* TAKE TIMB TO CONSIDER.

There is no State in the Union where su cess is more important to the Democracy than Pennsylvania. In our State the Democracy have had great losses. Our Congressmen with three exceptions, are against us. We have lost one United States Senator already, and it depends upon the course of the Democ racy now whether we may not lose another. If Pennsylvania is to give the weight of her Democracy hereafter, we must harmonize all conflicting interests now. It is certain that the casting of a Democratic vote by Pennsyl vania will render the election of a Democratic President certain in November. It is also certain that by a united Democratic vote we can carry the State against the Opposition It is, then, most important that the Democracy Pennsylvania should take time for a careful consideration of their action. There is plenty of time for fair discussion, and an honest and harmonious settlement of difficulties which exist. In this State the Democracy has a large stake. We have a Governor and Congressmen to elect, and a Legislature who will have the chosing of a United States Senator, in place of Mr. Bigler. The Democ racy would regret exceedingly that the State should be given over to the Republicans for these offices, on account of any difficulties which have risen on the Presidential question -Allentown Democrat.

On Tuesday night, at Portsmouth, N. H, Miss Ann Maria Martin, daughter of Mr. Thomas Martin, died from the effects of a singular wound received on Saturday, when a salute was fired from the yacht Zinga. Ex it will be seen that the value of the sugarpecting a display of fireworks from the Zinga, as she was coming in, a large number of people had gathered on the wharf. A salute from a two pound cannon was fired on board the yacht. The wad was of waste cotton, and of course was very dense; and although the muzzle of the gun was judged to be depressed its production?" far below the wharf, yet, being pointed toward the people, the wad struck Miss Mar tin, broke several steel hoops in her skirt, and one of them cut a fearful gash across the lower portion of her body, allowing the intestines to protrude. She was taken home as soon as possible, though the bystanders had no of the nature of the terrible injury she had received. To some who crowded around her and annoyed her with questions, where she was hurt, and how much, she replied in great agony: "You do not know how much I am hurt. Take me home, that I may die with my mother?

MR. LANE'S PREPARATIONS FOR THE PRESI pency .- " I have followed all honest vocations of life, and among other things I worked in the mines of California in 1850, and dug gold for eleven months. I dug out with these hands \$6,000 that I took home. (A voice— "Good for you.") While I was out there digging gold, I went out prospecting one day; for I wasn't satisfied with digging \$25 worth a day; I wanted better diggings. I went out to hunt—to 'prospect,' as we call it—and I met a very clever German, who had been prospecting also. I had never seen him before, nor he me. 'Well,' said I, 'how do you get on to day? what luck have you pros 'Not very good,' said he; 'How are you doing?' I told him I had not done much. 'Well,' said he, 'where are you from? Oregon,' said I. 'Oregon?' 'Yes.' sort of a country is that?' said he. Well. I told him that it was a good country, Then he asked about General Lane. Says he, 'Do you know General Lane? He's a d-d fine fellow.' (Laughter.) I give it to you in his own language. General Lane,' he continued, came very near catching Santa Anna.' Well, I told him, ves: I knew him a little, but I never spoke of him. 'Well,' says he, 'why don't you speak of General Lane?' I told him my wife fell in love with him once, and I never spoke of him since." (Laughter.)-Lanc's Philadelphia Speech.

THE CAMBRIA IRON WORKS .- A writer in the North American, in describing the Cambria Iron Works, the most extensive of the kind in the country, says: The entire establishment at present comprises nearly three thousand operatives, twenty seven thousand acres of feet, sixty-four puddling turnaces, twelve twenty nine steam engines giving an aggre twenty nine steam engines giving an aggre gate of 2500 horse power, two locomotives, a four millions of bushels. One farmer near plete domestic market, including dry goods, grocery, feed, meat, shoe and tail ng establishments, one hundred and forty head of horses, a foundry, a draught and pattern making shop, wheelwright and black smith establishments, machine shops, forge shops, powder house, three hundred railway cars, etc. Last year 32 000 tons of railroad iron were turned out. The retail stores alone make sales amounting to \$400,000 per annum. During the past year there have been slaughtered for the meat market 580 beeves and 600 head of hogs.

THE PRINCE OF WALES AT HALIFAX. HALIFAX, August 1:- The ball given here last night to the Prince Wales was a success. The Prince danced with several laties, and to day he has been about town in plain clothes. To day he also visited the Duke of Kent's farm three miles from the city. The festivities have been varied to day by a grand regatta, and horse races on the common, the fine weather adding greatly to the enjoyment of the people. This evening there is a display of fireworks, and the Governor is entertaining the officers of the volunteer military. The Prince held a levee at noon. He leaves by rail to morrow for Windsor, and thence proceeds to New An escort of artillery and rifles precedes him.

