"The report of the defeat of Gen. Foster at Kingston, North Carolina, which was promulgated in a dispatch from the rebel Gen. Evaas, proves to be entirely false. So far from being a defeat the affair proves to be a victory for the Union arms. After three days skirmishing and fighting commencing on the 11th inst., Gen. Foster captured Kingston, driving off the forces of Gen. Evans, killing and wounding two hundred and fifty rebels, taking nine hundred prisoners and eleven pieces of artillery. Our loss in the action was not more than two hundred. After this success our troops advanced in the direcloss in the action was not more than two hundred. After this success our troops advanced in the direction of Goldsboro' and Weldon, the occupation of these places being the main object of the expedition. Our gunboats attempted to support the land forces, but, owing to the shoal water in the Neuse river, they were not able to render much assistance. The gunboat Arlison, however, of the marine artillery force, showed some fight, but was met by a battery of the enemy within two miles of Kingston, the fire from which did her some serious damage, and finally compelled her to reire. The flottilla, on its return down the river, was constantly fired upon by guerrillas from the shore. In the Senate to-day Mr. McDougall offered a resolution requesting the Secretary of War to inform the Senate whether any tribunal has been constituted to report upon the operations of Gen. Buell in Kentucky and Tennessee, and to state the character of the American War. This last paper will attract the motation in the United States. It is written with great attend, dee 23 44 50]

The Portland Advertiser, the leading Republican paper in Maine, asks this important and interesting question, and answers it as follows. We commend the answer to the pareful attention of those who are so free with careful attention of those who are so free with their charges of treason against every Democrat who speaks of peace:

We answer, when Congress shall be persu aded that reason, not force, is THE DIVINITY f the age in which we live. When Congress ehall l example of six millions of people, educated, free, and independent, being subjugated to captivity, and ruled against their consent .-Then Congress shall be persuaded that no nation on earth has proved themselves powerful enough in arms, or in wealth, to establish and maintain, indefinitely, a military despot ism over six millions of white men accustome freedom, and to a representative government. When Congress shall be persuade that every bayonet that carries a demand for obedience to law, and to the Federal Government, should also carry the announcement of a religious respect for the political rights out of which the war has arisen, and a willingness to confer amicably upon the terms of a re-ad-

justment of those rights.

Fight on, ye men of the North! and fight on will be the cry of the men of the South, until, substantially, these conditions we have named shall come to pass. But fewer of each side shall live to enjoy the result, as day by day by day passes away, and all of each will be poorer in purse, until the result that gives eace shall be attained. Peace is the child of eason and reciprocal interests. War is the seathen and soulless Moloch that devours, without remorse, every life and every interest that stands in the way of its imagined or pro-claimed necessities. Cold, pitiless, inhuman war in its best aspect. It makes children fatherless, wives widows, the rich poor, the poor miserable, the powerful feeble, the feeble despairing, and the world itself everything which it ought not to be to every citizen and to every interest.

But fight on, fight on, will be the impulsive ery of politicians, of aspirants to office, of overnment jobbers and contractors, and of fanatical, one idea men, both of the North and at the South. Fight on will be the cry of standard loyalty, until the still, small, and yet iblime, voice of the ballot-box shall bid battles to cease, and reason to resume its sway over the councils of the nation. Then no br ken nationality-no invidious titles to superi or righteousness in the frame-work of institutions and of society-will be recognized, but a re united people, with one flag of national glory and strength, and one Constitution, one Government, and one supremacy, shall be come the inheritance of all our people, East, West, North and South. If there be treason in those sentiments, " make the most of it."

DREADFUL ACCIDENT.—The Delaware County American says: On Thursday week a little daughter of Daniel and Elizabeth M'Avoy of Nether Providence, aged about seven years, came to a most shocking death by burning. It appears that the child whilst making a fire in a stove by some means communicated the flames to her dress, enveloped in which she fled to the creek, which was but a few rods distant, and jumping in extinguished them, not however, before she was so dreadfully injured as to preclude all chance of her recovery. The little sufferer lingered in excruciating agony until Thursday, when death put an end to her suffering.

In the same time 13,800 barrels were shipped by the New York Central Railroad.—
Several of our citizens have dealt largely in apples this season, among whom we may mention Messrs. Benjamin Wing, E. N. Jacobs, and E. Chamberlain. We have not the number of barrels each has marketed, but they are not essential here, as they must be included in the amounts before mentioned. These aggregate 260 000 barrels. Probably enough more have been marketed abroad from Western New York to swell the sum to 300,000 barrels.

