Miscellancous.

MESSAGE OF JEFFERSON DAVIS. He Recommends the Employment

Negroes in Pioneer and Engineer Situation—Foreign Relations and N cotiations for Peace. To the Senate and House of Representatives of the Confederate States of America :

It is with satisfaction that I welcome your sence at an earlier day than that usua for your session, and with confidence that I invoke the aid of your counsels at a time I invoke the aid of your counsels at a time of such public exigency. The campaign which was commensed almost simultaneously with your session early in May last, and which was still in progress at your adjournment in the middle of June, has not yet reached its close. It has been prosecuted on a scale and with an energy heretofore unequalled. When we revert to the condition of the contract of the contract of the condition of the state of the contract of the condition of the condi unequalled. When we revert to the condi-tion of our country at the inception of the operations of the present year, to the mag-nitude of the preparations made by the enemy, the number of his forces, the accu-mulation of his warlike supplies, and the prodigality with which his vast resources have been lavished in the attempt to render success assured; when we contras bers and means at our disposal for resist and when we contemplate results of a struggle apparently so unequal, we cannot fail. while rendering the full meed of deved praise to our generals and soldiers to perceive that a Power nigner than has willed our deliverance, and gratefully to recognize the protection of a kind Province of the protection of the prot dence in enabling us successfully to with-stand the utmost efforts of the enemy for our subjugation.

At the beginning of the year the State of Texas was partially in possession of the enemy, and large portions of Louisiana and Arkansas lay apparently defenceless. Of the Federal soldiers who invaded Texas, ers of war. In Northwestern Louisiana a large and well-appointed army, aided by a powerful fleet, was repeatedly defeated, and deemed itself fortunate in finally escaping with a loss of one-third of its number, a rtion of its military trains, and man large portion of its military trains, and many transports and gunboats. The enemy's occupation of that State is reduced to the occupation of that State is reduced to the narrow district commanded by the gins of his fleet. Arkansas has been recovered, with the exception of a few fortified posts, while our forces have penetrated into central Missouri, affording to our oppressed brethren in that State an opportunity, of which many have availed themselves, of striking for liberation from the tyranny to which they

a roctation from the tyranny to which they ave been subjected. On the east of the Mississippi, in spite of On the east of the Mississippi, in spite of some reverses, we have much cause for gratulation. The enemy hoped to effect during the present year, by concentration of forces, the conquest which he had previously failed to accomplish by more extended operations. Compelled, therefore, to with draw or seriously weaken the strength of the armies of occupation at different points, he has afforded us the opportunity of recov-ering possession of extensive districts of our territory. Nearly the whole of North-ern and Western Mississippi, of Northern Alabama, and of Western Tennessee are again in our possession; and all attempts on these States have been balled. On the entire occan and gulf coast of the Confede-racy the whole success of the enemy, with the enormous naval resources at his com-mend has been limited to the capture of the fraw or seriously weaken the strength o and, has been limited to the capture of the er defences of Mobile Bay.
I'we now turn to the results accomplish-

If we now turn to the results accomprised by the two great armies, so confidently relied on by the invaders as sufficient to secure the subversion of our Government and the subjection of our people to foreign domination, we have still greater cause for South the subjection of the subjection of South devout gratitude to Divine power.' In South vestern Virginia, successive armies which hreatened the capture of Lynchburg and Saltyille have been routed and driven out Saltville have been routed and drivenous of the country, and a portion of Eastern Tennessee reconquered by our troops. In Northern Virginia extensive districts, formerly occupied by the enemy, are now free from their presence. In the lower Valley, their General, rendered desperate by his from their presence. In the lower Va their General, rendered desperate by inability to maintain a hostile occupanability to maintain a hostile occupation has resorted to the infamous expedient o mus resorted to the mandate experience, to onverting a fruitful land into a desert by burning its mills, granaries and homesteads and destroying the food, standing crops, live stock and agricultural implements of peaceful non-combatants. The main army, after a series of defeats in which its losses have been enormus; after a stremats by have been enormous; after attempts raiding parties to break up our railro communications, which have resulted the destruction of a large part of the cavalry engaged in the work; after constant repulse repeated assaults on our defensive lines with the aid of heavy reinforcements but with, it is hoped, waning prospect of further progress in the design, still engaged in an effort, commenced more than four months ago, to capture the town of Peters-

