hearts. The people are calmly ser nizing the political situation. They see o the Republican party fully committed to the doctrine of negro equality. It can not and dare not abandon its favorite theory. With the surrender of that one idea the whole scheme of reconstruction on which the leaders of the party have staked the very existence of their party would fall to the ground, tumbling the entire structure into ruins. There are whispers of moderation, and a few talk with bated breath of a change of policy. It is too late. The Republican party dug its grave when it attempted to establish its power on the rotten props of negro republics in the South. The American people will tolerate no such thing They have spoken loudly in the recent elections, and there will be no end of the great reaction now going on, until the corrupt, extravagant and fanatical Radicals who lead the Republican party are all hurled from power. They cannot abandon the platform they have laid down, and on that even General Grant would be defeated.

Treating Negroes Impolitely.

The Radical newspapers of this State are making a terrible howl, because certain, not very flattering, likenesses of negroes appear in country papers of the Democratic pursuasion, and on what are called "Salt River tickets." We hope these champions of the African race will keep cool. The Democracy cherish no animosity toward the negro race. They are willing to guarantee to every one of them perfect and complete protection in every right of person and property, to make them fully equal to whites in these important respects under the faws of every State in the Union. But we do intend to insist that the negro shall not vote in any State | completely committed to the most exunless the white people of such State chose to confer upon him that privilege; that he shall not be forced into the jury box, unless the whites consent; that he shall not be elevated to office over the heads of white men, as is now done in the South; that he shall not be granted especial privileges in railroad cars, as i now the case in this State. There is no danger that the negro will be abused by the Democracy when they come into power. He will only be politely asked to step out of the political arena, and to stay out of it until such time as the white people of the different States shall agree to admit him to the ballot box and the other privileges for which the Radicals have set up a claim in his behalf. And that time will be long in coming unless we are greatly mistaken. The election in Ohio settled that ques tion for at least twenty years to come

THE Radicals of Philadelphia are making an attempt to treat the election in that city as if it had not been held. Without the slightest grounds for so doing they are engaged in an attempt to throw out the votes of several strong Democratic districts. We sometime think there will be need for a second Buck Shot War before we get things fairly settled. Let the Radicals take care they do not provoke it.

-----THE New York Times says there are practical reasons why negroes should vote in the South which do not apply to Ohio. The only practical reasons of the kind we know are the necessities of the Radical party. They can only hope to maintain their hold on power by setting up a negro empire on the ruins of the Southern States, and that can only be done at the most enormous cost to the people of the North.
