WY ILLOUGHBY'S PATENT,

W GREAT IMPROVEMENT IN GRAIN DRILLS.

G UM S PRING GRAIN DRILLS.

A great saving in Seed as less is required with this Drill, than any other now in use. This Drill has been in nee for three years, and wherever introduced, has won a reputation equaled by none. It has taken between Thirty and Party First Ciass Premions in 1885, at the various State and County Fairs, where it was in competition with other Drills. Among which are Indiana, whio. Penneyl vania, New Jersey, Maryland, and Virginia State Fairs, also the HIGHEST PRIZE (a Silver Medal,) at the United States Fair, held at kichmond Virginia, and many County Fairs. The following are some of its advantages:

First. The tooline os constructed with Rubber Springs, they when they come in contact with roots, rocks, stumps or any other obstructions, not over eighteen inches high, they spring back, pass over, and immediately regain their former position, without stoppage or injury to the Drill, avoiding the necessity of stopping to put in Hooden Pins, as other case in their Drills. Newly cleared land can be seeded with this Drill as well as an old field. So perfect is the spring, that the Drill can be drawn across radiroad track without damage to the Machine. The spring can be set to drill the herdest kind of ground without yielding, but will suddenly yield where it meets firm obstruction.

Neond. The arrangement of distributing the seed is composed of two Vincanized ubber Rollers, revolving earther, which discharge the seed not intermittingly or in bunches, but in a constant stream, without Crockray on Breakins the grad. No irregularity of ground or fast or slow motion of the team will vary the quantity sown to the acre. The quantity sown to the acre is regulated by a slide, to any desired amount in a moment's time, every while the Drill can be drawn from field to field without bedding or we stand the proper was a smanufactured in a superior and werkmanlike manner, as nethure but the very ness MATEMAL by the proper care.

The unders address ### Machinery and Castines of every description made to order and warranted perfect.

PATENT AMBROTYPES.—The subecribers having purchased the exclusive right of Lancaster city, are enabled to offer to the public a new style of
lictures, far exceeding, in beauty and durability, any ever
before made. These pictures are not reversed, as daguerrectypes areand may be seen in anylight. They also possess the
care property of being impermittants; being hermetically
sealed between glass plates, which is secured by Letters
Patent, in the United States. Great Britain and France,
and practised in Lancaster city by T. & W. & UMMINGS,
only, over Sprecher & Bro.'s New Store, North Queen st.
Lancaster.

EXPLANATION.

The term AMBROTYPE, by which these Pictures are designated; is derived from the Greek word Ambradas, signifying indestructibility, permanency, &c. The Picture is taken upon plate glass, to which another plate of corresponding size is secured with an indestructible rement, by which the picture will retain its original brillancy for ages; it will not corrode by acids, nor be injured by water or climate. It is bold in its effect, beautiful in the surpasses any thing in the gradations of light and shade, and may be seen in any light. The public are cautioned against indictions made on single plates of glass, with the black varnish in immediate contact with the Picture.

ANBROTYPE STERESCOPES MUST BE SEEN, destroy the Picture.
AMBROTYPE STERESCOPES MUST BE SEEN,
to be appreciated—the relief being fully as perfect as life.
Citizens and Strangers are invited to call at the Ambrotype Gallery of the undersigned, and examine specimens before they procure l'ictures elsewhere, as they are insured of polite attention.

Liberal discounts allowed according to the quantity purchased.

The practical results attending the use of this Guand have been most retuarkable, and from its permanent action on the soil, it takes precedence over all others. Farmers using it can depend upon full and regular supplies; it is unlike some other Guanos which the consumer has just begun to appreciate, when he is informed that the "deposit" is exhausted, or the price raised above his ability or inclination to purchase. Upon this he may fully rely, as to the fullness of the supply. The quantity on "Jureis Island," alone, is believed to be over Three Millions of Tons.

CASSIMER HATS, spring style, and a CAPS, of all descriptions, at AMER'S New Store, may 3 tf 16 East King st., next door to Gyger's Bank.

In response to the numerous calls for the 1Vth Volume of the NEW AMERICAN CYCLOP-EDIA, we beg to state that it has been delayed by an accidental loss of an important m-nuscript in the nails, which had to be replaced.—It is now PRINTED, and will be issued as soon as the edition of 10,000 copies required by the present subscription can be bound in the various styles required by the subscribers.

From the Hon. Throphilus Pursons, LL. D., Lone Professor in Hirvard University.

Have you room for a word about Ripley and Dana's new Cyclopedia? I have irrequent occasion to use one; and I am so delighted with the two volumes we have that I must ask you to allow me the relief of saying very simply, what I find them—that is, the very best Cyclopedia for practical use ever published I have some knowledge of all in our own language and a few of those of the continent of Europe. The best and largest of these surpass this of Appleton's in the extent to which they carry our special dissertations. But this Cyclopedia is full of the best matter. By skillful selection and compression, and sedulous avoidance of mere show and verbiage, room is found for an immense amount of the latest information, put forth clearly, carefully and accurately. The book embodies; and adequately represents the ability and knowledge available at this day for a work of the kind.

"Its merit and extreme cheapness must place it eventually in every Library. And if a good word from one who has found out its excellence by making use of it, can hasten or extend its diffusion, my purpose in writing this brief notice will be accomplished."