SENATOR DOUGLAS AT CONCORD, N. H. Concord, N. H., Aug. 1.—Senator Douglas arrived here at three o'clock yesterday after noon. He was received with a salute, and a procession escorted him to the State House, where he made a speech. He referred to his has more than Mr. Breckinridge. course on the various questions connected with Kansas, and claimed that he was nominated like Buchanan. But the President had taken elected him. He (Douglas) stood upon the principle that the people had the right to make their own laws and establish their institutions to suit themselves. He considered that the time of Congress would be lost until the negro question was settled. In the evening the enator held a levee. There was a grand display of fireworks in front of his hotel.

A YOUNG WHEAT STATE.-The Committee Farms, of the State Agricultural Society of Wisconsin, have made a careful estimate, from which they set down the wheat crop of Wisconsin for the year 1860, at twenty two millions of bushels. This will probably exceed the crop of any other State in the Union. In 1850, according to the census, the heaviest wheat growing State was Pennsylvania, whose crop amounted to 15 367 691 The crop of Wisconsin, in that year was 4.286.131 bushels. For a comparatively young State, the crop estimated for the present steamers, all crowded with passengers, but she year is amazing. Correspondingly large crops in the other Western States, with a fair

TERRIBLE DROUGHT IN KANSAS.—The Kanthe New York Tribune, are afflicted. The officers, the management, fare, etc. letter-writer says:

"As I write in my house, the wind flaps over me; the sun heats it so, that it almost the stone steps in front of my house; the stove and tin boilers are too hot to bear my hand on them, standing in the house where the sun cannot touch them-they are hot by wind blowing on them through the open door. than four or five inches of rain had fallen in that time, would be nearly or quite true. Now, what are the people to do? We can't stay here without food for ourselves and Many of us have not got money to pay for our land, or to get away with, to say nothing of buying food for our wives and children, either here or somewhere else. It is none is here. Our last year's crop is all gone, or nearly so. Unless God sends us manna from some place, some of us must starve.

PROSPERITY OF CUBA. Cuba is advancing in population and all other sources of wealth. It is calculated that the present population of the Island is 1,168,- by a unanimous vote the following sentiment: 000, of which nearly 550,000 are white inhabitants, 180,000 free colored, 400,000 slaves, and 38,000 Asiatics and Indians. The sugar estates are immensely productive. Twentythree of the principal plantations, comprising about 100,000 acres of land and 10,175 slaves, besides buildings, machinery, &c., are valued at nearly \$15,000,000. The Cuban Messenger

The total amount (last year's crop) of sugar from these 23 estates, was 235,000 boxes, which, calculated at the prices of last year, can be estimated at \$20 each box would the value of their aggregate crops \$4,700,000. or over 30 per cent, more than the estimated value of property. The expenses of manufacturing, keeping the hands, fuel, &c., must be deducted from that sum to see the real profits, which, according to many planters,

rarely net 10 per cent.

We merely give these few items for the gratification of some parties interested in the sugar business; and as there are over sixteen hundred sugar plantations in the Island, it will be easily understood that the value of our principal staple must be great indeed, when the total exports of this single article (sugar) from the ports of Havana and Matanza alone, have exceeded, during the years of 1858 and 1859, over 1.200,000 boxes. When we cane production alone has been over \$50,000, 000 per annum for several years.

The Messenger asks, "what country, with a population of a million and a half, could show a similar result in any one article of

WIDE AWAKES .- A correspondent asks us to answer the following:

"Can you inform me what the intentions of the Abolitionists are in forming military companies? I see that the so-called "Wide Awakes" of your town are drilling and perading in uniforms, and with torch lights. through the streets in the "dark hours of night." Are they drilling their men in ranks so that after their defeat in November next they intend to take possession of the White House with the aid of Sharpe's rifles? Or is that they intend to "follow suit" revenge that "illustrious" captain of Abolition wars, John Brown?

I have never before known any political party, in a free country, enlist their men and ress them in uniforms; this must mean some-

thina' We can hardly think that anything more than mere show actuates the majority of those who have as yet put on the uniform of John Brown, though it cannot be disputed that, in this section at least, a great love for military lisplay has seized hold of a large number ince the murderous foray of John Brown at Harper's Ferry. In adopting the uniform worn by Capt. John Brown at Harper's Ferry, distinguish them from the American sol liers, they have done well. It was Brown's olan, too, to have his men well supplied with torches, the more effectually to carry on the war of destruction .- Jeffersonian.

