A SPEECH FROM HON, THADDEUS STEY-ENS-RECONSTRUCTION, AS OPPOSED TO RESTORATION-MR. STEVENS' VIEWS OF THE FUTURE .--- The announcement that Mr. Stevens would deliver a speech at the Court House on Wednesday last, subject the state of the country, attracted a large crowd to hear him. Hon. A. L. Hayes was appointed President of the meeting; a longlist of Vice residents were appointed, together with a number of Secretaries. On motion of Major John A. Hiestand, of the Examiner, Mr. Stevens was requested to address the meeting. We can only give a brief synopsis of s address, which was long. Mr. Stevens read from carefully prepared inappiscript and occasionally slipped over a page so rapidly as to render it certain that all was not read which had been written. He said:

Fellow Citizens: In compliance with a re-quest I come before you to give my views of the condition of the rebel States, of the pro-per mode of treating them, and of the policy to be pursued by the government. During to be pursued by the government. During the long and bloody war through which we have just passed. I never had any doubt but that the loyal North would triumph: but since the surrender of the armies of South my heart has been saddened South my heart has been saddened by passing events. I fear the theory of recon-struction and dread the result of such ex-periment. By four long years of war we have overthrown the government establish-ed in the Southern States. Having subdued the armies which they arrayed against us we have the right of conquerors. It is ours to establish government over those States, it is our dury to sea that these government to establish government over those States, its our duty to see that those governments be in every sense of the word republican in form and spirit, that slavery be forever ex-cluded, and that no elements of future weakness or discord be left. To accomplish this the Constitution need not be infringed. It is our right as conquerors to inflict con lign punishment upon these our vanquish ed enemies. They must be weakened, their

ed enemies. They must be weakened, their property must be seized, contiscated and applied to relieving the nation from the burthens imposed upon it by the war. There are two theories prevailing. The one, looking at the revolted States us never having been out of the Union, proposes that they be regarded as restored thereto so soon as their people shall reconstruct their State as their people shall reconstruct their State governments; the other proposes to regard them as subjugated aliens and their terrritory as foreign territory conquered by force of arms. I consider that the revolted States of arms, I consider that the revolted States are estopped by their own most public acts from denying the trath of this latter theory. The ordinance of secession adopted by each State that seceeded declared their separation to be final. They raised vast armies, and set up a claim to recognized them as public recognized them as holling rents, block where nots and only governments. We recognized them as belligerents, blockaded their ports, and only claimed the right of excluding neutral vessels so far as our blockade was effective. We treated their armed cruizers as pri-We treated their armed cruizers as pri-vateers, and not as pirates; we received their soldiers as prisoners of war, and treat-ed them as such. For four years the gov-ernment set up by them was what it claim-ed to be, a *de facto government*, recognized as such by us and by all the nations of the world. To say that during all this time these States were in the Union is to antar these states were in the Union, is to utter an absurdity. If they were in the Union, no individual within their limits can be no individual within their limits can be tried for treason except by the United States Courts, within the district where the crime was committed, and by a jury of the vicin-age. Jeff. Davis could only be tried at Richmond for sending armies to lay Penn-sylvania in waste. It is there that ho did all he did in the premises, nor could he ever be convicted before an impartial jury chosen from that vicinity. A liney might be nockfrom that vicinity. A jury might be pack-ed to convict him, but that would be as foul ed to convict him, but that would be as foul a judicial murder as was that of Lord Rus-sel in England. This pernicious theory takes away from Congress all power to reg-ulate or reconstruct. What right, under such a theory, has any one to direct a Con-vention to be held for remodeling the Con-stitution of any one of the States. The attempt of the Executive to do this would be rank usurnation

e rank usurpation. The only safe plan is to hold these revolt-

The only safe plan is to hold these revolted States as conquered territory. Congress may then approve of their Constitutions and admit them, or it may refuse to receive them into the Union until they make their Constitutions square with the Declaration of Independence. Mr. Stevens declined to touch the question of negro suffrage. That subject he left in the same ambiguous position in which it has been placed by the Abolition State Convention.

He proceeded to argue more fully the doctrine that we have a right to treat the Southern States as conquered foreign terri-tory. He remarked: The Government at Washington must so regard it. I do not see how else they could persist in trying Wirz by Court Martial. He was acting undar orders as a solding. If the forers

ment does not regard the States lately in rebellion as conquered territory, the execu-tion of Wirz, after such trial, would be but judicial nurder. Mr. Stevens proceded to read extracts from Hallam, and other authors, showing what was the law in rela authors, showing what was the law in rela-tion to conquercot. The vanquished are admitted to be at the mercy of the victors. Life, liberty, property, are all forfeited, and at the mercy of the victors. While the extreme penalties are not now visited, the right to exact them will exist. Mr. Storens then yent on to arrue that Mr. Stevens then went on to argue that the heinousness of the rebellion warranted us in demanding satisfaction. He was not us in demanding satisfaction. He was not much in favor of sanguinary punishments; how many ought to die he could not say. Under the theory that they are conquered States and people, trials by courts martial would be legal, and they could do the work. He next proceeded to argue, at consider-able length, the proposition advanced by him in the State Convention, to confiscato the property of all rebels worth over \$10,000. The wealthy were the leaders. The poorer classes number nine-tenths of the popula-tion. Those in the revolted States who own over 200 acres of land are about sixty or over 200 acres of land are about sixty or seventy thousand. By conliscating the pro-perty of these the Government would have on hand three hundred and ninety-four on hand three hundred and ninety-four millions of acres of land, besides the town property of wealthy rebels. This he esti-mated would produce a sum of over three billions of dollars, which he proposed to apply to compensating those loyal area who lost property in the war, to providing homes for the negroes, to increasing the pensions of soldiers, and to the payment of a part of the national debt. He estimated that three-fourths of the debt He estimated that three-fourths of the debt might be thus liquidated. In regard to our debt he said: It is generally estimated at debt he said: It is generally estimated at four millions; in my opinion it will go far beyond that figure. There is no use in be-littleing it. It can only deceive the ig-noraut and those only for a time. It cannot deceive financiers, 'One half of it now bears interest; and the interest amounts to one hundred and twenty mil-lions per annum. The ordinary expenses of carrying on the government, and the sums required for the army and navy will swell our annual expenditures to five hunswell our annual expenditures to five hum dred millions of dollars. The amount de rived from Internal Revenue will diminist ived from Internal Revenue with dimensional -taxation must be double what it now is a most expanses. Can our people bear this -taxation must be double what it now is to meet expenses. Can our people bear this? It will be a curse from generation to gener-ation. We pity the tax ground Englishman. In reality we are worse off than he. Our debt is only a trifle less and it bears double the rate of interact. he rate of interest. In the future our bur-hens must be double his. If the restoration theory is to prevail. I would to God those who advocate it could see themselves as an

