ORGANIZATION OF THE NEW CITY COUN CILS.—The new City Councils met and or ganized in their respective Chambers on Wednesday at 2 P. M. The members of both branches were sworn into office by the Presidents elect.

Dr. Henry Carpenter was chosen President of the Select Council and James Carpenter was appointed Clerk to that body. Wm. P. Brinton, Esq., was chosen President of the Common Council and George W. Kendrick was appointed Clerk. In the Select Council the first business in order was the drawing of lots for different terms as provided for under the new law. The drawing resulted as follows: John Denner, Emanuel Shober, and Dr. Henry Carpenter drew three year terms. Robt. A. Evans, Charles H. Kryder and John A. Sheaff drew two year terms.
Wm. A. Morton, H. W. Harberger and
George Brubaker drew one year terms.

The two bodies of Councils then met together in the Common Council Chamber, nd a Committee was appointed to notify Mayor Sanderson that they were ready to ed with the ceremony of inauguration. The bonds of the Mayor having been approved by both branches, he was sworn in by Dr. Henry Carpenter, President of the Select Council, and delivered the following

Select Council, and delivered the following inaugural address:

Profoundly grateful to my follow-citizens for their continued confidence, as exhibited in the returns of the election held on Friday last, I enter upon the duties of the Mayoralty for another term with a fixed determination to discharge the obligations I have assumed with fidelity and to the Best of my ability. I am well aware that, under the amended Charter, which is now the organic law of the Corporation, and which we are all bound to obey, the duties will be more onerous and the responsibilities much great-

inw of the Corporation, and which we are all bound to obey, the duties will be more omerous and the responsibilities much greater than they have been heretofore; but, nevertheless, having voluntarily assumed the functions of the office, I shall not shrink from their performance, relying upon the kind indulgence of my fellow-eltizens for any errors that may be committed, (for we are all liable to make mistakes,) during the term upon which I have entered.

Gentlemen of the Conacils: The important business of legislating for the welfare of the people and the interests of the Corporation devolves upon you, and there is much that will require your earnest and thoughtful deliberation. It will, doubtless, be your aim, so far as a wise system of legislation can effect it, to develop the resources and improve the condition of the City; and in all propor efforts you may make in this direction, it will be my ploasure, no less than my duty, to aid you in every reasonable manner. Withat rapidly growing population, now numbering nearly twenty-five thousands souls, a healthy location and a salubrious climate, in the centre of one of dubrious climate, in the centre of one

intion, now numbering nearly twenty-five thousands souls, a healthy location and a salubrious climate, in the centre of one of the most prosperousand productive agricultural regions of the Commonwealth, and with the elements of wealth abounding everywhere around us and in our midst, it should be the carnest desire of all entrusted with governmental powers to keep pace, to some extent, with the progress of the age, and use aff legitimate and prudent means within our power to make laneaster, what it is capable of being made, a flourishing City, in which capitalists from abrond will seek not only a pleasant residence, but a desire ble point for the profitable transaction of their business operations. All that is mecessary to accomplish thus, is for men of capital amongst us to wake up to a spirit of enterprise, and for the Councils to exercise a judicious liborality in reference to public improvements. Nor is it absolutely necessary, in order to accomplish this, to resort to any increase of taxation. The present rate is amply sufficient, if the money is judiciously appropriated with a wise regard to conney, for all ordinary purposes; and if any extraordinary expenses are deemed necessary, a resort to temporary loans, made payable in one and two years out of the City Treasury, is the best method for obtaining the means.

Under the amended Charter it becomes the duty of the Mayor to recommend, from time to time, such measures to the Councils as he may deem necessary and expedient, and I shall embrace the earliest opportunity to do so, after the appropriate Committees are appointed and the machinery of legislation is put in working order.

By the 25th section of the Act of Assembly, approved April 5, 1867, under which we are now working, it is made the duty of Councils, in Convention assembled, on the First Wednesday succeeding their election, to elect a City Treasurer for the fiscal year which will commence on the first of June. That duty now devolves upon you, gentlemen, and I recommend that you proceed to the elec

there is no time designated in the law for the election of the other necessary officials, I would respectfully suggest that a special meeting of Councils be held at an early day for their election, and the transaction of such other important business as may claim your deliberate consideration, and to which your attention will be directed by a special communication. To proceed to this duty in a legal mainner, it will be necessary at your present meeting to pass a resolution designating a particular day for the election of those officers. If it is thought best to fill the offices immediately, the resolution rany be made to take effect to day.

The finances of the Corporation are in a healthy and prosperous condition. The credit of the City is unimpaired; and it should be the earnest desire of all to whom the people have entrusted the management of public affairs, to so legislate and so act as that the interests of the City shall receive no detriment at their hands. The Sinking Fund now amounts to \$55,817.06, and is gradually, but surely increasing in volume and efficiency. This fund should be sacredly guarded, and its operations never be disturbed until it shall have accomplished its utbrior object—the entire extinction of the public debt.

The appropriations for the current year

ulterior object—the entre extination of the public debt.