CROPS IN OHIO AND ILLINOIS.-A letter from Ohio savs:

The new wheat crop of Ohio is nearly all in, and the yield will be beyond all precedent.
The farmers of the Buckeye State will this year draw from their solid bank-the earthfrom 20,000,000 to 25,000,000 bushels of wheat. So immense is the crop, as compared with former years, that prices have fallen largely within a few days.

From an Illinois letter we quote: For twenty years there have not been such crops of corn, wheat, oats, rye and barley as have been raised this year. Nothing can prevent the harvest of a full crop of corn in all except the two northern tier of counties but an early frost. Winnebago, a small county, and, a rolling mill covering 83,275 square wheat, two millions of corn, and one million is estimated to vield one million bushels of heating furnaces, fourteen pair of rollers, in Knox county will have 350,000 bushels of \$15,000 worth of wheat, and other crops in proportion. Of course with such a crop there a great want of hands, and wages are from \$2 per day. It is expected that everybody will keep Thanksgiving in Illinois

> The Chicago Press speaking of the corn crop in that State, says: We dare not repeat the estimates, soberly

made by competent men, of the surplus corn which Illinois can spare out of the crop now maturing; but this year exaggeration would be difficult. We can only say that there will be no famine in this or any other land which our commerce will reach.

GEN. CASS' POSITION.

A statement is going the rounds of the the stump to divide and defeat the party that press that Gen. Cass will support Douglas, but the Washington Constitution gives it an emphatic contradiction, and adds:

"Whatever may have been General Cass opinions on the territorial question in the past, and whatever accord may have existed between his views and those of Mr. Douglas, we know that since the rendering of the decision of the Supreme Court of the United States is the Dred Scott case, he has declared repeatedly that he accepts that decision as final and binding on him as on all other good citizens, and that his future action will be controlled by it absolutely."

Montour county, at a recent meeting, adopted

cratic Standing Committee of Montour county, hereby express our cheerful concurrence in a entire approval of the action of the State Central Committee, as expressed in the foregoing resolution, adopted at the last meeting of that body. We believe that it is only a union of the whole Democratic vote of th State upon one electoral ticket that the Democracy of the State can hope for succes and we regard the plan of union proposed by the State Committee as fair and honorable and one which cannot fail to meet with the hearty approval of every Democrat who de sires the success of his party and the triumn f its principles. We are therefore utterly and entirely opposed to all plans and scheme by which the present unfortunate division i or own ranks shall be continued and carrie nto the ballot box, and we especially regard the movement set on foot by the pretended friends of Judge Douglas, for the holding of a Douglas Convention and the nomination of an exclusive Douglas electoral ticket in this State, as a most suicidal policy, and one which can have no other effect than the entire defeat of the Democratic party and the triumph of sectional Republicanism. We therefore earnestly recommend to the Democracy of this ounty the united support of a union electoral ticket.

A NURSE GIVING A CHILD PINS.—The Wilmington (Del.) Gazette relates the following as having occurred in Brandywine Hundred, in that county:

Mr. Lewis Welden and lady have a fine little child, now some six months old, for which they procured a colored girl of 12 or 14 years of age, as nurse. After the girl had charge of the child a short time it became puny, sick and fretful, with very unusual symptoms, which caused the mother to suspect that omething was wrong. In order to satisfy herself, Mrs. W. one morning gave out tha she was going to visit a neighbor, and would be gone for several hours. She then secreted herself where she could observe the girl's She then secreted novements. She had been watching but a few minutes, when, to her unspeakable horror she saw the girl get a large pincushion and begin putting the pins in the child's mouth and trying to make it swallow them. The girl was immediately secured and a physician called in, who, by the application of proper remedies, succeeded in dislodging six or eight pins of large size from the child's stomach while several more were extracted from its mouth and throat. It is believed that she gave the baby from time to time about two dozen of the pins, but under careful management they have nearly or quite all been extracted, and it now flourishes finely, though its life was for a long time despaired of. was sent away, but utterly refused to tell how many pins she had given the child, or what was her object in doing so. It is believed, however, that she became tired of nursing it, and took this plan to put it out of the way.

