Correspondence of the Boston Courier.]
So bitter has been the course of the radicals, that they have, among other expedients, instigated organizations of women to aid them, and their newspapers have approved the plan of estracising Democratis in trade and business, and even in the church. The worst revolutionary principles have been acted on to set neighbor against neighbor, and even to array wives against their husbands. Facts, almost to monstrous for belief, might be mentioned to sustain this assertion, and involving not merely the violent obscure politicians of the Republican organization, but the families of some who hold the position of leaders. In Windham county, and in some parts of this county, the Republican shave declared that they will buy no more meat of Democratic butchers, no more goods of the concratic storekeepers.

Again, employers in many instances tyrned away men who refused to vote for Buckingham. But the more significant revelations of what Abolitionism really is, were to come.

About twelve days ago that party had completed a canvass of the State, which elected Seymour by, it is said, some 2,500. Then it was resolved, in the language of General Nye, one of their important speakers, "to buy up the d-d State;" and a fund of \$50,000 was raised in New York for this purpose, which was increased to \$100,000, (the Postmaster of New Haven being among the active workers in raising the money.)

The Ironsides and Keckuk withdrew at 4 o'clock apparently disabled. Intense excitement prevails in the city. Our casualties are one boy killed and five men badly wounded in Sumter. The other batteries have not been heard from.

It was, however, speedily found that men would not, as a general thing, be bought. Offers of \$75 and result for votes, were made to poor men, and referred to the standard for t

each for votes, were made to poor men, and refused.

Then an arrangement was made with the War Department at Washington, to send home all the Republican soldiers in the army that could be got here in time to vote. The Secretary of War agreed to get them here without the tardy informalities of the usual furloughs, and every man who would promise to vote for Buckingham was hurried on. Trains of cars were filled with them, from Tuesday to Saturday. It is said 2,000 have been brought into the State, and all selected in this one-sided way—no Democrats being allowed to come.

But this was not enough. It was found that even this would not save the "Republican party." Another turn of the screw was necessary, in addition to all that had been done.

It came, in the shape of direct action on the next.

It came, in the shape of direct action on the part of the Administration at Washington, viz: an order to coerce all workmen employed in factories where arms, or clothing, buttons, &c., were made for

army purposes.

This "last card" was reserved for the "last play," and was not exhibited until last evening, when it was too late to expose or counteract it. Brigadier General Ripley, of the Ordnance Department, was sent on from Washington, and he called together all the contractors in Colt's factory, last evening, and expressed the wish of "the Government stores there.

ose would not be known until exhibited

"We will declare it as our honest, deliberate conviction, that the war in which we are engaged is rapidly ceasing to be a war to coerce the seceded States back into the Union, and becoming a war, on the part of the administration and its party, against the rights and liberties of the States and people of the North, with a view to continue political power, with its immense and corrupting patronage, in the hands of those who now possess and wield it. The war upon the South is kept up, very obviously, as a cover under which the Republicans may hide their designs to carry the coming elections in the loyal States. It affords the partisans of the administration an occasion to make the most powerful appeals to the people for support. It furnishes them, at the same time, with the pecuniary means to corrupt the masses. It justifies them in keeping up an enormous military force, which they may employ to suppress a free exercise of the right of suffrage, while, under the ploa of "military necessity," it gives an apparent sanction to Executive measures which, in suppressing free speech and a free press, tend to destroy all freedom of popular protest and action "We will declare it as our honest, deliberate con stopy all freedom of popular protest and action against the men and the party who are ruining the country. THE YELLOW FEVER .- A New Orleans correspondent of the New York Times writes: The news from the Gulf is, that the yellow fever is already assuming a malignant form in the extreme South, and everything promises that it will be bad "everywhere." The impression prevails here among all classes of people that it will this summer reach New Orleans. It was worse than any previous year in this city in 1853. The city was exempt until 1858, when it was very bad. Exemption has followed until the fifth summer is now approaching, and the idea is that it mus

SCIENTIFIC AMERICAN

THE BEST MECHANICAL PAPER IN THE WORLD. EIGHTEENTH YEAR. VOLUME VIII -- NEW SERIES.

A new volume of this popular Journal commences on the first of January. It is published weekly, and every number contains sixteen pages of useful information, and from fire to ter original negravings of new involutions, discoverios, all of which are prepared expressly for lumus.
TO THE MECHANIC AND MANUFACTURER. TO THE MECHANIC AND MANUFACTURES.

