whether he knew anything about it. Flog-ging, bucking and gugging, and stretching soldiers "spread eagle" fashion, seems to be the order of the duy here. Lieut. Lauxt, through the influence of Senator Cameron, of Pennsylvania, was appointed Second Lieu-tenant only 12 days ago. I imagine he has commenced early. Still there are men in the neighborhood who believe him to be a Christian and a gentleman. Christian and a gentleman. The Material Aspect of the South. A gentleman claiming to possess adequate information, writes to the *Tribune* as follows:—" Virginia seems not to be as forward in agricultural enterprise as some other States. The large towns are dull, excepting perhaps Norfolk. In North Carolina there is a full average acreage of cotton, and a fourth more of corn planted than ever before. Both promise largely. In South Carolina the poverty of the plant-In South Carolina the poverty of the plant ers is reported as having prevented as much planting as would have been done. A large area of corn is under cultivation and large area of corn is under cultivation and promises well; cotton looks flourishing. In Georgia and Florida the crops are large in area and promise well. Alabama offers an excellent prospect. Things there seem generally better materially than in the other States, with perhaps the exception of North Carolina. Louisiana and Mississippi are badly off, owing to the crevasses in the layer and in Mississippi to the want of levee, and in Mississippi to the want of labor also. Arkansas is not in much better Texas, from all accounts condition. Texas, from all accounts, is flourishing beyond all former years. A gentleman whose duties give him a thorough insight into and knowledge of the agricultural position of the South, and who for two months has traveled through the South, estimates the probable yield of the cotton crop this year at two million and a half bules."

Greeley Against Stevens.

The New York Tribune does not like the looks of the coming session of Congress, and thus expresses its fears:

Mr. Stevens and his friends, who were defeated in the attempt to place the military power under the control of Grant, will make a boider effort. We shall have confiscation, nephage, and lead to the negro pressed by perhaps, and land to the negro pressed by a small minority. We do not think it will be wise to make new issues, and we counse be wise to make new issues, and we counsel moderation with justice, as we did during the last session. We dread to reopen this question, because withit comes uncertainty, and unrest, feverishness, endless and angry discussions. We find a sentiment in the West that has expression in a few miserable jobbing newspapers—a kind of Thenardier feeling. A number of office-beggars and politicians, calling themselves the Grand feeling. A number of office-beggars and politicians, calling themselves the Grand Army of the Republic, and meeting in out-of-the-wuy places with grips and pass-words, are passing resolutions demanding confiscation and farms. This is either knavery or mudness. People who want farms work for them. The only class we know that takes other people's property because they want it is largely represented in Sing Sing. The people of this country do not want. Sing Sing and Mexican banditti principles introduced into their statesmanship. We can never reconstruct America by the gallows and the Deputy Sheriff, and we trust that thespirit of kindness will and we trust that thespirit of kindness wil and we trust that thespirit of kindness will prevail—especially because this contest is not made by the Southern people. They accepted the military bill manfully, and have endeavored to act under its provision. Instead of apathy and wrath, and discontent, we have found them eager and painstaking in their effort to reorganize their political system under the military bill. If the work is arrested, they are not to blame; and we have no right to increase the condiand we have no right to increase the condi-tions imposed last March. If anything, we should recognize the temper of the South by limiting them.

Curious History of a State. Curious History of a State.

The territory known as Wisconsin was claimed by France on the ground of discovery by her Missionaries and travelers in 1670, who governed it until they ceded it to England. It was held by the English until 1780, when it was ceded to the United States. It was claimed by Virginia for one year, when she ceded her possessions lying northeast of the Ohio to the United States, Wisconsin was then under the Territorial Government of Ohio. On the 4th of July, Government of Ohio. On the 4th of July 1800, the Indiana Territory was organized and Wisconsin placed under its jurisdic tion, where it remained until 1809, whe the Illinois Territory was formed, and is was attached to that territory until April 8, 1818, when Illinois became a State, I was then joined to the Territory of Michigan, until organized as the Territory of Wisconsin in 1836. Wisconsin in 1836.
So the State was governed by the King of France thirty-three years; by the King of England twenty years; by the State of Virginia one year; by the Indiana Territory nine years, and by the Michigan Territory eighteen years. She continued a Territory eighteen years, and was and was denitted ever nearly twelve years, and was admitted as State in 1848.

cians and scientific men. Now it has assumed a formidable aspect, and cases shoot up here and there in various parts of the city, spreading alarm by their fatal termination. It is generally pronounced to be purple typhus fever. Whatever it is, there is much mystery about it, and it may spread further than our shores. At present it is happily confined to Dublin, only one or two cases having occurred in the provinces. There have been only fifty cases altogether. It is called, suggestively and appropriately, "The Black Death." A disease called by that name, said to be more fatal than the present one, devastated I reland We learn that arrangements have been made by the Philadelphia, Wilmington and Baltimore, and the Delaware railroads, for running at least four fruit trains per day for conveying the immense crop of fruit to the Philadelphia, New York and other markets the coming season. The railroad company estimates the peach crop of Kent county alone at 800,000 baskets. This is, of course, exclusive of all that vast regionlying along the bay and creeks. In 1864, the year that is mentioned as the "beavy crop," there was shipped from Smyrna 70,000 baskets. Heet Sugar.