The army of General–Sherman, although thining possession of Allanta, has been unable to secure any ultimate advantage from this success. The same general who, in February last, marched a large army from Vicksburg to Meridian with no other result than being forced to march back again, was able, by the aid of greatly increased numbers, and after much delay, to force a passage from Chattanooga to Atlanta, only to for the second time compelled to withdraw on the line of his advance, without obtaining control of a single mile of territory beyond the narrow track of his march, and without gaining aught beyond the precarious possession of a few fortified points in which he is compelled to maintain heavy garrisons, and which are menaced with re-

The lessons afforded by the history of this war are fraught with instruction and encouragement. Repeatedly during the war encouragement. Repeatedly during the war have formidable expeditions been directed by the enemy against points ignorantly supposed to be of vital importance to the Confederacy. Some of these expeditions have, at immense cost, been successful, but in no instance have the promised fruits been reaped. Again, in the present campaign, was the delusion fondly cherished that the capture of Atlanta and Richmond would, if effected end the war by the overthrow of effected, end the war by the overthrow of our Gövernment and submission of our our Gövernment and submission of our people. We can now judge by experience how unimportant is the influence of the former event upon our capacity for defence, upon the courage and spirit of the people, and the stability of the Government. We may, in like manner, judge that if the campaign against Richmond had resulted in success instead of failure; if the valor of the army, under the leadership of its accomplished comleadership of its accomplished commander, had rêsisted in vain the overwhelm ing masses which were, on the contrary, decisively repulsed; if we had been com-pelled to evacuate Richmond as well as Atanna, the Confederacy would have remained as erect and defiant as ever. Nothing could have been changed in the purpose of its Government, in the indomnitable valor of its troops, or in the unquenchable spirit of its people. The baffled and disappointed foe would in vain have scanned the report for would in vain have scanned the reports of your proceedings, at some new legislative seat, for any indication that progress had been made in his gigantic task of conquering a free people. The truth so patent to us must ere long he forced upon the reluctant Northern mind. There are no vital points on the preservation of which the continued existence of the Confederacy depends. There is no military success of the enemy which can accomplish its destrucenemy which can accomplish its destruc-tion. Not the fall of Richmond, nor Wiltion. Not the fall of Richmond, nor Wil-mington, nor Charleston, nor Savannah, nor Mobile, nor of all combined, can save the enemy from the constant and exhaust-ing drain of blood and treasure which must continue until he shall acknowledge that no peace is attainable unless based on the re-cognition of our indefensible rights. Before leaving this subject, it is gratify-ing to assure you that the supplies essen-tially requisite for public defence will be found, as heretofore, adequate to our needs; heretofore, adequate to our needs and that abundant crops have rewarded the labor of the farmer, and rendered abortive the inhuman attempt of the enemy to produce, by devastation, famine among the

FOREIGN RELATION.

It is not in my power to announce any change in the conduct of foreign Powers. No such action has been taken by the Christian nations of Europe as might justly have been expected from their history, from the duties imposed by international law, and from the claims of humanity. It is charitable to attribute their conduct to no worse motive than indifference to the consequences of a struggle which shakes only the republican portion of the American continent; and not to ascribe to design a course calculated to insure the prolongation of hostilities.

No instance in history is remembered by many which a nation prepading to exercise me in which a nation pretending to exercis dominion over another, asserting its inde-pendence, has been the first to concede the pendence, has been the first to concede the existence of such independence. No case can be called to my mind in which neutral Powers have failed to set the example of recognizing the independence of a nation, when satisfied of the inability of its enemy to subvert its Government; and this, too, in cases where the previous relation between the contending parties had been confessedly that of other mother country and dependent colony; not, as in our case, that of cothat of other mother country and dependent colony; not, as in our case, that of coequal States united by Federal compact. It has ever been considered the proper function and duty of neutral Powers to perform the office of judging whether in point of fact the nation asserting dominion is able to make good its pretensions by force of arms, and if not by recognition of the resisting party, to discounterance the further continuance of discountenance the further contin the contest. And the reason why this duty is incumbent on neutral Powers is plainly apparent, when we reflect that the pride and apparent, when we reflect that the pride and passion which blind the judgment of the parties to the conflict cause the continuance of active warfare, and consequent useless slaughter, long after the inevitable result has become apparent to all not engaged in the struggle. So long, therefore, as neutral nations fail by recognition of our independence to announce that, in their judgment, the United States are unable to reduce the the United States are unable to reduce the Confederacy to submission, their conduct Confederacy to submission, their conduct will be accepted by our enemies as a tacit encouragement to continue their efforts, and as an implied assurance that belief is entertained by neutral nations in the success of their designs. A direct stimulus, whether intentional or not, is thus applied to securing a continuance of a carrage and devasta-

tion which desolate this continent, and which they profess deeply to deplore.

