# Rebels in Canada.

correspondent of the New York Herald gives the following account, which may or may not be truthful, of prominent Rebels who are still sojourning in Canada:

There are at present at Montreal, besides George Sanders, ex-Governor, Westcott, Beverly Tucker, Dr. Pallen, of Missouri, ex-Medical Director of the Western rebel army, and General Carroll, of Tennessee. All these gentlemen stop at the St. Lawrence Hall. EX-GOVERNOR WESTCOTT, THE MAN

WITHOUT A COUNTRY.

Ex-Governor Westcott is a quiet, ordinary looking old gentleman, some-what neglected in his dress, of consid-erable ability, a little soured in his temper, yet retaining the frank de-meanor of a gentleman. He professes to have very little association or sympathy with the more rabid Southerners says that he has done nothing except defend the St. Albans' raiders, which he justifies on the ground of his profes-sion, and declares that he should not hesitate to return home to-morrow, as the Government can have no charges against him. But he is evidently dis ssed in his mind, and declares that he has no country; that the United States government has killed his boys and taken from him all he loved, and that he only wants to spend the four or five years remaining to his life in peace. Does not his conscience sometimes tell him that upon him, and not upon the United States government rests the re-sponsibility of his bereavements; that his example and his advice shaped the career and dug the early graves of his sons? Yet one cannot but sympathize with the bereaved father, and mourn the terrible crime that entailed such suffering upon our countrymen.

THE NEGRO SUFFRAGE QUESTION.

Governor Westcott, like most of the Southerners here, favors the extension of the suffrage to the freedmen of the South. They are made free, he says; universal freedom has been proclaimed, and it is now a stultification to deny them the right to vote. He does not believe they will vote with their former masters, but they will give the South a larger basis of representation, and raise her in importance in the naand raise her in importance in the ha-tion. He is peculiarly bitter on the Democratic party. They are cowards and traitors too, he says, and he will never again in his life, if he votes at all, note for a Democrat. He will we take vote for a Democrat. He will vote for none but Republicans. There is no issue now, he argues, between the South and the Republicans. Slavery is gone—se-cession is forever dead. The South should now unite in keeping the Reing the restoration of Democratic as-

# cendency. BEVERLY TUCKER.

Beverly Tucker appears upon the scene at St. Lawrence Hall as fresh and hale as ever, and might well be mistaken for a comfortable, well-to-do English-man. His six feet one of height is well covered with flesh, and his sandy whis-kers, worn in "shoulder of mutton" style, with a moustache added, are profuse. He appears to take life easily, and is not yet, apparently, under the neces-sity of depriving himself of his champagne and his Burgundy, without which life would be to him unbearable. He is quite inoffensive—too lazy and too easeloving to do much mischief. The Government could well afford to let him eat and drink and sleep his life away wherever he might please; but he has a holy horror of fortresses and prison fare, and is not likely ever to be caught within the limits of the United States until free pardon is a certainty.

DR. PALLEN, OF MISSOURI.

Dr. Pallen, of Missouri, late Medical Director of the rebel Army of the West, is about thirty-five years of age, of pleasing manners, good acquirements and fine personal appearance. He has always ranked very high in his profes-sion, and has been elected honorary member of several societies throughout the States. He is very prompt to con-demn the acts of the raiders, the assassins and the hotel burners, and avows his detestation of any such mode of warfare or revenge. The charge o

New York Money and Stock Markets. A CORRESPONDENT OF THE HERALD writing from Montreal, in Canada, un-The Herald of yesterday says: "The bugbear of a tight money market der date of July 30, says there was no was revived with greater intensity than little excitement in that city at the time before, and the alarm spread. Many com- he wrote, on account of a reported atplained of greater difficulty in borrowtempt to abduct George L. Sanders. He ing at seven per cent than on yesterday; says:

gency is impossible, although great monetary activity and the present high rate of interest may prevail for a time." [From Yesterday's World.]

