HAGER & BROTHERS. THE PATENT STAMP-SEALING AND POST-MARK PRESERVING ENVELOPE.

The PATENT STAMP-SEALING AND POST-MARK PRESERVING ENVELOPE.

The preservation on the letter itself of the POST-MARK and POSTAGE-STAMP, generally destroyed with the detached cover, has long been deemed a matter of the first importance. This desideratum is now triumphantly secured by this ingenious invention. Many obvious advantages must arise from the general use of this envelope.

First.—Increased Safety by additional sealing; the stamp connecting the sevelopes and letter securely together; and this is never liable to be omitted, though the aticking of the lap is frequently neglected or imperfectly done.

Scond—Security against Impertinent Intrusion; the letter and envelope being firmly attacked by the stamps, and inclosure cannot be impacted even if the flap be clandesticely opened. and inclesure cannot be inspected even if the flap be clan-destinely opened.

Third—Safety against Abstraction of Valuable Inclo-sures. If the flap be left unscaled, or opened with feloni-ous intent, it will be impossible to open the letter and take thence bank notes and drafts without so mutilating the envelope as to insure detection.

Furth—Security for the free payment of the Postage; as the stamp, when once properly placed in this window, cannot be removed without its destruction.

Fifth—Advantage therefore to the Government; by the effectual destruction of every stamp in its first use.

Sixh—Facility to the Post Office Deprations; by a uni-form location of the stamp in the upper right hand corner, which is the most convenient position for the Post Office mark. which is the most convenient position for the Post Office mark.

Screnth—Verification of the Mailing; by securing on the letter, itself the legal evidence of the time and place of it being mailed. This has long been esteemed so desirable, that many prudent persons are constrained to dispense with the use of envelopes, that they may have the post mark on the letter; and other stake the precaution to pin the envelope again on the letter for identification.

Highth—Certainty of the Data and Place on the Letter, which are so irequently omitted by writers in carelessness or hurry. or hurry.

Ninth—Ornamentation; which, though some may think
of small importance, certainly meets the approval of al of small importance, certainly meets the approval of all persons of taste.

Tenth—Cost. Notwithstanding the many and unrivalled advantages of the "Stamp realing Envelopes," they will be furnished at a very small advance upon the prices of those not having the benefit of this patent.

130 SOUTH WHARVES, PRILADELPHIA, PA.
This Company with a capital of \$150,000, the most extensive works of the kind in the world, and an experience in manufacturing of over 23 years, with a reputation long established, having also the exclusive control of all the night soil of the great city of New York, are prepared to turnish an article which is, without doubt, the cheapest and very best fer-ilizer in market. It greatly increases the yield, and ripens the crop from two to three weeks earlier, at an expense of from three to four dollars per acre, with little or no labor. Also, FIFTY TONS of BONE TAFEU, being a mixture of bone and night soil ground fine, at \$15 per ton—a superior article for grain and grass. Price of POUDRETTE, \$1.60 per barrel. Seven barrels and over delivered free of charge. A pamphlet containing all necessary information may be had free by addressing a letter to the subscriber. AMBES T.
