

FROM WASHINGTON. APPOINTMENTS BY THE PRESIDENT.—The President has made the following appointments: J. H. Hay, Attorney, and Alex. H. Tweed, Marshals for the District of Kentucky. Hiram Wolby, Attorney, and D. H. Carr, Marshal for the District of Connecticut. John Sanford, Marshal for Rhode Island. Levi A. Keiser, Marshal for New Mexico. Associate Justice Campbell, of the Supreme Court, has resigned, but having heretofore announced that he would follow the fortunes of Alabama, thought not approving success in this country, the President has appointed...

PENNSYLVANIA LEGISLATURE. HARRISBURG, April 30th, 1861. HOUSE. The Speaker (Mr. Davis) called the House to order at 12 o'clock. The roll was called, when it appeared that the following members were absent: Messrs. Ashcom, Barnsley, Cullen, Duncan, Frasier, Gibbons, Gordon, Mullin, Patterson, Stoneback, Strong and Teller. The Clerk, Mr. Small, read the proclamation of the Governor calling an extra session of the Legislature. Mr. Speaker Davis, in a brief speech, trusted that the Representatives of the great State of Pennsylvania would take the true position of the Government as maintained, and all treason against it must be put down. Mr. Collins offered a resolution, calling upon the Governor to furnish a list of the names of the volunteers accepted for service, and where located; and also the names of the companies which have offered, and have not yet been accepted. The resolution was adopted. Mr. Thomas offered a joint resolution that no legislation shall be had during the called session except such as relates to national affairs. The resolution lies over until the next day. Mr. Thomas presented a bill for the relief and support of volunteers in Bradford county. The usual Committee were appointed, and the House then adjourned until to-morrow.

MAKING IT PAY. The gentlemen who have the contracts for subsisting the volunteers of the State, will, doubtless, soon make a sum sufficient to retire on. The rations in the regular United States Army are estimated at thirty cents per day for each soldier. The contractors in our State receive fifty and sixty cents per day for each man, while the rations furnished our volunteers are at much inferior quality to those furnished the regular army. The miserable food which has been dealt out to our volunteers at Columbus, it is said, does not cost the contractors fifteen cents a day. The profit, therefore, per day, must be about \$4000. This is patriotism with a vengeance! The above we clip from the Star. Co. Democrat. We do not suppose that the "patriotism" spoken of is confined to Ohio. We are inclined to think that a rigid investigation would show that in Pennsylvania contractors are also making a good thing out of the job at the expense of the poor soldiers. —Edw. Intel.

BERHARVE'S HOLLAND BITTERS. Scrofula, or King's Evil, is a constitutional disease, a corruption of the blood, by which the system becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in various forms. Any part of the system may be attacked, and there is no organ which it does not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unwholesome diet, impure air, and filthy habits, the depressing vice, and, above all, by the venereal infection. What-ever its origin, it is hereditary in the constitution, descending from father to son, and from the third to fourth generation. "Indeed, it seems to be the rod of Him who says," "I will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles, on the lungs, swellings, and on the surface, eruptions or sores. This foul corruption, which renders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, numbers perish by means of diseases which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which debilitates the human frame, is due to this taint in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from it. One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse the system of this taint, and to purify the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in