who advocate it could see themselves as an oppressed posterity will regard them. Mr. Stevens next proceeded to argue that if the restoration theory is to prevail not a single slave had yet been freed, and could not be by any act of the general govern-ment. The President spoke as a conqueror when he told the robel States they could not return until they had abolished slavery. Only by the right of conquest thas he any such power. Borus conventions might such power. Bogus conventions might abolish slavery in the South, no fairly eleeted convention ever would. Restora-tion would only smother up the rebellion,

tion would only smother up the rebellion, to break out anew. Mr. Stevens alluded to the plea for mercy to the women and children of the South; but argued that such feeling should not be al-lowed to influence us. He favored the most rigorous enforcement of his doctrine, even if it should drive all upon whom it operated into evile.

if it should drive all upon whom it operated into exile. He found time to give a portrait of the Blair family, which we shall take occa sion to publish as delivered. He wound up his address by admitting the difficulties to be encountered in carry-ing out his plan of reconstruction, as op-posed to restoration, but hoped they were not insurmountable. The power was with Congress, but there was danger that before it assembled irrepara-ble injury might be done; and men are unreliable at best. Members might readily be debanched by the plausability of the reconstruction theory. Still, he had the reconstruction theory. Still, he had

some hope. Mr. Stevens boldly avowed his belief that the very existence of the Republican party depended upon the rebel States being kept out of the Union for a while; their admis-sion would render the speedy triumph of the Democracy inevitable. With this he concluded concluded.

The meeting was sadly lacking in enthusiasm, and all present seemed bewildered and amazed at the troubles which were so plainly seen to environ their party. The breach between the discordant elements evidently too wide to be bridged over. There is open war in their ranks, and there can be no compromise. They see and feel this, and are filled with alarm, and well grounded apprehension of defeat and loss of power.

ROBBERY .- On Saturday afternoon last, a man named Isaac Bouder, well known in this vicinity for years past as an old and frequent offender, visited the beer saloon of Issachar Reese, on the Old Factory Boad, where an old man named Jacob Fralich. (an acquaintance of Mr. Reese's from the neighborhood of Strasburg,) was stopping and indulging pretty freely in lager. While under the influence of the beverage,

as Fralich alleges, Bouder took the advantage of him, by placing one of his arms and hands around his neck, and with the other hand he reached into his pocket and drew to arrange the routes or beats in the four wards of the city and the hours of service therefrom a wallet or pocket-book containing \$150 and some change. He was caught in the act by Mrs. Reese, who endeavored to interfere. After threatening to knock her down, he fled. Complaint was immediately entered before his Honor, the Mayor, who speedily issued a warrant for his rest, and placed it in the hands of Officer

Shroad. Officer Baker, however, who also had a warrant against him for the stealing of a horse, wagon, and a quantity of grain some time ago, received information about midnight, that Bouder had taken refuge in Potts' Hotel, at Witmer's Bridge, a short distance east of the city. He arrested him there between 12 and 1 o'clock on Sunday morning, and brought him to the city. He

was brought before the Mayor this morning, who committed him, in default of bail to the County Prison for a hearing on Satur day next.

WEST KING STREET, Where they are prepared to treat successfully all diseases of the human system with their OXYGENIZED MEDICATED INHALA-The inhalations are breathed directly into the lungs, and through them carried into the blood, expelling all inpurities from the sys-tem and healing any and every disease with which it may come in contact. A few inhala-tions will change the color of the blood from a dark to a bright red. In cases of paralysis the circulation can be restored immediately, in al-most every instance. In cases of onsamption this method has been attended with the best results; its action upon the lungs being direct and inmediate, it gives the patient just what he wants, viz: oxygen, of which he cannot get enough from the atmosphere, owing to the clogged and congested condition of the lungs. Of course there are cases which cannot be cured. Yet there are hundreds that have been given up as incurable, who have only to breathe oxy-gen to have new life infused into them. This is a compound medicated inhalation. It is perfectly harmless, having been administered to thousands of patients with the happiest re-sults. The e inhalations are unlike any other ever given for remedial purposes, and can be obtained only at the offices which we have es-othal be established in very city in the State. The following diseases have been successfully treated by this method, viz: Dyspepsia, Neuralgia, Heeumatism, Pulpitation, Paralysis, Epilepsy, Catarrh, Eruptions, Asthma, Erysipelas, Mercurial Diseases, Syphilis, Kidney Complaints, Stroughan, Kervosuess from whatever cause, Cancers, Difficult Breathing, Salt Rheum, Erysipelas, of all kinds, and such other diseases are quire a purifica-
