much ridicule, was ostensibly built for the protection of our sea coasts. One hundred and eighty of those boats were sent southward. Commodore Stewart now makes known the fact that these boats were built for the special purpose of taking possession of Cuba, but before the plans of Mr. Jefferson were perfected, our relations with England became threatening, and the project was postponed and never afterwards revived. It is believed that this precedent act by President Jefferson in fillibustering will have some influence in directing the future policy of Mr Buchanan, should Mr. Preston fail in his efforts to make a purchase of Cuba.

New Spring Trade .-- The Philadelphia Gazette is jubilant over the Spring business prospects. It says the country seems resolved not to gratify the croakers. The city joins in the agreement. The country rushes forward to buy unbounded quantities of merchandize. and the city sells as freely as though confidence had never been impaired. Lethargy is conquered. The nightmare, which sat so heavily upon trade, has been subdued. No more do gloom and despondency oppress the spirit of industry. Commerce thrives apace. The Spring trade is magnificent.

Of the China tea trade a Hong Kong circular says that, January 14, the exports stand thus: To Great Britain 32; millions this season, against 373 millions last season, and 343 millions the season before. To the United States 181 millions this season, against 211 millions last season, and 20 millions the season before. Great Rheumatic and Neuralgiac Remedy.

SUFFERING HUMANITY READ THIS:

The undersigned takes this method of informing the public generally that there is no medicine now offered to the public that is equal to DUVALU'S GALVANIC OIL in relieving suffering humanity.

I was an observer of its effects in a friend of mine, who unfared almost everything from a neuralgic affection which resisted the best medical treatment in Centre county. We applied freely the Galvanic Oil to the painful part, and gave some inwardly, and in 20 minutes the patient was asleep, and when awakened was free from pain, and continued so. This is a positive fact which I am willing to make good at any time. A case of Felon was cured in nearly the same length of time.

To all who intend protecting their property from LIGHTNING, a few facts may not be unwelcome.

THE ELECTRO MAONET LIGHTNING ROD has been before the public for twenty years; has been the means of saving a vast deal of property and many lives, and has never in a single instance failed to meet the highest expectations of its value. Hundreds of our own eitzens can testify from their own knowledge of its ability to protect property in safety; who have been eye witnesses where buildings public and private, churches and school houses, have been saved from destruction—the rod receiving and carrying harmless to the ground, strokes which but for them would have caused the total ruin of the building and all within it.

The superiority of these rods over any others in use, has been testified to by men who have no superiors in general science or in this department. Recommendations to the number of six thousand can be seen at the factory. The United States Patent Office is protected by my Rods, having been selected from all others in use as the best and most relishle. Considering the character and position of the men who have charge of that institution, no higher testimony could be desired.

Persons residing at a distance should be on their guard against a class of swindlers who by false representations of every description, seek to mislead the purchaser.

Where my scents are not personally known as such, the only safe plan is to apply, by letter or otherwise, at the Factory.

Sa Weather Vaues, Cardinal Points, Spire Rods, and all manuer of SCROLL and FANCY IRON WORK, to suit all characters of Architecture, got up in the neatest and most durable manner at the lowest cost prices.

IN CHESTER COUNTY, PENNA.

AN ENGLISH, LINGGAL AND COMMERCIAL INSTITUTION.

The next session will open on the 2nd day of May. The School is sound and practical in every department. The course of study embraces everything that is taught in the best Colleges of our country. The gentleman who assists the Principal is an accomplished scholar; and we feel certain that we are speaking the truth when we say, that there is no sounder nor better conducted school in the State. The location is a desirable one, being easy of access by railroad from Philadelphia to Harrisburg. A record is kept of each recitation, which is graded from 1 to 10—10 being the highest mark, and denotes a perfect recitation.—No student is allowed to be out of his room after 10 o'clock at night. No one will be retained in the Institute who evades or neglects his dutiles. The French Language is spoken in connection with the Latin; and Mathematics is taught on the analytical principle.

The English Department embraces the Chemical and Philosephical Sciences. Grammar, Geography, Etymology of Words. History, Botany, Physiology, Familiar Science, Logic, Rhetoric, Evidences of Christianity, Political Econouy, Agricultural Chemistry, Bock Keeping, Penmanship, Orthography, Reading, Declamation, Essays, Letter Writing, Theory and Practice of Techniq, &c., &c.

The Mathematical Department embraces Arithmetic, Mental Arithmetic, Algebra, Geometry, Surveying and Navigation, Plain and Spherical Trigonometry, Conle Sections, Practical Astronomy, Calculus, Civil Engineering, Mechanics, &c.

**The Department of Languages includes the Latin, Greek, Teach Habray &c. and the student reads any suther he appropriesses. them of more value itself alone than the entire cost of the whole course.

LECTURES.

On the Law of Partnership Bills of Exchange and Promissory Notes, Mercantile Contracts, Agency, Shipping, Insurance, Bailments, &c., together with Lectures daily on the science of Accounts, the usages of Trade, Penmanship, &c., form also an important feature in the course of instruction in this College.

The above are the leading points upon which Students are instructed in the "Lancaste Mercantur College," and, together with much other incidental information, on subjects of vital importance, forms a most invaluable course of instruction for the Book Reper or business and that alone, therefore, the Student is not led off into any abstractions; but pursues his course of study, according to his ability and application, until he is qualified to conduct the Books of any business whatever. And if satisfactory evidence of his competency be given upon examination, he is then awarded an elegant Dislowal lithographed in the linghest style of the art, and neatly filled up in Old English German Text or any desired style of writing.
