WH ELLMAKER, of New Helland, Lancaster county, Pa., obained Latters Patent the 22d of October, 1861, for a valuable improvement in a <u>SEELP-ACTING CARERIAGE BRAKE</u> The arrangement is so simple, cheap, and performs its duty with such certainty, locking just in proportion to the stangement of the bill, by the presente of gravitation, and that, too, by a gradual bearing, relieving the horse, from a sudden Jerk, as well as to prevent the raising, of the staffs, and again reacting with equal case to the horse, by means of a spiral spring, reaking its altogether the most complete and desirable appendage that could be applied to carriages. The simplicity, cheapness, and certainty of performing its duty faithfully, without being liable to get out of repair, and its ready adaptation to all classed of wholes, makes this invention peenliarly desirable, and will not fail to general me. **AFR** flights can be had by calling on or addressing the subcriber at New Holland, Lancester county, Pai. **Data Section**, **Data Section**,