Recent Illinois newspapers speak with confidence of the results of the efforts making in that State to manufacture sugar from beets, after the plan adopted in France a few years ago, and since prosecuted with much success. The subject is again brought up prominently by the consignment of about thirty thousand pounds of sugar to Chicago from the manufacturing establishment at Chattsworth. This sugar is said to have been made in March, and is a part of the product of last season's business, the beets having been preserved in pits through the winter. Experience seems to be conclusive in regard to the good saccharine properties of beets grown in this country, as compared with those of France. A correspondent at Rome describes the personal appearance of the Pope: "I met him the other day on the Via Angelica, a pleasant, shady street that runs out north under the walke of the Vatican, where he had gone, as is his wont, totake an evening drive. He generally drives out between five and six o'clock, goes out a few hundred rods, and then dismounts and walks. I saw him walk over a mile, and then disappeared from sight, still walking, while his

Jackson, and also during the term of Mr. Buchanan.

The Trial of John H. Surratt, for the Murder of Abraham Lincoln.

Washington, June 25.
The trial of John H. Surratt was resumed this morning in the Criminal Court, Judge Fisher presiding. The court room was crowded, as usual, and the air was very oppressive. The Court was opened at 10.20. John W. Garratt and Col. E. J. Conger were sworn and testified in regard to Booth's movements after the assassination. Colonel Conger identified a knife, some other articles and the diary which were taken from Booth's body.

SELF-RAKING REAPER AND MOWER. with one or two Driving Wheels as may b Patented 1863, '65 and '66, by James S. Marsh, Lewisburg, Pa.

MARSH'S COMBINED

These Machines have the advantage of being trianged in such a manner that the Cutter Sar can be raised or lowered to suit the condition of the grain to be cut without stopping the team. They have Side Delivery. The facilities for Mowing, with this Com-bined Machine are equal to a Machine built on purpose for a Mower. The Cutter Bar is raised and lowered at the will of the driver; and the points of the Guard can be dropped down when desired to cut lodged or down grass. THE "VALLEY CHIEF" HAS BEEN GREAT

LY IMPROVED AND STRENGTHENED SINCE LAST YEAR.

One of them may be seen in the South-ear corner of Centre Square, Lancaster City. As a Reaper and Self-Rake it has no equal As a Keaper and Self-Kake It has no equal in the field, and its claims to public attention are being appreciated by experience and trial. At the great trial of Reapers and Mowers and Self-Hakes at Auburn, New York, in July, 1868, the "VALLEY CHIEF" MOWER AND REAPER, and MARSH'S BELF-RAKE proved worthy of the bighest commendation and received the favorable report of the Judges. As a Self-Rake, the Marsh Rake was the only one out of 20 Machines that was marked perfect (No. 40.) in cutting lodged wheat on the "Sheldon Lot," and but one other Machine in the list that was marked even to No. 38 in the test, all the rest being below that number.—This was regarded as the great test of the trial in Reaping and Raking. See pages 41, 42 and 43 of the Report. The entire Report may be seen at our office.

SHERMAN'S NEW PATENT AS YOU LIKE IT SKIRT. 35 North 8th St., corner of Filbert. 35

This is not only a new fashion, but a new article of SKIRT, made on an entirely new principle, so novel and yet so perfect the ladies contend it should be called Perfection.

We would here call particular attention to the AS YOU LIKE IT, or flexible joint, extending down the front of the skirt; it is so constructed that the springs fold inwardly, but not outwardly, and readily yield to the slightest pressure, thus allowing them to collapse, so that the skirt occupies the smallest possible space whilst sitting, riding, or in passing through a crowd, and yet the moment the pressure is removed, the skirt resumes its original and beautiful shape.

The novelty and utility of this contrivance need but be seen to be appreciated.

But for want of space we might here publish thousands of extracts from letters, we are daily receiving, speaking in the highest praise of these Skirts.

OUR CORSETS. Are now so well known for their superior SHAPE, MATERIAL and WORKMANSHIP, that it is perhaps unnecessary for us to speak of them, further than to say that we have greatly enlarged our assortment of styles, both of our own make and importation, and can now safely defy competition. We ask but a trial and are sure of your future patronage.

tion of the most approved machinery, we are now able to supply the very best machines in the world.

These machines are made at our new and spacious Factory at Bridgeport, Conc., under the immediate supervision of the President of the Company, Elias Howe, Jr., the original inventor of the Sewing Machine.

They are adapted to all kinds of Family Sewing, and to the use of Seamstresses, [Dre·s Makers, tallors, Manufacturers of Shirts, Collars, Skirts, Coaks, Mantillas, Clothing, Hats, Caps, Corsets, Boots, Shoes, Harness, Saddies, Linen Goods, Umbrellas, Parasols, stc. They work equally well upon silk, linen, woolen, and cotton goods, with silk, cotton or linen thread. They will seam, quit, gather, hem, fell, cord, braid, bind, and perform every species of sewing, making a beautiful and perfect stich, alike on both sides of the articles sewed. The Stitch invented by Mr. Howe, and made on this Machine, is the most popular and durable, and all Sewing Machines are subject to the principle invented by him.