The bear operators in stocks are mak ing the most of what they call a "tight money market." The term is not cor-rect. The full market rate for call loans is seven per cent., and any good bor-rower can obtain all he wants at that As Government has been paying all along seven and three-tenths per cent. interest for its loans, and at sea-sons when stock-brokers were offered at five and six per cent. more than they could use, the inconsistency of calling an active demand for money at seven per cent. a "tight money market," what term ought to be applied to Gov-ernment loans paying seven and three-tenths per cent. all along? Furtherbut for an accident. more, the assistant treasury report of this city gives over sixty million dollars as the amount withdrawn from active circulation and remaining idle in that institution, and how much more institution, and how much more in other national depositories is known only to the Treasury De-partment and its favored friends.— The knowledge of these amounts locked

up in the national depositories is worth a great deal of money to speculators in gold and stocks, just so long as the facts are concealed from the public by the Treasury Department. In order to form some estimate of the enormous influence lian. brought to bear on the money and stock markets by the locking up of over sixty million dollars in the assistant treasury, let our mercantile readers reflect for a moment on the fact that the New York ity banks were forced into suspension of specie payments in 1557 by the loss of less than seven million doffers! What more satisfactory evidence can be ob-tained in regard to the enormous power of New York. of our present paper-money and bank expansion to advance prices and cheapen the rate for loans than the solitary fact that the assistant treasury of New York locked up in its vaults over sixty million dollars, and the sole results were publican party in power, and in prevent- an active demand for loans at seven per had ever paid in currency, and the knocking down of the stock market to

The stock market, since the panic and decline in March, which was brought about by a

morbid state of the public mind in re-gard to the effects of peace, has been steadily advancing, and the per cent. prices is now about twenty per cent. In other words, the enormous power for inflating the prices of stocks and all commoditie essed by over a thousand millions of paper-currency, made money by act of Congress, is steadily surging upward the prices of gold, stocks, and everything else. The condition of the Treasury condition of the Treasury Department renders contradiction of

the currency an impossibility in the face of the known views and policy of all who have influence with government. Mr. McCulloch, in his California letter, boldly commenced the advocacy of more unary mount and hundrowers of more paper money and bank expansion by july 194tw 28 denouncing as disloyal the State of Cali-fornia for adhering to gold and silver as he only legal currency. Mr. Jay Cooke in his pamphlet, issued under the es-pecial auspices of the Treasury Depart-ment at Washington, in which he proclaimed that "a national debt was a national blessing," also declared, boldly, that the country wanted at least a thousjuly 19 and millions more of national bank cur rency in order to render it rich and prosperous. The secret of our money and stock markets sustaining the withdrawal of over \$60,000,000 in money locked up in the assistant treasury is to be found in the enormou paper money issues of over a thousand millions, and the steady additions thereto of \$3,000,000 weekly in national bank currency, and the bank expansion of loans based on this huge mass o E Letters of Administration A. He is very moderate in his expressed views, and thinks the South should settle quietly down and do the best she can in obedience to the laws of the United States. #### GEORGE SANDERS.

It is almost unnecessary to say any-ning about George Sanders. He looks as he always does-is as fat and greasy as ever-as carelessly dressed-as full of self-sufficiency-and as ready to offer advice and assistance to the Democratic party or to act as special correspondent for Greeley. There is a rumor that the world does not wag very favorably financially, with George, and no doubt the *Tribune* could now secure his services at a very reasonable rate. He and the rest of the quasi-rebels here dethe rest of the quasi-revers here ue-nounce Jake Thompson very bitterly, and would not care if he should be caught and hanged. He spends nearly all his time in a saloon on King street, but is little noticed, even by the crowd that generally frequents a saloon. He denies that he is guilty of endeavoring to introduce the infected ragsinto New York and other Northern cities, but deems that it would have been quite a legitimate mode of warfare. He does not seem to entertain much hope of a pardon, or to fear that punish ment will overtake him. I asked a citizen of Toronto what means Dr. Blackburn possessed, or how he lived, and the reply was at all; he's a beat!" was concise-"Oh, none

### How to Dry Sweet Corn.

When the corn is in good condition for eating, the grains being fully grown, boil a quantity of ears just enough to cook the starch, and then let them cool and dry a few hours, and then shell or cut of the grains and spread them in the sun till dried. The best way to dry the corn is to nail a piece of cloth of very open texture on a frame, which, if two feet wide and five feet long, will be of a convenient size to handle. If the corn is spread upon this cloth it will dry quickly, without souring. It should be covered with a mosquito netting to keep

#### Wealth.

He is a great simpleton who imagines that the chief power of wealth is to supply wants. In ninety-nine cases out of a hundred it creates more wants than it supplies. Keen are the pangs of hunger, and sad is the spirit of him | eral hundred armed men. There are who is sinking into an early grave, for want of the common necessaries of life; but not less keen are the mortifications and cares of him, who, nursed in ease and luxury, is thrown, by circumstances, been made against him by Gen. Sher into dark perplexities, which his mental indolence cannot unravel, and who is reduced, even to an apprehension, of the want of those luxuries, which were to him more than life, A.
