Borce Dod' Imperial Wine Bitters, and in this short period they have given such universal satisfaction to the many thousands of persons who have tried them that it is now an estab-lished article. The amount of bodily and mental misery arising simply from a neglect of small complaints is sur prising, and it is therefore of the utmost importance that a strict attention to the least and most triflug bodily ail-ment ahould be had; for diseases of the body must invari-ably affect the mind. It speaks for itself: NETFORMED and the select of the function of the select dughter, a girl of filten years of ago, was attacked with paralysis, which confined her to her bed, where she lay perfortly helpless and suffering the greatest pain. I pro-cured the attendance of our medical men in the neighbor-hood, but, in spite of their best efforts, she grew daily worse and worse. She was to helpless that it was impossi-ble for har to sit up, erean when prooped by pillows, for when, to ease her, we would raise her up, she would fail over backwards, or lie on one side or the other, and indeed had no strength or power or control over her motions at all. On the 26th of last month, by the advice of Henry Minnich, I came to see you, and from what you told me, I concluded to try your Herb Bitters. I took a bottle out home with me, and my dasgibter commenced taking it. She has used that bottle, and the effect is so great that I want to take out some more with me, and I am confident now that what you told me was perfectly true, and that in dran stand on her feet, without any pair, it he can raise her hands to her head, and remains out of bed most of the thar is nothing I would not give to precure it. To be assured of this, it is only necessary to make the trial. The wine itsaff is of a very superior quality, being about one-third stronger than other wines; warming and invigor ating the whole system from the head to the feet. As these Bitters are tonic and alterative in their character, so they strengthen and invigorate the whole system and give a general warmth.
