GREAT BATTLE IN TENNESSEE. The Rebels Driven Back.

The Rebels Driven Back.

Nashville, Jan. 2.
A terrible battle has been fought at Murfreesbore, involving the severest carnage of the war.

The United States forces encountered the rebels on the 30th ult., near Stewart's Creek. After heavy skirmishing on both sides the rebels were driven back. We captured a hundred prisoners, and killed and wounded a large number. Our loss on this occasion was 70 killed and wounded.

At daybreak on the 31st the fight was renewed with great fury, General McCook's corps being opposed to Hardee's.

osed to Hardee's.

After desperate fighting, with heavy loss on both sides, General McCook retreated two miles. He soon rallied his men, but was again driven back, and at night was four miles this side of the ground occued in the morning. The fight continued until ten o'clock at night, at which time we had maintained our position.

The Federal loss was very heavy. Among the

killed are:
Brigadier General Sill.

Colonel Harlan, of the 10th Kentucky, commanding a brigade, overtook him at Rolling Fork and attacked him, killing and grounding a purplet of the state of t

ome privates.

Colonel Dull (rebel) died of his wounds, and one four lieutenants of artillery.

Colonel Harlan of our lieutenants of artillery. Colonel Harlan crossed, pursued, and attacked him at Rolling Fork and Salt river bridge. This is the first instance, I believe, of infantry waiting and attacking cavalry. Morgan fled before Harlan to Bardstown, and from there attempted to escape between Lebanon and Camp Belleville. Colonel Harkins, 128th Kentucky, commanding there, attacked him this morning, killing a number and capturing ninety men, his caissons and ammunition wagons. Mergan is flying precipitately. General Reynolds marched from Glasgow yesterday for Greensburg, and may intercept him. Colonel Hulsy, 6th Kentucky Cavalry, killed. O casualties are not yet reported. This is a good exhibit. It is also worthy of notice that unembarrased business firms, especially those in the cotton trade, never made so much money as during the past year. Prices kept advancing steadily, and no one who had goods on hand or bought then but netted a handsome profit. As all business has netted a handsome profit. As all business has been done for cash there has been no had debts. So far as commercial transactions are concerned, all has so far been smooth sailing. There are squalls ahead, and prudent men are taking in sail. The time will come when taking in sail. The time will come when prices will fall as uninterruptedly as they have advanced, and then woe to the dealers who

Otton and hemp are coming up the river slowly. And, by the way, speaking of cotton reminds me of a certain speculation in that article in which General Washburne, of La Orosse, engaged, with a loss of thirteen men killed and several wounded—and his cotton. It will be remembered that some time since, while in command at Helena, he sent a regiment across the river to capture several hundred bales of cotton in the possession of rebels.

WHEAT IN THE U. STATES.

The report of the Superintendent of the Census presents some highly interesting sta-tistics as to the growth of the great food staple, wheat, in the United States. that in 1849 the total quantity of wheat grown in all the States and Territories was 100,485,-944 bushels, against 171,183,381 bushels in 1859 - being an increase of nearly seventy per centum, or about double the increase of population. It is not to be supposed, however, that the

increase has been equal throughout the United States. On the contrary, the old wheat growing States—Penasylvania, Virginia, Ohio abd New York—fall considerably below the average, owing, as it is thought by the Superintendent of the Census, to the destructive agen-cy of the wheat midge and the consequent unwillingness of the farmers to subject themselves to repeated lesses from this cause The increased production of wheat in the country at large is therefore due to its extended ultivation in the Northwestern States, where the yield has been prodigious, and has defied the means of transportation to bring it to market. In Illinois, for instance, the crop has increased in ten years from 9 414 578 bushels n 1849 to 24,159,500 hushels in 1859; and in Wisconsin from 4.286 131 in 1849 to 15. 812.825 bushels in 1859 -or an increased re spectively of 160 and 275 per cent., while the ncrease of population for the same period has been 101 and 154 per cent. The Superintendent believes that the grain growing States will show a more favorable rate of increase in the next decade, from the fact that the bar upon its general cultivation—the midge—is dimin-ishing where it was formerly the most destrucive, and wheat growing will, in consequence, be resumed in many localities where it had

been almost abandoned for a time. Canada promises to be an enterprising com petitor of the United States for this essential article of food in the markets of the world .-From some tables which we have seen, we learn that its production of wheat for 1849 was 12,620,425 bushels, against 24,682,550 bushels in 1859—being an increase of nearly one hundred per cent. It will be remembered that in the same time the increase of our population was 351 per cent., and of the production of wheat not quite seventy per