No person edgaged in any of the mechanical or manufacturing pursuits should think of "doing without" the Scientific American. It costs but six cents per week: every number contains from six to ten engravings of new machines and inventions, which can not be found in any other publication.

TO THE INVENTOR.

other publication.

TO THE INVENTOR.

The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the Claims of all the number contains an Official List of the Claims of all the Patent-tissued from the United States Patent Office during the weak provious; thus giving a correct history of the progress of inventions in this country. We are also reciring, every week, the best scientific journals of Great Britain, France and Germany; thus placing in our possession all that is transpiring in machanical science and art in these old countries. We shall continue to transfer to our columns copious extracts from these journals of whatever we may deem of interest to our readers.

A pamphiet of instruction as to the best mode of obtaining Letters Patent on new inventions, is furnished free on application. free on application.

Meesrs. Munn & Co., have acted as Patent Solicitors for more than seventeen years, in connection with the publication of the Scientific American, and they refer to 20,000 patentees for whom they have done business.

No charge is made for examining sketches and models or new inventions and for advising inventors as to their new inventions and for advising inventors as to their patentability.

CHEMISTS, ARCHITECTS, MILLWRIGHTS AND FARMERS.

The Scientific Amerkan will be found a most useful journal to them. All the new discoveries in the science of the architect and carpenter are not overlooked; all the new inventions and discoveries appetaining to these pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights and mill-owners will be found in the Scientific American, which information they can not possibly obtain from any other source. Subjects in which farmers are interested will be found discussed in the Scientific American, meet of the improvements in agricultural implements being illustrated in its columns.

SOMETHING SEW:

THE PATENT STAMP-SHALING AND POST-MARK PRESERVING ENVELOPE.

The preservation on the letter itself of the POST-MARK and POSTAGE-STAMP, generally destroyed with the detached cover, has long been deemed a matter of the first importance. This desideratum is now triumphantly secured by this ingenious invention. Many obvious advantages must arise from the general use of this envelope.

First.—Increased Safety by additional sealing; the stamp connecting the envelope and letter securely together; and this is nerve liable to be omitted, though the sticking of the flap is frequently neglected or imperfectly done.

Second—Security against impertinent Intrusion; of the flap is frequently neglected or imperfectly done.

Second—Security against impertinent Intrusion; and inclosure cannot be impected even if the flap be clandestinely opened.

and inclosure cannot be inspected even if the flap be clau-destinely opened.

Third—Safety against Abstraction of Valuable Inclo-sures. If the flap be left unscaled, or opened with feloni-ons intent, it will be impossible to open the letter and take thence bank notes and drafts without so mutilating the envelope as to insure detection.

Borth—Security for the free navment of the Postage. cannot be removed without its destruction.

#\(\text{M} \) \(\text{Advantage therefore to the Government; by the effectual destruction of every stamp in its first use.

#\(\text{M} \text{M} \) \(\text{Pacility to the Post Office Diperations; by a unform location of the stamp in the upper right hand corner, which is the most convenient position for the Post Office ark.
Screnth—Verification of the Mailing; by securing on the Screnth—Verification of the Mailing; by securing on the letter itself the legal evidence of the time and place of it being mailed. This has long been esteemed so desirable, that many prudent persons are constrained to dispense with the use of envelopes, that they may have the post mark on the letter; and others take the precaution to pin the envelope again on the letter for identification.

Eighth—Certainty of the Date and Place on the Letter, which are so frequently omitted by writers in carelessness or hurry.

COMPOUND EXTRACT OF

This preparation is particularly recommended to the MEDICAL PROFESSION and the PUBLIC, as combining, in the most convenient and efficacious form, the well-established virtues and properties of Cubebs and Copalba. For the speedy and effection relief and cure of all SEXUAL DISEASES, it may justly be considered one of the greatest and most valuable discoveries in the annals of medicine, frequently effecting a cure in three or four days. In its preparation as an extract or a paste, the usual nauseous taste is avoided, and it is, consequently, never found to interfere with the digrestion, while, from its greater on-contration, the dose is much reduced. It may be relied on as the best mode for the administration of these remedies in the large class of diseases of both sexes to which they are applicable.

N. B.—Purchasers are advised to ask for TARRANT'S COMPOUND EXTRAOT OF CUBEBS AND COPAIBA. Prepared and sold wholesale and retail, by