The disregard of this just, humane, and Christian public duty, by the nations of Europe is the more remarkable from the fact that authentic expression has long since been given by the Governments of both France and England to the conviction that the United States are unable to conquer the Confederacy. It is now more two years since the Government of France announced officially to the Cabinets of London and St. Petersburg its own conclusion that the United States were unable to

The recommendations of the report for the repeal of certain provisions of the tax laws, which produced inequality in the burden of taxation; for exempting all Government loans from taxation on capital, and from any adverse discrimination in taxation on income deprived from them; for placing the taxation on banks on the same footing as on other corporate bodies; for securing the payment into the treasury of that portion of the bank circulation which is liable to confiscation because held by alien enemies; for the couversion of the interest-bearing treasury notes now outstanding into coupon bonds, and for the quarterly collection of taxation—all present practical questions for legislation, which, if wisely devised, will greatly improve the public credit, and alleviate the burdens now imposed by the extreme and unnecessary depreciation in the

treme and unnecessary depreciation in the value of the currency.

The returns of the Produce Loan Bureau are submitted with the report and the information is conveyed that the Treasury Agency in the trans-Mississippi Department has been fully organized, and is now in operation with promise of efficiency and

iccess. The provisions heretofore made to some The provisions heretotore made to some extent for increasing the compensation of public officers, civil and military, is found to be in some places inadequate to their support; perhaps not more so anywhere than in Richmond, and inquiry, with a view to appropriate remedy, is suggested to your consideration. Your notice is also called to the condition of certain officers of the Treasury who were omitted in the laws heretofore passed for the relief of other public officers, as mentioned in the report of ic officers, as mentioned in the report of he Secretary of the Treasury.

The condition of the various branches of The condition of the various branches of the military service is stated in the accom-panying report of the Secretary of War.— Among the suggestions made for legislative action with a view to aid to the numbers and efficiency of the army, all of which will

esolate this continent, and which receive your consideration, there are some by been trained to labor, and as a rlaborer, prominent topics which inerit special notice. for the white man accustomed from his prominent topics which merit special notice.

The exemption from military duty now accorded by law to all persons engaged in certain specified pursuits or professions is shown by experience to be unwise, nor is it believed to be defensible in theory. The defence of home, family, and country is universally recognized as the paramount political duty of every member of society; and in a form of government like ours, where each citizen enjoys an equality of rights and privileges, nothing can be more invidious than an unequal distribution of duties and obligation. No pursuit, no position should relieve any one who is able to do active duty from enrolment in the army, unless his functions of services are more useful to the defence of his country in another sphere. But it is manifest that this cannot be the quet the Confedency. It is now more two years since the Government of France annomated officially to the own confension in a form of spore question should be the the confedence of the property of the spore of the property of the property

to while delviou in the first of lest month thank to fairly ensidered to have been 81, 126,881,963.

The increase of the public delst during the six months from the 1st April to the 1st October, was 87,63,673, being rather more than \$16,000,000 per month, and it will be apparent, on a perusual of the eport, that this augmentation would have been avoided, and no positive reduction of the amount would have been avoided, and no positive reduction of the amount would have been avoided. In the subject of the finances, which are on in earlier to the first of the finances, which are on in the report, and which seem to admit of easy remedy.