Extening Journal. RATHER PERSONAL ON P. PE correspondent of the Chicago Times, writing from Holly Springs, tells it. News came to the chaplain of the - Regiment that a good Union soldier was given up by his surgeon, considered in a dying condition, and desired spiritual consultation. The chaplain as in duty bound, went to see him, sat down by his cot, and talked of death and the resurrection, and finally opened the Bible at random to read a chapter for the dying man's consolation .-The book opened at the account of Samson's slaying so many Philistines with the jawbone wounding a number, and capturing a captain and of an ass. At the conclusion, the soldier asked what book he read that from. The chap-lain replied. "My dear friend, it is the Word of God." The soldier requested him to read it again, and at its conclusion asked to see and read the chapter himself. The chaplain handed him the Bible, when he exclaimed, "Oh dear! my eyes are so dim I can't read; but tell me, chaplain, honestly, isn't General John Pope's name at the bottom of the chapter?

REPORT OF THE DIRECTORS OF THE Farmers' Mutual Insurance Company,

For the Year 1862. TN accordance with a long established custom, the lirectors of the Farmers' Mutual Insurance Company, present to the members of said Company, at their annual meeting on the 27th day of December. A. D. 1862, a report of the proceedings of the Rosel duples the way. cember, A. D. 1862, a report of the proceedings of the Board during the year.

In the transaction of their business, in connection with the Company, the Board have met with nothing that seemed to justify the suggestion of any amendment of thir By-laws or alteration in the mode of conducting the affairs of the company; the former being well adapted to carry cut the object and intentions of the institution, and the latter greatly facilitating the execution of those benevolent views and feelings that prompted the organization of the Company.

benevolent views and feelings that prompted the or-ganization of the Company.

If the Company were at present to be organized anew, the experience of the present Board might probably suggest some alterations, but they would be of minor im-portance, and in the present condition of the Company could not be introduced without encountering difficul-ties that could be more than commensurate with the advantages that might result there from. One of the main difficulties which the Board have to contend with, is the constitution of the collection. main difficulties which the Board have to contend with, is the scarcity of small change to facilitate the collection of small sums of money. But as this is a matter that no action of the Board can affect, it must be borne with patience, like other grievarces of the times, until a remedy is dwised by some other means.

The disasters by fire, during the past year in property insured by this company have been considerable in number_dhourh with one exception, the losses have been moderate in amount, and some of them, as will be seen by the Treasurer's report, quite small. Most of the occurrences were supposed to be entirely accidental. In one instance (Denlinger's Barn.) the fire resulted from the action of small children, having k ndled a fire near the Barn for their town amusement, without seening sensible of the danger to which they exposed their parent's property. And here it may not be out of place to observe, that the universal use of friction matches, and the losse manner in which they are kept and used, may not unfrequently be the cause of accidents by fire, observe, that the universal use of infection macraes, and the loose manner in which they are kept and used, may not unfrequently, be the cause of accidents by fire, when the origin thereof is unknown and unsuspected by the sufferers; and thus, what is admitted to be a great convenience, and has become an almost indispensible article in every family, may sometimes be the cause of a s-rious calamity

The first fire that occurred during the present year was on the 27th of January in the Barn of John Denlinger, in Millerstown, which caught from a fire kindled by children at play near the Barn. The Appraisers estimated the damages to the building and contents (which were entirely concumed) at the sum of One thousand and fifty-five dollars, of which three-fourths, being \$791.25, was paid by the company.

