Official Report of the Losses in the Late Battles in Maryland. WASHINGTON, Sept. 30.

The following report of the victories of South Mountain and Antietam has been forwarded to the headquarters of the army by Gen. McClellan:

MARK SHARPSBURG, Sept. 29, 1:30 P. M.

Major-General H. W. Halleck, General-in-Chief, U.S. A:

CHREAL: I have the honor to report the follow-ing as some of the results of the battles of South Mountain and Antietam: At South Mounts nour loss was

Total. 2,325 Total,
Loss in the two battles, 12,469 The rebels, in the two battles, as near as can be

ascertained from the number of their dead found upon the field and from other data, will not fall short of the following estimate:

Major Davis, Assistant Inspector General, who Major Davis, Assistant Inspector General, who superintends the burial of the dead, reports about three thousand rebels buried upon the field of Antictam by our troops Previous to this, however, the rebels had buried many of their own dead apon the distant portion of the battle-field which they occupied after the battle-probably, at least, five hundred.

The loss of the rebels at South Mountain cannot be sacertained with accuracy; but as our troops

be ascertained with accuracy; but as our troops continually drove them from the commencement of the action, and as a much greater number of their lead were seen on the field than of our own men, it is not unreasonable to suppose that their loss was greater than our. Estimating their killed at 500, the total rebei killed in the two battles would be 4000. According to the ratio of our own killed and wounded, thus would make their loss in wounded, 13.742

As nearly as can be ascertained at this time, the number of prisoners taken by our troops in the two battles, will, at the lowest estimate, amount to 5000. The full returns will no doubt show a larger number. Of these about 1200 are wounded

Of these about 1200 are wounded.

This gives the rebel loss in killed, wounded and prisoners, 25,542. It will be observed that this does not include their stragglers, the number of whom is said by citisens here to be large.

It may be sately concluded, therefore, that the rebel army lost at least 30,000 of their best troops during their campaign in Maryland.

From the time our troops first encountered the enemy in Maryland until he was driven back into Virginia we captured 13 guns, 7 caissons, 9 limbers, 39 colors and one signal flag.

We have not lost a single gun or color. On the battle-field of Antientam 14,000 small arms were collected, besides the large number carried off by citizens and those distributed on the grounds to the recruits and other unarmed men arriving immediately after the battle.

ly after the battle.

At South Mountain no collection of small arms ly after the battle.
At South Mountain no collection of small arms was made, owing to the haste of the pursuit from that point; 400 were taken on the opposite side of the Potomac.

F. SHRODER, Agent, oct 7 3m 39] Concessor Steam Mill No. 1.

FOUR MILLIONS OF SLAVES SET FREE--ONE MILLION OF THEM TO COME TO PENNSYLVANIA. It is proposed, and intended, to liberate four millions of Southern slaves. What is to become of them? It is idle to talk of colonizing them, even if they would consent to be sent away. We have not vessels enough, if all we have should be employed for the purpose, to transport so many people. Allowing that our sea-going vessels would carry an average of 250 negroes each, it would require sixteen thousand vessels to transport all these "freedmen," at one trip. One thousand vessels would have to make, each, sixteen trips; five hundred, thirty two; two hundred and fifty, sixty-four, etc.

bundred and fifty, sixty-four, etc.

But we will not impeach the reader's intelligence further on this point. Everybody knows that if the negroes are set iree they will remain in the United States. And when it is considered that Abolitionism will have taught them to believe that the Northern free States are the negro's paradise, it will be evident to all that the blacks, whon freed, will immediately set their faces hitherward. Indeed, the very circumstance of their changed situation will beget a desire for further novelty. Besides, the theory of the emancipationists in this business is, that the negroes will, as they must, fight their way through to our hundred and fifty, sixty-four, etc. will, as they must, fight their way through to our lines—that, ou hearing that Massa Lincoln has set them free, on paper, they will avail themselves of whatever weapons may be within their reach, and will slaughter such old and defenceless white men as have not gone to the war, murder the women and children, and make off for the Federal lines, markchildren, and make off for the Federal lines, marking their way with butchery and blood. So, the conclusion is inevitable that if the four millions of Southern slaves are set free, we shall have them swarming into the Northern States, numerous as the frogs, and the files, the locusts and the lice of Egypt. This will be the curse put upon our Pharoah and his people, not because of their refusing liberty to the children of Israel, but because of their giving liberty to the children of Ham!

