OXYGENIZED MEDICATED INHALATION.

The inhalations are breathed directly into the lungs, and through them carried into the blood, expelling all impurities from the system and healing any and every disease with which it may come in contact. A few inhalations will change the color of the blood from a dark to a bright red. In cases of paralysis the circulation can be restored immediately, in almost every instance. In cases of consumption this method has been attended with the best results; its action upon the lungs being direct and loginediate, it gives the patient just what most every instance. In cases of consumption this method has been attended with the best results; its action upon the lungs being direct and isomediate, it gives the patient just what he walts, viz: oxygen, of which he cannot get enough from the atmosphere, owing to the clogged and congested condition of the lungs. Of course there are cases which cannot be cured. Yet there are hundreds that have been given up as incurable, who have only to breathe oxygen to have new life infused into them. This is a compound medicated inhalation. It is perfectly harmless, having been administered to thousands of patients with the happiest results. The einhalations are unlike any other ever given for remedial purposes, and can be, obtained only at the offices which we have established in various parts of the country.