The above figures, however, give but a faint idea of the amount of the apple crop. A large home demand has been supplied, which, if added to that from abroad, we believe would increase the amount sold from the orchards of Western New York to 500,000 barrels.

The price has been low, not averaging over

"THERE IS NO SUCH WORD AS FAIL." ARRANT'S COMPOUND EXTRACT OF OUBEBS AND COPAIBA.

This preparation is particularly recommended to the MEDICAL PROFESSION and the PUBLIC, as combining, in the most convenient and efficacious form, the well-established virtues and properties of Cubebs and Copaiba. For the speedy and effectual relief and cure of all SEXUAL DISEASES, it may justly be considered one of the greatest and most valuable discoveries in the annuals of modicine, frequently effecting a cure in three or four days. In its preparation as an extract or a paste, the usual nauseous taste is avoided, and it is, consequently, never found to interfere with the digestion, while, from its greater on contration, the dose is much reduced. It may be relied on as the best mode for the administration of these remedies in the large class of diseases of both sexes to which they are applicable.

are applicable.

B.—Purchasers are advised to ask for TARRANT'S COMPOUND EXTRAOT OF CUBEBS AND COPAIBA, and to take nothing elso—as imitations and worthless preparations, under similar names, are in the market. Pamphlets accompany the medicine, containing full and smple directions. Price, \$1.00. Sent by express on receipt of trice. price.

TO THE INVENTOR.

The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the Claims of all the Patents issued from the United States Patent Office during the week previous; thus giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France and Germany; thus placing in our possession all that is transpiring in mechanical science and art in these old countries. We shall continue to transfer to our columns copious extracts from these journals of whatever we may deem of interest to our readers.

A pamphiet of instruction as to the best mode of obtaining Letters Patent on new inventions, is furnished free on application.

THE PATENT STAMP. SEALING AND POST MARK
PRESERVING ENVELOPE.

The preservation on the letter itself of the POST-MARK
and POSTAGE. STAMP, generally destroyed with the detached cover, has long been deemed a matter of the first
importance. This desideratum is now triumphantly secured
by this ingenious invention. Many obvious advantages
must arise from the general use of this envelope.

The —Increased Safety by additional sealing; the stamp
connecting the envelope and letter securely together; and
this is never liable to be omitted, though the sticking of
the flap is frequently neglected or imperfectly done;
Second—Security against Imperiment Intrusion; the
letter and surelope being firmly attached by the stamps,

Fourth—Security for the free payment of the Postage; as the stamp, when once propuly placedain this window, cannot be removed without its destruction.

Fifth—Advantage therefore to the Government; by the effectual destruction of every stamp in its first use.

Sixth—Facility to the Post Office Dperations; by a uniform location of the stamp in the opper right hand corner, which is the most convenient position for the Post Office mark. which is the most convenient position for the Post Office mark.

**Economic Property of the Mailing; by securing on the letter itself the legal evidence of the time and place of it being mailed. This has long been esteemed so desirable, that many prudent persons are constrained to dispense with the use of envelopes, that they may have the post mark on the letter; and others take the precaution to pin the envelope again on the letter for identification.

**Eighth-Oartainty of the Date and Place on the Letter, which are so frequently omitted by writers in carelessness of hurry. which are so frequently omitted by Writers in carriosances of hurry.

Ninth—Ornamentation; which, though some may think of small importance, certainly meets the approval of all persons of taste.

Tenth—Oost. Notwithstanding the many and unrivalled advantages of the "Stamp Sealing Envelopes," they will be furnished at a very small advance upon the prices of those not having the benefit of this patent.

MOUNTING ARTIFICIAL TEETH. MOUNTING ARTIFICIAL TREATH.

I would announce to my pairons and others requiring
the services of the Bentist, that I am about introducing
the AMBER BASE into my practice. The advantages of
this method of mounting teeth over the metalle base have
been fully established in the five years in which it has been
subject to the severest tests, with the most satisfactory results.

It is fully as strong and durable as either silver or gold—more easily kept clean, more instural to the touch of the tongue and lips, and it is firmer and more serviceable in the mouth, in consequence of our being able to obtain a more perfect fit to the gum.

This work is not so expensive as gold, but a little higher in price than silver. It will be warranted to give satisfaction, or be exchanged for gold or silver work as the patient may prefer. long of the second of the seco V AN INGENAMENS ON WOOD,