The appropriations for the current year were made by your predecessors in office, and I respectfully refer your honorable bodies to that statement for the different items, and as a guide for your deliberations.

The new Charter gives the Chief Executive more power over the Police than he had heretotor; and I shall endeuvor, with the aid of Councils, to make this branch of the public service more efficient, so that the pence and good order of the City may be preserved, and the Ordinances more rigidly enforced. forced. Fellow efficens: I now enter upon my Fellow efficient: I now enter upon my minth term of office, fully aware of the responsibilities of the station; but I address myself to the work with integrity of purpose and a firm reliance on the ald of Divine Providence, and I hope so to be able to conduct myself and the affairs of the Corporation as to bring no repreach upon the good citizens of Lencaster who have again entrusted me with power.

ANCIENT DOCUMENT.—We have been furnished with the subjoined copy of an ancient document, which may be of interest to many of our citizens, descendants of ancestors who resided in this city in the olden time, and whose names are appended to the address to Col. Richard Butler, who appears to have been a favorite as well with the citizen, pursuing the paths of peace, as with the soldier.

Col. Butler was stationed at this place, in command of a Regiment, at the disbanding of the army of the Revolution, and subsequently to the date of leaving the Borough of Lancaster, rose to the rank of Major General in the United States army, and commanded the right wing of the Army of General St. Clair, at the disastrous battle of the Miami, with the Indians on the 4th of November, 1791, where he died a soldier's death upon the field of battle. He had been shot from his horse, and was sitting down to have his wound dressed when a daring savage darting into the camp, tomahawked and scalped him. But he failed to carry off his trophy being instantly slain.

hundreds of cases of almost every form of chronic diseases, pronounced incurable by the medical profession, are radically cured, and some in an incredible short time, by the sole use of Mishler's Herb Bitters. Dr. Mishler has purceased a platt of ground, and laid out a magnificent pleas-ure garden, located between Church and ground, and laid out a magnificent pleasure garden, located between Church and Middle streets. It is intended as a summer resort for the citizens of Lancaster. There are refreshment saloons connected with it, also other attractions, which all combined form a splendid affair, and quite a novelty in this country. Dr. Mishler has spared no pains in perfecting the plans, which, when completed, will cost \$10,000. Yet, with all these gigantic preparations, Dr. Mishler is afflicted with an enlargement of the heart, which symptoms manifest themselves on every occasion, and however extensive the plan, he finds no relief without an additional specification, viz. "one extensive the plan, he finds no relief without an additional specification, viz.: "one

THERE have been so many different pro THERE have been so many different pro-parations brought before the public, which, by extensive and fiaming advertisements and posters and paint, scattered all over the county, have forced their way into tempo-rary notoriety, until Time, which tries all things, has proved their utter worthlessness, that it is really not to be wondered at that the people are suspicious of everything. that it is really not to be wondered at that the people are suspicious of everything. Duplicity in every branch of business, in public and private affairs, in fact in every walk of life, has become so much the rule that truth may be termed a rare exception. In no instance is this state of things more painfully manifest than in the trade of Patent Medicines, in which catalogue we find hundreds of preparations which, with every ingenious puff and long columns of advertisements in the newspapers of the day, parade themselves as certain, sure, and infallible remedies in every form and variety of diseases. Some of them, indeed most of of diseases. Some of them, indeed most of them are accompanied with testimonial been cured by these preparations. This is calculated to win the confidence of the calculated to win the confidence of the thousands of invalids throughout the country, who weakened by suffering and despairing of human aid are like drowning men, greedy to grasp at straws in the hope of buoying themselves up on the current of life's tide. They fly from one remedy to another, receiving it may possibly be from strong hope which never leaves us while the leaves again temporary benefit with each

strong hope which nover leaves us white life lasts, some temporary benefit with each change of medicine so-called; but finding expectations not realized, gradually lose all hope and eventually add despair to their already torturing maladies. This is no fancy sketch, but sober, solid earnest—the case of hundreds in our midst, who being so often deceived, possess no hope of recovery and continue to drag on a weary existence, until the king of terrors prayed for and welcomed not as a blissful means of reunion of the soul with the maker, but as a means of escape from the horrors of a living death. This distressing state of mindight be avoided, did invalids only inving death. This discressing acts of minght be avoided, did invalids only exercise the same degree of caution in matters concerning their physical well being, that they do in their business affairs, and instead of trusting their lives to the untried protestations of every empyric or quack, whose preparations are brought to their notice first as prudent business men ascertain by actual investigation, that they are really entitled to credit. We are led to these reflections by an incident which was mentioned to us by Mr. S. H. Warwick, of 731 Walnut Street, Philadelphia, who has a friend who has been undergoing medical treatment from some of the most eminent physicians whose services could be procured. Money being no object in this case when compared with be avoided, did invalids on

some of the most eminent physicians whose sorvices could be procured. Money being no object in this case when compared with health, no expense was spared. Yet in spite of all the disease still held its ground against all remedies that were brought to bear on it.

Many preparations were brought to bear on it.