In the statements just made the foreign debt is omitted. It consists only of the unpaid balance of the lean known as the ordinal bala

by the different departments of the tovernement, according to the estimates submitted with the report, for the six mounts sets/192, 1679, while the Secretary estimates that there will remain unexpended, out of former appropriations, on the let of January, 1855, a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a balance of \$867, 340, 234. It would not be a sumeth in excess of actual expenditures as has herefolore been the case-penditures as has herefolored been the case-penditures as has the penditures as has herefolored been the case-penditures as has been penditures as has

Beyond this limit and these employments it does not seem to me desirable, under existing circumstances, togo. A broad moral distinction exists between the use of slaves as soldiers in the defence of their homes, and the incitement of the same persons to incurrent meaning their masters. The and the incitement of the same persons to insurrection against their masters. The one is justifiable if necessary; the other is iniquitous and unworthy of a civilized people; and such is the judgment of all writers on public law, as well as that expressed and insisted on by our enemies in all wars prior to that now waged against us. By none have the practices, of which they are now guilty, been denounced with greater severity than themselves in the two wars with Great Britain in the last and in the severity than themselves in the two wars with Great Britain in the last and in the present century; and in the Declaration of Independence of 1776, when enumeration was made of the wrongs which justified the revolt from Great Britain, the climax of atrocity was deemed to be reached only when the English monarch was denounced as having "excited domestic insurrection

as ,having "excited domestic insurrection amongst us." The subject is to be viewed by us, there-The subject is to be viewed by us, therefore, solely in the light of policy and our so-eial economy. When so regarded, I must dissent from those who advise a general levy and arming of the slaves for the duty of soldiers. Until our white population shall prove insufficient for the armies we require and can afford to keep in the field, to

Agricultural.

A GRICULTURAL CHEMICAL CO.S (HEAP FERTILIZERS.

PA B ULETTE:
This Fertilizer is composed of night soil and the fertilizing elements of urine, combined chemically and mechanically with other valuable fertilizing agents and absorbents.
It is reduced to a pulverulent condition, ready for immediate use, and without loss of its highly nitrogenous fertilizing properties.

Its universal applicability to all crops a soils, and its durability and active qualiti are well known to be all that agriculturists e desire.

Price \$25 Per Ton.
CHEMICAL CONPOST.

This Fertilizer is largely composed of animal natter, such as meat, bone, fish, leather, hair, and wood, together with chemicals and inorganic fertilizers, which decompose the mass, and retain the nitrogenous elements. It is thoroughly impregnated with urine, and the thinner portions of night soil.

It is a very valuable terrilizer for field crops generally, and especially for potatoes and garden purposes.

Its excellent qualities, strength and cheap-

den purposes.

Its excellent qualities, strength and cheness, have made it very popular with those w

ness, have made it very popular with those who have used it.

Price, \$25 per Ton.

TREE AND FRUIT FERTILIZER.

It is a highly phosphatic fertilizer, and is particularly adapted for the cultivation of trees, fruits, lawns and flowers. It will promote a very vigorous and healthy growth of wood and fruit, and largely increase the quantity and perfect the maturity of the fruit. For hothouses and household plants and flowers, it will be found an indispensable article to secure their greatest perfection. It will prevent and cure diseased conditions of the peach and grape and is excellent for grass and lawns.

The fornula or method of combining its constituent fertilizing ingredients have received the highest approval of eminent chemists and scientific agriculturists.

Price, \$50 per Ton.

scientific agriculturists.

Price, 50 per Ton.

HHOSPHATE OF LIME.

The Agricultural Chemical company manufacture a Phosphate of Lime in accordance with a new and valuable formula, by which a very superior article is produced, so as to be afforded at a less price than any other manufacturers charge. Practical tests have proved that its value, as a fertilizer, is equal to the best Phosphate of Lime in the market.

Price, 55 per Ton.

phate of Lime in the market.

Price, \$5 per Ton.

JOHN A. TRYER'S WIFE, Lancaster, was cured of Liver Complaint and loss of appetite by the Bitters. DAVID POTTS, near Laneaster, testifies that the Ritters cured him of a sevens attack of Rheumatiam.

Medical

TO ALL INVALIDSI TRON IN THE BLOOD.

It is well known to the medical profession that IRON is the vital Principle or Life Element of the blood. This is derived chiefly from the food we cat, but if the food is not properly digested, or if, from any cause whatev r, the necessary quantity of iron is not taken into the circulation, or becomes reduced, the whole system suffers. The bad blood will irritate the heart, will clog up the lungs, will stupely the brain, will obstruct the liver, and will send its disease producing elements to all parts of the system, and every one will suffer in whatever organ may be predisposed to disease.

