where a marriage could be consummated by proxy; but in Mexico the practice still exists, and the necessities of the times occasionally make it a matter of the times occasionally make it as matter of times occasionally make it a matter of necessity. The latest and most notable case of this kind has just occurred at Mazatlan, the parties being a dashing young American widow—Mrs. Maria Ann Bowman, nee McKenty, late of San Francisco—and the gallant and distinguished Gen. Ramon Corona, Commander of the Army of the West. General Corona did as much as any living man to drive the French from Mexico, and he arrived at Queretaro just in time to beat back the last desperjust in time to beat back the last desperate and almost successful sortie of the beleaguered Maximilian.

beleaguered Maximilian.

Being in the field in the State of Jolisco at the head of his division, he, of course could not go north to meet his bride, and so the ceremony was per-formed, as I have said, by proxy, he being represented by Senor Sepulveda, Collector of Customs at Mazatlan. Mrs. Corona arrived by the Continental yes-terday from Mazatlan, in company with terday from Mazatlan, in company with Colonel Banda, and will proceed by the next Panama steamer to Acapulco, to join her husband at Guadalajara. Corona is a rising man, and it is among the probabilities of an immediate future probabilities of an immediate ruture that this fair American girl may find herself the wife the President of Mexico, ith her home in the far-famed halls o the Montezumas.

A CROSS THE SIERRA NEVADAS. THE CENTRAL PACIFIC RAILROAD. THE WESTERN HALF OF THE Great National Trunk Line Across the Continent, Being constructed with the A M AND SUPER-VISION OF THE UNITED STATES GOVERN-MENT, is destined to be one of the MOST in-POUTANT LINES OF COMMUNICATION IN THE WORLD, as it is the sole link between the Pucific Coast and the Great Interior Bas over which the Humaense Overland travel must pass, and the

over which the limmense Overland travel must pass, and the

Principal Portion of the Main Stom Line

between the Two Oceans.

Its line extends from sagamento, on the tidal waters of the Pacilic, eastward across the richest and most populous perise of all forms, nevada and Unda, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roads now building cast of the Rocky Mountains. About 100 miles are now build, equipped and in running operation to the summit of the Sterra Nevada. Within a few days 35 miles, now graded, will be added, and the tract carried entirely across the mountains to a point in the Great Sult take Vulley, whence further progress all be easy and rapid, from materials and equipment are ready at hand for 300 miles of roat, and 10,000 men are employed in the construct.

The local business upon the completed portion surpasses all revolus estimate. The figures for the quarter ending August 31 are as follows in GOLD:

Grow Operating Remains, Remains, Remains, Repeases, Remains, Repeases, Remains, 8487,579-64 886,548-47 8401,031-17 8487.579 64 886.548 47 8401.031 17

This is upon the actual, legitimate traffic of the road, with its terminus in the mountains, and with only the normal ratio of government transportation, and is exclusive of the materials carried for the further extension of the road.

The Company's interest liabilities during the same period were less than \$125,000.

Add to this an ever-expanding through traffic and the proportions of the future business become immanses.

The Company are authorized to continue their line eastward until it shall metanal connect with the roads now building east of the Rocky Mountain ranges. Assuming that they will build and control half the entire distance between 8am Francisco and the Missouri river, as now seems probable, the United States will have invested in the completions of 865 miles \$28,582,000, or at the average rate of 835,000 per mile—not including an absolube grant of 10,000,000 acres of the public lands. HOOTH & GARRETT, of Philadelphia, Chemisis of high standing in their report of the analysis, says to us:

"The constitution of the above indicates a decided advance in the composition of a Fertilizer by the introduction of a considerable for century of Packs, and countenances the claim involved in the name Complete Manure."

WILLIAMS & MOSS, o' Philadelphia, Chemisks of large experience in the analysis of Fertilizers, says:

"We find from an analysis of your 'Complete Manure,' that the name you have given it is certainly warra-ted by its Chemical composition; in addition to thus cordially recommending your Fertilizer from a Chemical composition; and the control of the same composition was a composition of the same composition and the same composition. certainly warras-ted by 18 Chemical composition; In addition to thus cordinily recommending your Fertilizer from a Chemical stand
point, we should state that its mechasical condition is most excetient, being such as to admit
of its use in the drill without further preparation.

The "Complete Manure" has been used
largely on various crops, and the testimony
thus far received proves it to be the best Fortilizer introduced.

NEW FASHION FOR 1868. SHERMAN'S NEW PATENT

AS YOU LIKE IT SKIRT. 35 N. EIGHTH ST., COR. FILBERT. 35

This is not only a new fashion, but a new article of skirt made on an entirely new principle, so novel and yet so perfect the hadles contend it should be called Perfection.

We would here call particular attention to the AS YOU LIKE IT, or flexible joint, extending down the front of the skirt; it is so constructed that the springs told inwardly, but not outwardly, and readily yield to the slightest pressure, thus allowing them to collapse so that the skirt occupies the smallest possible space while setting, riding, or in passing through a cr. wd, and yet the moment the pressure is removed, the skirt resumes its original and beautiful shape.

The novelty and willity of this contrivance need but be seen to be appreciated.

Ask to the AS YOU LIKE IT SKIRT, and eed but be seen to be appreciated.
Ask for the AS YOU LIKE IT SKIRT, and

OUR CORSETS

Are so well known for their superior SHAPE, MATERIAL and WORKMANSHIP, that it is ALLERIAL and WORKMANSHIP, that It is perhaps unnecessary for us to speak of them further than to say that we have greatly enlarged our assortment of styles, both of our own make and importation, and can now safely defy competition.

It may well be said that In Mrs. Sierrann's Corsers, ladies find The laws of Health with Fushion's taste combined;

Supporting equal y each separate part, They cramp no action of the longs or heart, And no injurious ligature is p.aced To mar the flexure of the matural waist, To mer the flexure of the natural walst, Their files ert in—and what's sure to please, In all positions there is perfect case;
The figures of the young they help to form, Aiding and not repressing every charu;
Irregularities of stape they hide, so that by none can slight defects be spied, While e en a figure, which is understood As being 'bad,' may by their nelp-seem good; And matrons wearing them a boon will gain, Their early symmetry, they ill long retain.