HIGH PRICE OF MULES .-- The prevailing high price of mules in Kentucky has prevented many being brought eastward this Summer. The Louisville Journal reports the following sales in Clark county: - Benjamin B. Groom sold to Moss & Co., 100 fat mules for \$170 William R. Duncan & Co. purper head. chased 50 head of Daniel Smith's mules at \$152 50 per head, and about the same number of John W. Redmon at \$156 25 per head .-Colby Quisenberry sold his mules to a company in the South at \$136 per head, cash .llenry W. Galmes sold his mules to Mr. Wright, of the South, at \$158 per head.-Harrison Thompson sold 100 mules to Richardson, of La., for \$17,000-\$170 per head. From the above indications, mules are selling at figures as high as they did last year.

THE NEW JERSEY PRESS .- The Trenton True American puts up the Democratic Union Electoral ticket, and warmly urges its support by the Democracy. The Jersey City Standard

all the distractions of mere party policy, have determined to array themselves against the party whose sectionalism is so profound that, or the first time in the history of the country, t has drawn its candidates for President and Vice President from the North, as studiously gnoring the South as if it were a foreign or hostile country.

BRECKINRIDGE MASS CONVENTION. Indianapolis, Aug. 1 .- The Breckinridge Mass Convention yesterday was largely artended. At 8 o'clock they took the steamer for Mount Vernon; they will return at noon, and after dinner will visit the President and drill in front of the City

The grain statistics of Chicago, just made up, show that the receipts of flour and shall be cast for Mr. Breekinridge, if he has grain since January 1st, compared with the receipts during the same period of last year, 1859, show an increase of 13,000 barrels flour, 550,000 bushels wheat, 7.550,000 bushels corn. Increase in shipments, the same time, 63.000 barrels flour, 450,000 bushels wheat, 6,800,-000 bushels corn. In store there are at the present time 2.700 barrels flour, 5,400 bushels wheat, 1,500,000 bushels corn.

The Chicago Times and Herald have been united into one. The editor says in his salutatory article—" Doubts have been suggested by interested parties, that my support of Judge Douglas was not genuine. I take this occasion to refute the charge. I shall, of course, give Judge Douglas an earnest sup all the means in my power; but while doing so, I cannot submit to that test of my sincerity which requires me to denounce the great body of the Southern Democracy as disunionists. This I know to be untrue, and no consideration can induce me to sanction

POLITICAL PROGRAMME IN NEW YORK .- The Tribune thinks that on State politics the opposing democratic factions will be united. and that the Republicans will not carry New York except by a strong effort. ELIZABETH LAUBER. A MAIDEN'S SOLILOQUY.

BY THE BARD OF TOWER HALL.

"I wonder oft what I should say,
If one—I'll not tell who!— Resolved to make of me a wife. Should come in love to woo.
Alasi I cannot, cannot know,
Nor can I even guess!
I might repulse him with a no,
Or might, perhaps, say yes.
"I might with curling lip rebuke
His bold presumption vain;
And crush his hopes so that his lips
Should ne'er off-nd again.
I might be speechless with surprise,
And but a lovelit eye,
With tell tale bluehes on my cheeks,
Would give my heart's reply.
"I do not like to live in doubt. "I do not like to live in doubt, For certainty is best;
And that I'll have when some one comes
To put me to the test.

I think my guardian angel would
Prevent my acting wrong—
Ohi may that one—I'll not tell who!—
End all my doubts ere long!"

NOTE --A nice young man—I'll not tell who!-That morning made a call,
Arrayed in garments cheoply bought,
Of course, at Tower Hall.
The maiden gave an earnest yes, And never thought of nay,
When that young man so finely dressed,
The question popped that day.

Scrofula, or King's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out a in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrollons taint is variously accused by mercural disease. caused by mercurial disease, low living disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatabove an, by the veneral interior. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous commitments but they have for less covers to with plaints, but they have far less power to with quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which denates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

are aggravated by the same cause.
One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it.
To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is con-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter and Salt Rheum, Scald Head, Ringworm, RHBUMATISM, SYPHILITIC and MERCURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIAindeed, ALL COMPLAINTS ARISING FROM YIFLA-TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsapa-rilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Aver's Cathartic Pills. FOR ALL THE PURPOSES OF A FAMILY PHYSIC. are so composed that disease within the range of their action can rarely withstand or exade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: Costiveness, Heartburn, Headache arising from disordered Stomach, Neusea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Aver's Cherry Pectoral, FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the

disease. So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons pub-licly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate, While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