The great value of IRON AS A MEDICINE

is well known and acknowledged by all medical men. The difficulty has been to obtain such a preparation of it as will enter the circulation and assimilate at once with the blood. This point, says Dr. Hayes, Massachusetts State Chemist, has been attained in the Peruvian Syrup, by combination in a way before unknown. THE PERUVIAN SYRUP

Is a Protected solution of the Protoxide of Iron. A New Discovery in Medicine that strikes at the root of Discase by supplying the blood with its Vital Principle of Life Element—Iron. THE PERUVIAN SYRUP Cures Dyspepsia, Liver Complaint, Dropsy, Fever and Ague, Loss of Energy, Low Spirits. THE PERUVIAN SYRUP Infuses strength, vigor, and new life into the system, and builds up an "Iron Constitution." THE PERUVIAN SYRUP

Cures Nervous Affections, Female Complaints, and all diseases of the Kidneys and Bladder. THE PERUVIAN SYRUP Is a Specific for all diseases originating in a Bad State of the Blood, or accompanied by De-bility or a Low State of the System. Pamphlets containing certificates of cures and recommendations from some of the most eminent Physicians, Clergymen and others, will be sent Free to any address. B. L. FAHNESTOCK'S

VERMIFUGE AND CONFECTIONS

B. L. FAHNESTOCK'S

V = E - R - M - I - F - U - G - E

DEAR SIR: We take much pleasure in assuring you that there is no Vermifuge now in use that we think equals yours as a WORM DESTROYER. We have sold it largely at retail, and with uniform success. We are Druggist and Physicians, and have prescribed lifer our patients, and have been well satisfied with its effects.

May 24 lyw20;

SAXTON & BRAGG.

B. FAHNESTOCK'S

WORM CONFECTIONS
Are prepared from the active principle of his celebrated Vermifuge. They are put up in nice and palatable form, to suit the taste of those who cannot conveniently take the Vermifuge. Children will take them without trouble. They are an effective Worm destroyer, and may be given to the most delicate child.

Prepared and sold by B. L. FAHNESTOCK & CO., Sole Proprietors, 75 and 78 Wood and 91 Fourth Streets, Pittsburg, Pa.

Sold by Druggists and Medicine Deaders gerally.

1 have been cured since November, 1802, by the various modifications of Electricity as ap-plied at the Electrical Institute on Orangs street, between Duke and Lime streets, Lan-custer, Pa. caster, Pa. NOT ONE CERTIFICATE
has been published since the Electrical Institute has been established in Lancaster, but this
system of practice has been left to sink or swim
upon

upon ITS OWN MERITS.
Some of the most respectable and substantial etizens of Lancaster county, have been treated and cured, as can be seen by reference to themselves, or the books of the Institute.

DISEASES

and cured, as can be seen by reference to themselves, or the books of the Institute.

DISEASES
of every kind have been treated successfully, and in a number of instances, after all other systems and medicines had failed, and the individuals had been pronounced incurable and GIVEN UP TO DIE.

Pulmonary Consumption, Liver Diseases, Dinbetis, Piles, Dyspepsia, Catarrib, Paralysis, Hemiplegia and Paraplegia, Hemeopia, Aphonia, Laryngitis, Trachelismus, and all diseases of the throat and vocal organs, Bronchitts and Pleuritis, Neuralgia, Sciatic, Spinal Wenkiness, Epilesy, when arising from functional disturbances of the Organism; Chorea or St. Vitus Dance, complaints incident to Females, and especially

PROLAPSUS UTERI

or falling down of the Utens, can be permanently cured, and all nervous affections yield to the action of the Galvanie and Electric currents, when properly applied.

One would be ied to suppose, from the practical demonstration given of the wonderful healing properties of Galvanism in the above disenses, that its efficacy as a Therapeutic would be doubted by no one, and yet we occasionally come across an individual who will not believe, simply because the Medical Faculty, as a general thing, have not taken hold of it, to them we would say that there is hardly a Braithwait's Retrospect published but what refers the healing properties of Electricity, and that if the faculty understood more about it they would prefer it to all other remedies, also, that some of the best Physicians in the United States have adopted it. Hereafter, however, in order to graitfy all, therewill be at the lastitut and menment Physicians in the businessed of all classes to call and examine into the merits of all classes to call and examine into the merits of and we cordially invite the diseased of classes to call and examine into the merits this system, as consultation and advice, t gether with pamphlets, will be given Free Charge.