Now, leaving out California and Oregon, we have seventeen free States. To which of these will the most of these negroes probably come? Illinois, Indiana, Ohio, Pennsylvania and New Jersey and the States bordering on the (present) slave States. New England, by its remote situation, its uninviting climate, and its sterile soil, would, to a great extent,

New England, by its remote situation, its uninviting climate, and its sterile soil, would, to a great extent, escape the curse which its policy will entail on the other Northern States. New York and Michigan will receive a considerable portion of the "freedmen;" Wisconsin and Minnesota not so many; Kansas, we believe, has passed a law calculated to prevent such an influx of negroes—but that State is under the Abolitionists' rule, and of what account is law when it runs counter to their purposes? Illinois has stringent laws against permitting negroes to come to nt laws against permitting negroes to come to within its borders, and we believe the laws of reside within its borders, and we believe the laws of Indiana place some impediments in the way of negroes immigrating to that State. So the probability appears very strong that when the four millions of negroes are let loose upon the North, Ohio, Pennsylvania and New Jersey will be the chief recontactes of them. But, suppose we divide them equally between the whole seventeen Nerthern States—this will size to the contact the seventeen of the contact the

have to be enlarged to hold the vast increase of criminals and paupers that they will furnish us, and our taxes will have to be increased accordingly!

Southern products will be vastly abridged, and the prices of cotton goods, sugar, tobacco, rice, etc., which our people want, will be proportionably increased. Already these things are nearly double in price what they, were two years ago. When this negro exodus from the South shall occur, and the negro laborer is transplanted to Pennsylvania, a poor man will not be able to afford the luxury of a muslin shirt, nor of sugar in his teaor coffee indeed, he may have no tea or coffee to put it in!

A million more of negroes in Pennsylvania!

Ten hundred thousand more of negroes in Pennsylvania! Think of this, white laboring men, and remember that these imbrated Africans will not only be your peers in the field and in the factory, but, if Abolitionism be carried out to its legitimate (or illegitimate) results, they will be your peers at the ballot of the Peace, Constables, etc. And, if negro equality is to prevail, they will be confice-holders, Justices of the Peace, Constables, etc. And, if negro equality is to prevail, they will be confice-holders, Justices of the Peace, Constables, etc. And, if negro equality is to prevail, they will be conficed to the hands in marriage of your daughters and eisters, and, the force of this negro delusion may become so great that, ere fifty years elapse, your blood and the blood of these enfranchised slaves may be flowing in the same veins.

ARD.—Having recovered my health

CARD.—Having recovered my health

Cafter the hardshipe of a winter campaign in the Cavalry service. I have again volunteered to take the field
against our common foe. The Governor having authorised
me, as Captain, to raise a select Troop of Cavairy under
the late requisition of the War Department, bearing date
of July 29th and August 14th, 1862, holding out inducements to the patriotic and brave, superior to former orders,
I would appeal to the young and middle-sged active men
of Lancaster City and County to rise up with renewed energy, and help to crush out the defant rebols. Fellow citisens, they are now assailing the gates of our State—the
time is at hand for desperate action—action defensive and
offensive—soon it may be too late.

I want strong hands and willing hearts—brave men
that will do the State some service—that will measure the
steel of Union and Justice against the steel of Rebellion
and Treason.

THE GREAT INDIAN HERBAL TEA DR. ENGLISH'S
INDIAN VEGETABLE EMMENAGO INDIAN VEGETABLE EMMENAGOGUE:

This Celebrated Female Medicine possesses virtues unknown of anything else of the kind, and proving effectual after all others have failed; it is prepared from an "Indian Herb" peculiar to Northern Mexico and Texas, and is used by the Natives in producing the MONTHLY SICKNESS. It is designed for both married and single ladies, and is the very best thing known for the purpose, as it will remove all obstructions after other remedies have been tried in vain. It is a pleasant tea, containing nothing injurious to health, and a cure can be relied upon in all cases.

Excelsion Burn stone mills, (FOR FARMERS AND MILLERS.) AND ANTI-PRICTION HORSE POWERS.

Took Ten First Premiums at Western State Fairs las Took Ten First Premiums at Western State Fairs last year, and are justly considered superior to all others. The Mill may be driven by horse, water or steam power, does its work as well as the flat stone mills in milling establishments, and requires but one-half the power to drive the largest sizes. They are very compact, perfectly simple, and for farm use will last Thirty Years, and cost nothing for

PRICES-\$100, \$140 and \$170. Flour Bolt for smallest Mill \$50 extra.

THE HORSE POWER has proved itself to be the best ever invented. The friction is reduced by IRON BALLS, so arranged in all the bearings, that the whole weight of the castings runs upon them. THREE POUNDS DRAUGHT, at the end of a ten feet lever, will keep the power in motion! thus permitting the entire strength of the horses to be used on the machine to be driven. One horse will do as much work on this power as two on the endless Chain Power. It is portable and may be used in the field as well as in the house. More than Twenty-Five Per Cent. of horse fish is saved over any other power in use. It is simple in construction, and not liable to get out of order.

THE \$125 POWER WILL DRIVE ANY THRESHING MACHINE.

EVERY MACHINE IS GUARANTEED TO GIVE SATIS-FACTION, OR THE MONEY WILL BE REFUNDED.