Many preparations were brought to lis notice by his friends, but were laid aside, as hopeless, but one circular bore/on its face a peculiarity that possibly might have escaped any but the viglant eye of one who engerly sought relief from an impending horrible death. This was that nearly all of the many testimonials contained in the circular purported to enanate from persons who resided in the same city and neighborhood whore the medicine was prepared. This was a new feature, but still desirous of Avoiding disappointment he determined to obtain more positive evidence as to their genuineness. He therefore requested his friend Mr. Warwick to go to Lancaster and ascertain if there really were such persons living there, and whether their statements were as represented in the circular.

Mr. Wurwick accordingly visited Lancaster in company with Mr. Jonos, of 202 Union street, and Mr. J. P. Strong, editor of the Mechanic of Philadelphia, and experienced no difficulty in finding the persons designated, when having proved the correctness of the statements they called on Dr. Mishler, the proprietor, and frankly stated to him the doubts previously entertained. Dr. Mishler expressed himself well pleased that the investigation had been made, and said that he courted investigation in the case of every certificate which he published.

He also accompanied the gentleman to the residence of several others who had been afflicted with cancer of the nose; Miss B. Sharpe, a similar case, but more aggravated, as not only the nose, but also the published. Among others he called on C. K. Frailey, Esq., and Alderman of this City, who had been afflicted with cancer of the nose; Miss B. Sharpe, a similar case, but more aggravated, as

PITTSBURGH, May 7, 1867.

Messrs. Fahnestock & Holton:
Gentlemen—I regard Dr. Mishler as a benefactor of his race. Great men have been raised up from time to time in different ages to bless the world with their skilled genius. How incalculable is the good which many men have almost unconsciously wrought in the world. Dr. Mishler is a hero of this class. His Herb Bitters were accidentally brought to my notice and by their use I have been restored to perfect health. For years I was a victim to Dyspepsia in its worst form, and was compelled to retire from my business. My health failed so rapidly that I was given over by my physicians. One recommended me to take a tour to California. I did so, but derived no benefit. I had tried, as I thought, every dyspepsie medicine of reputation, and rived no benefit. I had tried, as I thought every dyspepsis medicine of reputation, and withoutsuccess. My health still failed, and I became convinced that my days on earth would soon terminate. But Dr. Mishler's Herb Bitters were brought to my notice. had no faith in them nor anything else Still, to satisfy friends, I consented to try them. I very shortly began to feel far more improved in health and spirits that I had in years before. I continued to use more improved in health and spirits than I had in years before. I continued to use them regularly, my hope revived, and I gradually recovered. I am to-day as well, strong and hale as I was fifteen years ago, and as I have used no other medicine, I attribute my restoration to Mishler's Herb Bitters. I furnish you with this testimony voluntarily, for I deem it due to you that my fellow citizens should know the great virtue of Mishler's Herb Bitters. I am, gentlemen, your obedient servant,

Richmond, May 12—Evening.—At the African Church, to-night, Judge Underwood and Horace Greeley made short addresses to the negroes. Underwood advises them against rioting, and said that General Schofield had told him that he had heard there might be a riot here to morrow, and if there was, he would plank cannon in every street and sweep the rioters down with grape. He urged the negroes not to gather in crowds, but to attend to their business.

Mr. Greeley urged the negroes not to engage in a riot, but to go peaceably about their daily avocations. Arrest of the Zook Murderer.

E Cousamption Curable by Doctor SCHENCK'S MEDICINES.—To cure Consumption, the system must be prepared so that the lungs will heal. To accomplish this, the liver and stomach must dirst be cleansed and an appetite created for good wholesome food, which, by these medicines will be digested properly, and good healthy blood hande; thus building up the constitution. Schonck's Mandrake Pills cleanse the stomach of all billious or mucuous accumulations; and, by using the Sea Weed Tonic in connection, the appetite is restored.

SCHENCK'S FULMONIC SYRUP is nutritious as well as medicinal, and, by using the three remedies, all impurities are expelled from the system, and good, wholesome blood made, which will repei all disease. If patients wild take these medicines according to directions, Consumption very frequently in its last stage. CLIMAX.

A plain statement of facts. I inherited Scrofula, and many of my relations have died of it. In 1839 my case was frightful. Tumors and ulcers spread until in 1842, under the advice of my physicians I went to Avon Springs. I received no benefit—tred every medicine and did everything I could I had to rest my arm on a cushion, and had not been able to raise it to my head for over a year. The discharge from two ulcers was nearly a pint a day. Amputation was recommended; but pronounced dangerous, I could not sleep, and my sufferings were intolerable. A friend brought me an English physician who applied a salve with which he said he had accomplished extraordinary cures in the hospitals in England. It commenced to relieve; persisted in its use; it finally effected a perfect and entire cure. It is now 1848. It if five years since I had the appearance of a scrofulous sore, and my health has been good ever since. I procured the receipt of his wonderful article—this blessing of humanity—and have called it "Paals CLIMAX BALVE," and allow the public to use it or not as they choose. This is a brief but candid statement, given more fully in my circular.