The rest large fire occurred in the Mill of Daniel Good, in Conestoga township, on the night of the 4th of February, by which the Mill was entirely destroyed. The loss of Mr. Good was estimated by the Appraisers at five thousand dollars three-fourths of which being three thousand seven hundred and fifty dellars was raid by the Company. No caneecould be assigned or

at five thousand dollars three-fourths of which being three thousand seven hundred and fifty d'llars was paid by the Compuny. No cause could be assigned or discovered from whence the fire originated. The fire broke out in the Mill room. where fire had been kept in a coal stone, and lights used during the evening, as usual, and probably a spark from one of those falling on dry combutible matter about the time the millers retired, may have caused the conflagration.

The next fire deemed worthy of notice in this report was in a house of Peter Stauffer's, in East Lampeter township, on the lith of August. The fire occurred in dry light, but the inmates could give no account of its origin. The appraisers laid the damages at five hundred Dellars, and the Company paid three-fourths of that sum, being \$375.

red Dellar, and the company possession being \$375.

On the 21-10 October a fire occurred in a tenant house of John Hildhirand, in Martic township, by which the building was outliefy consumed. The fire broke out in the upper part of the building in day links and is authored to that cought from the stove-Fight, and is the upper part of the building in query light, and is supposed the have count from the stove-pipe. The damage was laft at three hundred and eighty dollars by the appraisers, and a warrant has been granted by the Directo's fir three fourths of that amount, being two hundred and eighty-five dollars. This amount is not yet five, and of course has not been roll. This sinumit is not yet due, and of course has not been paid.

On the fire due of November, a log-weather-boarded smith shop of hed by Danlei Herr, (Pequea) in Strasburg township: was burned down. The origin of this fire is a mystery. It occurred in day light soon after the middle of the day. The building stood some distance from the dwelling house, was filled with tobaccohung up to dry, and had not been used as a shop for more than a week previous to the fire. This circumstance renders it certain that the disaster was not occasioned from fire necessarily and properly used in or about the building, whilst the location of the building, being at no great distance from the dwelling house,

being at no great distance from the dwelling house, surrounded by an open field and in full view of the public read, taken in connection with the fact that the fire occurred in broad day light, almost precludes the idea of it having been the work of an incendiary. Be that as it may, the Company, is well as the preprietor of the premises, made a narrow escape from serious loss, for, hat the wind blown in the direction of the other buildings, the fine dwelling house, 'rarn and other buildings of Mr. Herr must ine itably have become a prey to the devouring element. Mr. Herr's damage was estimated at Fifty Dollars. The appraisers were satisfied that his loss was more than that amount, but as that was the sum at which it was insured, they could not according to the By Laws of the Company, lay the damage higher than his own valuation. The Directors gave him a warrant for thirty-seven dollars and fifty cents. lea of it having been the work of an incendiary. Be The last fire which occurred during the past year was in the locabouse of John Weber, in Lanc-ster township, which took place on the night of the 17th inst. The house at the time was filed, or partially filled, with to-baces, hung up to dry. It is supposed that the building was designedly set on fire. The appraisers awarded damages to the amount of Four Hundred Dollars, and a warrant has been issued by the Directors for three-fourths of that amount.

EMPLOYMENT.-The Undersigned has, MPLOYMENT.-The Undersigned has, for several years past, been engaged in a business, which has yielded him at the rate of three thousand dollars per annum, and is now willing to teach it to others. The business is of highly useful and general character, adapted both to cities and willages, and one that any person of ordinary capacity, young or old, male or female, can aquite with a few hour's practice, and by which they can secure a very handsome income. Several young ladies who have received instructions from me, both in New York State and Pennsylvania, are earning upwards of \$15 per week by it, and there is no reason why any one else cannot do the same. Invalide even can do well by it, as it is no pedding sfair, but a but-iness that is perfectly respectable. Gentleman and indies of leisure who would like to learn the business for their own amusement or pleasure, will find the practice of it a pleasant restime, and one that they will take great interest in. On receipt of \$1, I will send printed instructions by which any person can readily acquire the art, and these instructions will also contain every particular relative to the carrying it on so that it will be highly profitable. The percheser of the "printed instructions" will also be authorized to teach it to others, and I have sometimes received as high as \$250. For teaching it personally to a single individual. I would sinte further that \$250 or \$3 will buy everthing that is necessary to commence the business with, and the srticles can be got almost anywhere, in city or country, or, if preferred, I can furnisa them.
