on firely new, measures twenty-five by nineteen and a half inches in-two, contains thirty-nine figures, and is beyond comparison, the finest-work of the kind ever offered as a premium in this country.

"The degraving of Frith's pleture of Merry-Making in the Oiden Time, represents the humors of an English holiday in the country in those good old times when the men were cocked-half and know-breeches, and the women stays and a looper-a costume not essentially differing from the correct and crimiline of the 'present day. Almost in the control, the pleture and a little to the back-ground is a country, hance on the green, with a hard-featured fiddler periods on a high esset, and another musician in a thewig standing by him, playing-with all their might. On the right two bouncing dirls are gally pulling toward the dance a gray-haired man, who seems valuly to remonstrate that his dancing days are over, while a waggish little child pushes him forward from behind, greatly to the amusement of his-spouse, who is still sitting at the tea-table, from which he has been dragged. On the left, under a magnificent spreading oak, sit the 'squire and his wife, whom a sprighty man with his hat off is respectfully inviting to take part in the dance. To, the left of the 'squire is a young couple on the grass, to whom a gipsy with an infant on her shoulders of this couple is seen a group engaged in quoit-playing, and hard's of the whole is a landscape of rentle sloves and Administrator.

The band-wheel can (on the No. 3) be changed on either side of the Cutter he sooner it will generally well three.

Our cutter will cut shorter and make better feed, than those that first out, then crab we will can be changed to cut cann't june for the greatest advantage we claim is the power. The greatest advantage we claim is the power was manufactured to be consulted to the contract of the contr

There is a Mill running in Philadelphia which has ground from 15,000 to 20,000 busheles of grain, and is running yet without having any repairs done to it.
